General

According to the National Agricultural Statistics Service in Alabama, there were 5.9 days suitable for fieldwork for the week ending Sunday, July 31, 2022. Precipitation ranged from no rain to 4.3 inches. Average high temperatures ranged from the high 80s to the mid 90s. Average low temperatures ranged from the low 70s to the high 70s.

Crops

Much of the state received a significant amount of rain throughout the week while the rest of the state experienced hot, dry weather. Crop conditions and soil moisture for much of the state continued to remain mostly good and adequate. Corn continued to mature, and harvest began in areas where moisture levels allowed. Producers remain concerned that rains were not timely enough this season to avoid some amount of yield loss. Soybeans had largely bloomed and continued to rapidly set pods. Cotton was reported to mostly be in good condition and continued squaring and setting bolls. Most producers had cut hay for the second time, with some beginning a third cutting. Peanuts pegging progressed well throughout the week. Reporters noted a more than usual number of reports of wildlife damage to crops.

Livestock and Pastures

Cattle continued to be in mostly good condition, although there were some reports of livestock stress due to high temperatures. Pasture conditions remained mostly good this week.

Crop Progress for Week Ending 07/31/22

Crop stage	Prev year	Prev week	This week	5 Year avg
	(percent)	(percent)	(percent)	(percent)
Corn - Mature	45	37	55	54
Corn - Harvested	0	NA	1	0
Cotton - Squaring	93	89	94	91
Cotton - Setting Bolls	63	65	79	67
Hay - 2nd Cutting	78	85	90	84
Peanuts - Pegging	86	78	85	90
Soybeans - Blooming	82	76	79	81
Soybeans - Setting Pods	53	45	57	56
