**Certified Organic Highlights**

The 2016 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2016, the United States had 14,217 certified organic farms that produced \$7.6 billion in certified organic products. Alabama had 18 certified organic farms that produced \$1.9 million in certified organic products. Of the 2,014 acres of certified land in Alabama, 564 acres were cropland and 1,450 acres were pastureland/rangeland. The top two certified commodities sold in Alabama were other vegetables and fresh herbs grown under protection with sales valued at \$119,964 and tomatoes grown under protection with sales valued at \$51,966.

For more information on the 2016 Certified Organic Survey and related reports, please visit the NASS Organic Agriculture page at: [www.nass.usda.gov/organics](http://www.nass.usda.gov/organics).

**Farms, Land, and Value of Sales on Certified Organic Farms: 2016 and 2015**

Geographic area	2016			2015
