STATISTICS SERVICE

## CALIFORNIA NAVEL ORANGE FORECAST

The initial 2004-05 Navel orange forecast is a record high 92.0 million (37.5-pound) cartons, 21 percent above last season's crop of 76.0 million cartons. Of the total forecast, 90.0 million cartons are estimated to be in the Central Valley. Survey data indicated an average fruit set of 392 oranges per tree, with a September 1 diameter of 2.495 inches, the highest September 1 diameter on record.

### SURVEY HISTORY

A Navel Orange Objective Measurement Survey has been conducted in the Central Valley since the 1984-85 crop year. The data from the first two years were used for research purposes in developing crop estimating models.

### SURVEY SAMPLE

A sample of 526 Navel orange groves was randomly selected proportional to county and variety bearing acreage. Once a grove is randomly chosen and permission is granted, two trees are randomly selected. Trunk and branch measurements, along with fruit counts, are then made on each tree.

## CALIFORNIA NAVEL ORANGE AVERAGE SET PER TREE BY COUNTY

Year <sup>1/</sup>	Madera	Fresno	Tulare	Kern	Central Valley
1986-87	347	637	541	504	544
1987-88	272	236	402	354	361
1988-89	403	518	585	594	570
1989-90	491	606	501	614	541
1990-91	655	476	505	479	498
1991-92	---	---	---	---	---
1992-93	402	501	569	654	572
1993-94	498	433	427	513	452
1994-95	300	356	450	529	457
1995-96	372	428	467	479	460
1996-97	285	280	376	388	359
1997-98	191	292	424	477	407
1998-99	378	343	391	377	380
1999-00	290	390	450	545	458
2000-01	314	485	293	392	347
2001-02	462	201	260	299	264
2002-03	413	289	465	592	466
2003-04	301	524	305	388	358
2004-05	192	432	356	465	392

<sup>1/</sup> Data for 1990-91 and 1998-99 (freeze years) were not used in forecasting the 2004-05 crop. No Objective Measurement Survey was conducted for the 1991-92 season due to lack of funding.

1/ Data for final utilized production and bearing acres are from the orange industry. Acreage data are the number of acres with trees of bearing age (more than four years old). Some fruit could have been picked from trees younger than four years old, but not enough to consider the tree full-bearing.

2/ Data for 1990-91 and 1998-99 (freeze years) were not used in forecasting the 2004-05 crop. An Objective Measurement Survey was not conducted for the 1991-92 season due to lack of funding.

3/ California Agricultural Statistics Service preliminary forecast for 2004-05.

4/ Size data for 1984-85 through 1993-94 are from the Navel Orange Administrative Committee, while the data since 1993-94 are from the orange industry.
