## **Delaware corn and soybean production** down from previous year

DOVER, DE – Delaware corn production for grain is forecast at 27.9 million bushels, down 12% from 2021, according to Shareefah Williams, state statistician of the USDA's National Agricultural Statistics Service (NASS), Maryland Field Office. Based on conditions as of August 1, yields are expected to average 172 bushels per harvested acre, down 12 bushels from 2021. Area harvested for grain is forecast at 162 thousand acres, down 6% from 2021.

Soybean production for beans is forecast at 7.04 million bushels, down 10% from 2021. Based on conditions as of August 1, yields are expected to average 46.0 bushels per harvested acre, down 5 bushels from 2021. Area harvested for beans is forecast at 153 thousand acres, unchanged from 2021.

The forecasts in this report are based on conditions as of August 1. Any potential impacts from severe weather that occurred after August 1 will be reflected in future reports.
