## USDA Surveying Sheep and Goat Operations

**Little Rock, Arkansas** – Starting in late December, the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will measure sheep and goat inventories and wool and mohair production during a nationwide survey. Arkansas operators surveyed will be asked to provide information about their sheep and goat inventories, counts of lambs and kids born during 2024, and production and prices received for wool and mohair. In Arkansas, NASS will contact approximately 340 producers to request their responses to the survey.

“Interest in sheep and goat data continues to grow with increased diversification in agriculture and consumer demands,” said Michael Klamm, Acting Director of the NASS Delta Regional Field Office. “The Sheep and Goat Report gives producers the opportunity to convey the latest information on conditions and trends in the industry.”

To make it as easy as possible for producers to participate in the survey, NASS offers the option of responding online at [agcounts.usda.gov](https://agcounts.usda.gov), by telephone, or by mail or fax. If a producer does not respond by Monday, December 30, 2024, a representative from the National Association of State Departments of Agriculture (NASDA) may reach out to schedule an interview. The results of this survey will be available in aggregate form only, ensuring that no individual operation or producer can be identified, as required by federal law.

“Accurate data on sheep and goat inventory and production is a significant decision-making tool for USDA and the industry to be more responsive to domestic and international markets and consumer needs,” stated Klamm. “The information can also help create public appreciation for the many benefits of U.S. sheep and goats and their needed products.”

NASS will publish the survey results January 31, 2025, in the *Sheep and Goats* report. This, and all NASS reports, are available online at <https://www.nass.usda.gov/Publications/>. For more information, please contact the NASS Delta Regional Field Office at (800) 327-2970.
