CROP PROGRESS AND CONDITION WEEK ENDING SEPTEMBER 3, 2017

AGRICULTURAL SUMMARY: Cotton bolls opening was 73 percent complete, cotton defoliated was at 15 percent complete and cotton harvested was at 2 percent complete, according to the Mountain Regional Field Office of the National Agricultural Statistics Service, USDA. Cotton conditions were rated mostly good to excellent. Alfalfa conditions were rated mostly excellent to good, depending on location last week, with harvesting taking place on over two-thirds of the alfalfa acreage across the State. Last week, Arizona growers shipped potatoes. Range conditions were good, forage was mostly plentiful, and enough tank water was reported in the Northwestern part of the State. Defoliation spraying season started in the Southeastern part of the State. In Arizona, pasture conditions were rated mostly good to excellent. All but 9 of the 51 weather stations reported above normal temperatures last week, ranging from 5 degrees below normal to 9 degrees above normal across the entire State. Temperatures ranged from a low of 45 degrees at Grand Canyon to a high of 120 degrees at Bullhead City. Eighteen weather stations received some precipitation. The least amount of precipitation was reported at Betatakin and Prescott at 0.01 inches, and the most precipitation was reported at Kingman at 0.45 inches. Teec Nos Pos year to date precipitation was the highest percent of normal in the State, while Bonita was the driest.
