## *On the Cover*

The photo was taken at Indreland Angus Ranch near Big Timber, Montana in the fall of 2011. Roger and Betsy Indreland, along with their daughters Anne and Kate, raise purebred Angus cattle. They also sell naturally dry-aged beef straight from the ranch to online customers and farmer's markets attendees. Montana is home to thousands of hard-working families, like the Indrelands, who produce top quality beef for the world. Many of these ranches have been in the family for more than 100 years, serving as a cherished lifestyle for many generations.

## STATE CROPS

- 31 Crops Summary
- 31 Usual Planting and Harvesting Dates
- **Acreage, Production, and Value -**
- 32 All Wheat and Winter Wheat
- 32 Durum Wheat
- 33 Other Spring Wheat
- 33 All Barley
- 33 Oats
- 34 Corn
- 34 Potatoes
- 34 Sugar Beets
- 35 Dry Beans (All, Pinto, and Garbanzo)
- 35 Lentils
- 36 Dry Peas (All and Austrian Winter Peas)
- 36 Canola
- 36 Camelina
- 36 Mustard Seed
- 37 Flaxseed
- 37 Safflower
- 37 Sweet Cherries
- 37 Leaf Cutter Bees
- 38 Alfalfa Seed
- 38 Hay (All, Alfalfa, and Other)
- 39 Grain Movement
- 40 Wheat Utilization
- 41 All Wheat, All Barley, and Oats Stocks
- 41 All Barley Varieties, Historic
- 42 All Wheat Varieties, Historic
- 43 Winter Wheat and Spring Wheat Varieties
- 45 Durum Wheat and Barley Varieties
- 47 Barley Purchased for Malt

## COUNTY CROPS

### - Planted, Harvested, Yield, and Production -

- 48 Winter Wheat
- 52 Spring Wheat
- 55 Durum Wheat
- 56 All Barley
- 58 Oats
- 59 Corn
- 60 Dry Beans (All, Pinto, Other, and Garbanzo)
- 61 Dry Peas (All and Austrian Winter Peas)
- 62 Lentils
- 62 Canola
- 62 Flaxseed
- 63 Mustard Seed
- 63 Safflower
- 63 Potatoes
- 63 Sugar Beets
- 64 Hay (Alfalfa and Other)

## STATE LIVESTOCK

### - Cattle and Calves -

- 66 Inventory by Class, Cattle on Feed, and Value
- 66 Calf Crop and Disposition
- 66 Private Grazing Fee Rates
- 66 Production and Income
- 67 Dairy Products Marketed, Income, and Value

### - Sheep, Lambs, and Goats -

- 67 Milk, Meat, and Other Goats
- 67 All Sheep Inventory by Class and Value
- 67 Lamb Crop and Disposition
- 67 Wool Production and Value
- 68 Death Loss and Percent of Total Inventory Lost
- 68 Death Loss by Cause and Value of Loss
- 69 Percent of Loss by Cause

### - Hogs and Pigs -

- 70 Inventory by Class and Value
- 70 Annual Farrowings and Disposition
- 70 Production and Income

### - Chickens, Eggs, and Honey -

- 71 Chicken Inventory, Value, Production, and Income
- 71 Eggs Production and Value
- 71 Honey Inventory, Production, Stocks, and Value

### - Commercial Livestock Slaughter -

- 72 Commercial Red Meat Production
- 72 Monthly Slaughter by Class

## COUNTY LIVESTOCK

### - County Inventory by Head -

- 73 All Cattle and Calves
- 73 Beef Cows and Heifers
- 74 Milk Cows and Heifers
- 75 All Sheep and Lambs
- 76 Hogs and Pigs

**COMMENTS FROM  
OUR GOVERNOR**

Montana farmers and ranchers usually cope with a certain amount of volatility in weather, commodity prices and other inputs, but 2011 had a bit of everything. Floods, drought, crop pest outbreaks and price volatility made it a challenging year, but in the end for many, a prosperous one.

Delays in spring planting due to floods reduced Montana's 2011 production of staples such as spring wheat and durum, while high prices for hay helped push the value of Montana production to more than \$3 billion for a second consecutive year.

Montana farmers led the nation in pea and lentil production in 2011, and also increased production of other rotation crops such as chickpeas, canola and flax. Acreage reports for 2012 show continued growth in rotation crops. This increased diversity serves as a hedge against weather and market volatility and demonstrates the innovation and resilience so necessary for today's agricultural producers.

The 2012 crop year has brought its own challenges. Global economic issues, fertilizer prices and a return to drought conditions and damaging fires in much of southern Montana threaten farm and ranch balance sheets.

Montana's producers will meet these myriad challenges and continue to drive Montana's successful economic engine. I'm very grateful for the enormous contributions our agriculture producers make to the state and to their communities. The longstanding traditions of hard work, optimism, determination that exemplify Montana's agricultural industry are an integral part of our state's history and key to Montana's future.

Sincerely,

Brian Schweitzer, Governor

**MESSAGE FROM  
THE DIRECTOR**

A combination of early flooding and drought later in the 2011 growing season hampered what promised to be an excellent year for Montana farmers and ranchers, but it was a good year overall with excellent prices for hay and grain.

Montana surpassed North Dakota as the leading pea and lentil producer in 2011, and the state's reputation in grain and pulse crops attracted several new buyers to set up shop in our borders. Competition is good when it comes to markets for Montana's high quality staples such as wheat, barley, hay and livestock. Markets for some Montana products increased with little fanfare. During the past two years, Montana livestock producers have sold more than \$20 million in live cattle, embryos and semen to a burgeoning market in Russia, with more exports predicted during the coming year.

The Montana Department of Agriculture is working hard to increase exports and domestic sales of value-added products. Visit a local farmers market to see some of the new products your neighbors are creating to help grow Montana's agricultural economy.

Updates to this annual Montana Agricultural Statistics bulletin, produced in cooperation with the National Agricultural Statistics Service, are available electronically at [www.nass.usda.gov/mt](http://www.nass.usda.gov/mt).

Sincerely,

Ron de Yong, Director, Montana Department of Agriculture

I proudly introduce the 49th edition of the Montana Agricultural Statistics Bulletin. Montana is a state of extremes. Whether faced with excessive moisture and flooding in 2011 or fire and drought conditions in 2012, a compilation of production results is necessary to tell the story of Montana's farmers and ranchers. This publication tells this story to legislators, agribusinesses, academics, reporters, and producers who all follow the basic premise that more information is better than less, especially when making decisions with an economic impact.

This era in which we operate dictates that the safeguarding of public funds remain a priority. Working cooperatively with allows the National Agricultural Statistics Service (NASS) the ability to achieve the goal of providing timely, accurate, and useful statistics in service to U.S. agriculture. To that end, NASS partners with Montana Department of Agriculture, Montana Wheat and Barley Committee, Montana Woolgrowers Association, and the Montana Alfalfa Seed Committee, among others. This year, I am pleased to announce that NASS has opened a data lab on the Montana State University campus in Bozeman. This data lab will provide better access to data by researchers while continuing to safeguard the confidentiality of our agricultural producers. Finally, the biggest cooperator which NASS has in the state of Montana is our agricultural producers. Compiling the collective voice of farmers and ranchers is a privilege which I do not take lightly.

The 2012 Census of Agriculture is coming! At the end of 2012, nearly 40,000 agricultural operations and potential agricultural operations with the state of Montana will be mailed a questionnaire. If you are an agricultural operator, please watch for it and do your part in telling the story of Montana agriculture through your participation.

Steve Anderson, Director, USDA, NASS, Montana Field Office

**NOTES FROM  
THE DIRECTOR**

**Department Mission**

*"To protect producers and consumers and to enhance and develop agriculture and allied industries."*

**Director Ron de Yong, (406) 444-3144**

Central Services Administrator: Libbi H. Lovshin

Attorney: Cort Jensen

Public Information Officer: Ron Zellar

**Department Programs & Background**

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums and works to make the department's programs accessible to the public.

**Agricultural Development Division**

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

**Ag Marketing & Business Development Bureau**

- Marketing and Business Assistance
- Grants and Loans
- Agriculture Curriculum Development

**Rural Development Bureau**

- Agricultural Finance
- Agricultural Statistics
- Commodity Check-Off Programs
- State Hail Insurance

**Wheat & Barley Bureau, Great Falls**

- Producer funded research and marketing
- Hosts foreign buyers and delegations

**State Grain Laboratory, Great Falls**

- Federally licensed grain inspection

**Growth Through Agriculture** grants and loans during FY 2012 totaled more than \$400,000 to 47 businesses and individuals for value-added agriculture projects. Food and Agriculture Development Centers assisted 93 clients with food and farm-derived energy projects.

**Marketing assistance** during FY 2012 included more than 90 one-on-one company consultations; about \$675,000 in trade show sales; and 23 promotions in out of state trade shows. Marketing staff conducted five overseas trade missions and hosted three delegations, resulting in more than \$25 million in embryo, semen, and live animal sales.

**Rural Development** finance programs have a combined loan portfolio of more than \$3.5 million.

**State Hail Insurance** protected 1.8 million acres in 2012, an increase from the previous year's record 1.5 million acres when wet weather prevented planting in some areas.

**State Grain Laboratory** completed nearly 34,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 3,000 inspections on peas, beans and lentils. The Great Falls facility, with a branch office in Plentywood, is the only federally licensed grain lab in Montana.

**Wheat & Barley Committee** annually hosts an average of 13 foreign trade delegations and 63 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

## **Agricultural Sciences Division**

Administrator: Greg Ames, (406) 444-2944

### **Analytical Laboratory Bureau, Bozeman**

- Tests feed, pesticides, fertilizer, water

### **Commodity Services Bureau**

- Anhydrous Ammonia
- Feed/Fertilizer
- Grain Warehouses & Auditing
- Organic Certification
- Produce/Seed/Seed Potatoes

### **Pest Management Bureau**

- Apiary/Alfalfa Leaf Cutter Bees
- Weed Seed Free Forage

- Export Certification
- Noxious Weeds & Invasive Pests
- Nurseries & Pest Quarantines
- Cooperative Ag Pest Survey

### **Technical Services Bureau**

- Applicator Certification & Licensing
- Pesticide Compliance & Enforcement
- Pesticides in Water
- Pesticide Product Registrations
- Vertebrate Pests

## **The Department:**

- Licenses about 500 pesticide dealers and registers about 11,300 pesticide products.
- Licenses about 4,700 private and 2,000 commercial and government pesticide applicators.
- Certifies 74 commercial honeybee operations and registers 5,200 apiary locations.
- Issues 1,000 plant health and export certificates, enabling products to be shipped to other states and countries.
- Licenses 1,000 nurseries to assure quality products.
- Issues 3,100 inspection certificates on 280 million pounds of potatoes shipped for seed.

**Analytical Laboratory**, operated jointly with MSU at Bozeman, reports about 125,500 individual test results annually on 3,200 feed, fertilizer, soil, plant tissue and water quality samples.

**Pesticide Disposal program** assists homeowners, businesses and producers in disposing of unwanted and unusable pesticides - a total of 400,000 pounds since 1994.

**Fertilizer program** registered more than 3,300 fertilizer and soil amending products and licensed 220 in-state and 250 out-of-state businesses. Reports indicate 700,000 tons of fertilizer were distributed in Montana during 2011.

**Organic program** annually inspects and certifies 107 farms and ranches and 47 food handlers as compliant with USDA organic standards. Organic certification allows access to local, national and international value-added markets for organic food products.

**Noxious Weed Trust Fund** annually distributes more than \$2 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

## **Board, Councils and Committees**

The department receives advice from, and has attached to it, the following:

- Agriculture Development Council
- Alfalfa Seed Committee
- Cherry Advisory Committee
- Hail Insurance Board
- Mint Committee
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee

## Crop, Livestock, and Weather Digest, 2011

**January:** Montana had above normal temperatures during January, with above average precipitation in many areas. Choteau reached the monthly high temperature of 57 degrees. Valentine and Wisdom tied for the monthly low of minus 32 degrees. West Glacier had the most monthly accumulated moisture at 5.87 inches. At month's end, winter wheat crop conditions were 73 percent good to excellent, well ahead of last year's 34 percent. Ninety-six percent of livestock received supplemental feed. Calving and lambing had just begun.

**February:** Montana received ample snowfall during February, the third consecutive month of above normal precipitation. Average temperatures were well below normal for most of the state. Harlem had the monthly low of minus 44 degrees. Winter wheat had good snow cover and crop conditions were 71 percent good to excellent at month's end. Nearly all livestock received supplemental feeding. Despite sub-zero temperatures and high winds, calving and lambing were on pace with last year, at 15 percent and 9 percent complete, respectively.

**March:** Many areas in Montana had below average precipitation during March, while other parts of the state received above normal moisture. Temperatures were below normal for the month. Topsoil and subsoil moisture conditions were 97 percent and 91 percent adequate to surplus, respectively, at month's end. Winter wheat crop conditions were 64 percent good to excellent. Calving was 44 percent complete and lambing was 31 percent complete. Most livestock received supplemental feeding at the end of the month.

**April:** Wet, cool conditions prevailed for much of the month. Flooding was reported in some areas. Topsoil and subsoil moisture conditions were 100 percent and 98 percent adequate to surplus, respectively, at month's end. Spring planting was well behind average. Winter wheat crop conditions continued to be good to excellent. Calving and lambing were approaching completion by the end of the month. Livestock movement to summer ranges had just begun.

**May:** Wet, cool weather continued for most of May, the seventh consecutive month of above normal precipitation. Flooding was widespread and fields were saturated. Spring wheat & durum planting was at a historically slow pace. At month's end, winter wheat crop conditions were 71 percent good to excellent. Livestock movement to summer ranges was well underway, but behind the five-year average. Range and pasture feed conditions were 80 percent good to excellent.

**June:** Rain fell across the state during the first half of June. Wet fields hindered spring planting and small grain development was well behind the five-year average. Warm summer temperatures arrived in Montana the last half of the month, along with drier weather. Winter wheat crop conditions remained good to excellent. The first cutting of hay had just begun at month's end. Range and pasture feed conditions continued to be good to excellent. Nearly all cattle and sheep were moved to summer pastures.

**July:** Temperatures were slightly above normal in most areas during July. Fort Benton and Hardin both reached 103 degrees mid-month. Precipitation was limited. The hot, drier weather helped small grain development considerably, but progress remained behind the five-year average. Farmers began harvesting winter wheat at month's end. The first cutting of alfalfa and other hay was nearing completion. Range and pasture feed conditions were 80 percent good and excellent.

**August:** Hot, dry weather prevailed during the month. Winter wheat harvest was nearly wrapped up by month's end, ahead of last year and the five-year average. Harvest of other small grains was well underway. The second cutting of alfalfa and other hay was in full swing. At month's end, range and pasture feed conditions were above the five-year average. The movement of livestock from summer pastures had just begun.

**September:** Temperatures were above normal for the month and precipitation was much below normal in most areas. Topsoil and subsoil moisture conditions were below last year and the five-year average. Small grains harvest was wrapping up by month's end. The second cutting of all hay was nearly complete. Winter wheat planting was well underway. The movement of livestock from summer pastures continued. Range and pasture feed conditions remained above the five-year average at month's end.

**October:** Montana had unseasonably mild temperatures during October, with above normal rainfall in most areas. Farmers finished small grains harvest by mid-month. Sugar beet harvest was 94 percent complete at month's end, compared to last year's 89 percent and the five-year average of 79 percent. Winter wheat seeding was nearly complete. Range and pasture feed conditions were 40 percent good and excellent. Supplemental feeding of livestock was minimal. Livestock movement from summer pastures continued at a steady pace.

**November:** Temperatures were near normal during the month, with highs mostly in the upper 50's and lower 60's. Albion reached 69 degrees, while West Yellowstone had the low for the month at minus 16 degrees. Precipitation was generally below average. At month's end, winter wheat crop conditions were 37 percent good to excellent, compared to last year's 74 percent good to excellent. Most livestock were moved from summer ranges. Thirty-five percent of cattle and forty percent of sheep received supplemental feed at the end of the month.

**December:** Montana was dry and windy during December. Temperatures were above normal, with highs in the upper 40's and mid 50's. Some areas in the central and eastern parts of the state reached 60 degrees. West Yellowstone had the low for the month at minus 32 degrees. Due to a lack of snow cover, winter wheat crop conditions were 30 percent good to excellent at month's end, compared to 72 percent good to excellent last December. Seventy-two percent of cattle and 69 percent of sheep received supplemental feed at the end of the month.

## Climatological Data Annual and Growing Season Precipitation and Frost-Free Days, 2010-2011

1/ Farms are places that had or would have had annual sales of agricultural products of \$1,000 or more.

## Agriculture Remains Montana's Number One Industry in 2011

A comparison of selected Montana industries shows Agriculture continues to outpace all other industry sectors, although most sectors saw increased activity. The 2011 value of crop production increased to \$2.1 billion, an increase of \$342.8 million or 19 percent above 2010. The value of livestock increased in 2011 to \$1.4 billion, up \$156.5 million from 2010. Net government payments decreased 9 percent in 2011 to \$299 million, down \$28.5 million from 2010.

When comparing major industrial sectors in Montana, receipts were mostly higher than a year ago. Agriculture showed a 14 percent increase, up \$470.8 million from 2010. Mining showed a 15 percent decrease, down \$219.3 million from the previous year. Gas & Oil showed an increase of 15 percent, up \$304.9 million from 2010. Non-residential Travel showed an increase of 14 percent in 2011, up \$274.6 million from 2010. Wood and Paper Products decreased 3 percent or \$11 million below 2010.

1/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. 2/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 3/ Sheep and Lamb moved to all other live-stock beginning in 2011. 1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. 2/No longer published. -- Not available.
