

2005-06 SEASON CITRUS HIGHLIGHTS

U.S. AND FLORIDA PRODUCTION

U.S. citrus utilized production for the 2005-06 season totaled 11.6 million tons, virtually unchanged from the 2004-05 season but 35 percent lower than the record high production of 17.8 million tons for the 1997-98 season. Florida accounted for 68 percent of total U.S. citrus production; California totaled 28 percent, while Texas and Arizona produced the remaining 4 percent.

Production of **Florida** citrus in the 2005-06 season was 174.8 million boxes, down 40 percent from the 291.8 million boxes in the 2003-04 season. The primary reason for the reduced crop was fruit loss due to Hurricane Wilma. The all orange crop production, at 147.9 million boxes, was the lowest since the 139.8 million boxes in 1991-92. Valencia orange production was three percent higher than in 2004-05, while early-midseason-Navel oranges production was five percent lower. Navel production, at 3.8 million boxes, was 52 percent higher. Navels, primarily a fresh use crop, comprised 58 percent of the total early-midseason-Navel fresh shipments. Grapefruit utilized production in Florida, at 19.3 million boxes, was up 51 percent from the 2004-05 season. Otherwise, it was the lowest since the 1941-42 seasons' 19.2 million boxes. Increases in production of specialty fruit were recorded for all types except tangelos.

CITRUS BOX WEIGHTS

Approximate net weight by fruit type and states

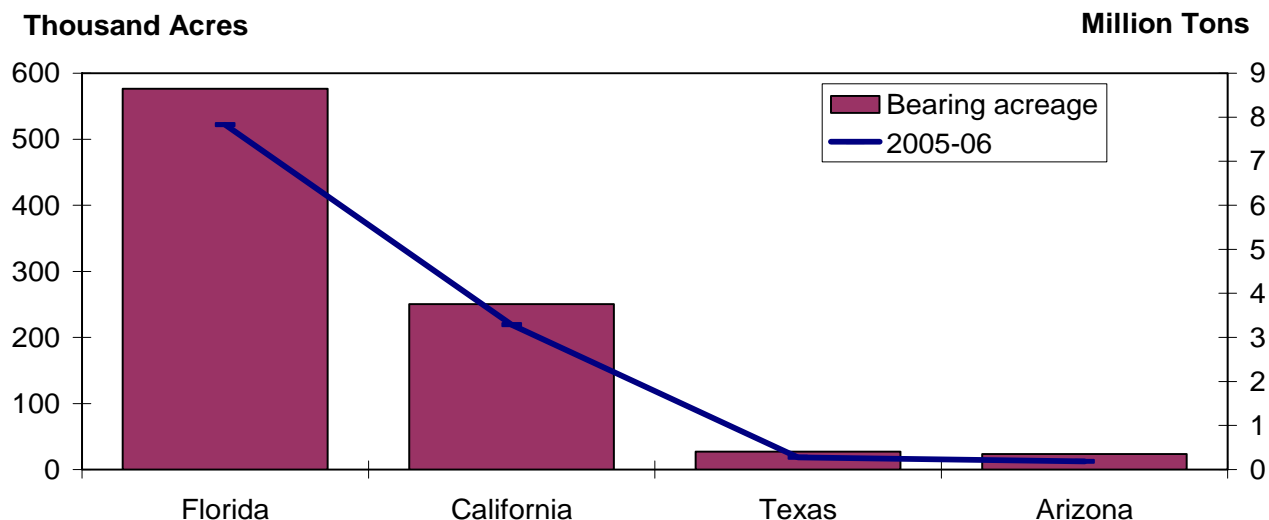

State	Orange	Grapefruit	Tangerine	Lemon	Lime
	<i>Pounds</i>				
FL	^{1/} 90	85	95	90	88
CA	75	67	75	76	--
TX	85	80	--	--	--
AZ	75	67	75	76	--

^{1/} Includes Temples and tangelos at 90 pounds.

TREE CENSUS

The biennial Tree Census Survey was completed in July 2006. Nearly all blocks required a visit to update the records. Florida's bearing citrus acreage has been declining since reaching 815,100 in the 1996-97 season and is now at 576,400. All orange bearing acreage, at 491,000, is the lowest since the 1992-93 season. Grapefruit bearing acreage, now at 59,800, is the lowest since the survey began. Specialty fruit, which includes Temples, tangelos and tangerines, stands at 25,600 and is the lowest since the 1990-91 season.

LEADING CITRUS STATES: BEARING ACREAGE AND PRODUCTION, CROP YEAR 2005-06

PRODUCTION BY AREAS AND COUNTIES

Four of five Florida commercial citrus production areas recorded increases in 2005-06 from the prior season. The Indian River and Western areas were up the most at 63 percent and 47 percent respectively. The Southern area, the only area down, was 48 percent lower. Hurricane Wilma passed directly over the Southern citrus producing area causing a major reduction of the citrus crop.

Production increased in 19 of the 30 counties. Polk County led in total production with 32.5 million boxes, followed by Highlands (23.8 million boxes), Desoto (20.4 million boxes), Hendry (15.8 million boxes), and Hardee (14.9 million boxes). These top five counties produced 61 percent of the citrus crop.

Polk County produced the most oranges (27.7 million boxes) followed by Highlands (21.8 million boxes), and Desoto (20.0 million boxes). St. Lucie, at 5.7 million boxes of grapefruit, remained the top grapefruit producer followed by Indian River at 5.3 million boxes. Together the two counties accounted for 57 percent of the state's grapefruit crop.

The majority of the specialty crops (tangerines, Temples, and tangelos) were concentrated in the ridge counties of Polk, Lake, and Highlands. Polk led in production of tangelos and tangerines, while Highlands was the top producer of Temples.

VALUE

The value of the 2005-06 U.S. citrus crop was up 16 percent from the 2004-05 season, to \$2.68 billion (packinghouse-door equivalent). Total value of production was higher for all types of citrus, except grapefruit. Orange value of production increased 20 percent, while grapefruit value decreased 4 percent. Tangerine value of production increased 8 percent. Lemon value of production increased 28 percent. Tangelo and Temple values were up 43 percent and 22 percent, respectively.

Florida's \$1,043.3 million preliminary on-tree value of the 2005-06 citrus crop was up 38 percent from the 2004-05 season's revised value of \$754.2 million, and the highest since the 1999-00 season value of \$1,108.5 million. On-tree values were higher for all varieties of citrus except colored grapefruit and Honey tangerines. Price-per-box was higher for all varieties except white and colored grapefruit and Honey tangerines.

FLORIDA CITRUS:

Value of sales on-tree, crop years 1996-97 through 2005-06

Crop year ^{1/}	Value	Crop year ^{1/}	Value
	<i>1,000 dollars</i>		<i>1,000 dollars</i>

^{3/} Preliminary.

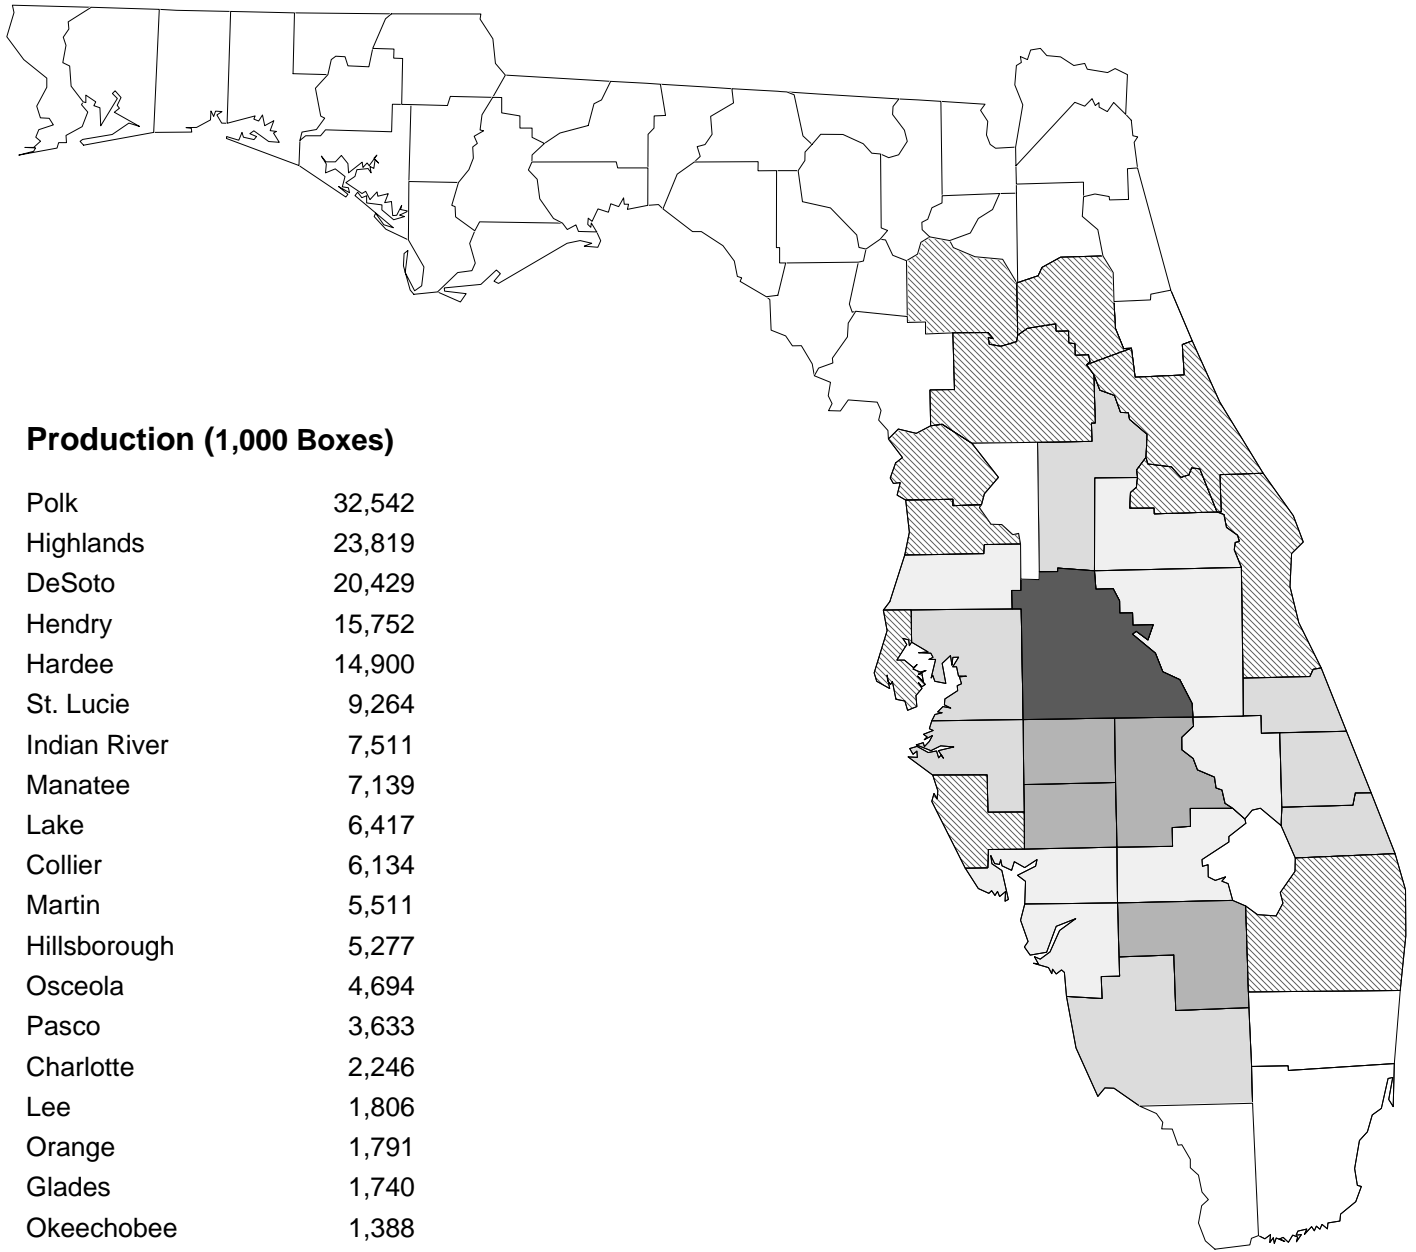

FOREIGN EXPORTS AND FROZEN CONCENTRATE

A total of 13.3 million gallons of FCOJ (Frozen Concentrated Orange Juice), and 2.7 million gallons of FCGJ (Frozen Concentrated Grapefruit Juice) were exported in the 2005-06 season.

The final FCOJ yield, reported by the Florida Department of Citrus, was higher than the previous season for all oranges (1.62745 gallons per box), lower for early-midseason fruit (1.52690), and higher for late oranges (1.75268). The final tangerine yield (FCTJ) was up (1.52520) and the final grapefruit yield (FCGJ) was down (1.21432).

The price per box was higher than the previous season for all varieties except colored grapefruit. The price per pound solids was higher for all varieties.

^{1/} 2005-06 preliminary.

^{2/} Estimates discontinued.

FLORIDA CITRUS HARVESTING SEASON

AVOCADOS

Production of avocados decreased from the previous season by 640,000 bushels, or 57 percent. This production of 480,000 bushels is the smallest crop since the 1993-94 season. Bearing acreage is estimated at 5,300 acres, down from last season. Even with the price per bushel up 82 percent from the previous season, the total value of the crop was down at \$11,280,000. More than two dozen minor tropical fruits are grown in South Florida. These varieties, sold mostly on the local fresh market, include annona, banana, carambola (star fruit), Barbados cherry, coconut, guava, jaboticaba, jacfruit, key lime, kumquat, litchi, longan, mango, monstera, papaya, passion fruit, plantain, pummelo, sapodilla, black sapote, mamey sapote, white sapote, and wax jambu.

FLORIDA AVOCADOS

Trees, acreage, yield, production, utilization, season average price, and value, crop years 1996-97 through 2005-06

Crop year	Bearing trees	Bearing acreage	Yield per acre	Utilization of production				On-tree	
				Total	Certified shipments	Local fresh use	Processed	Price per bushel	Value of production
	<i>1,000 trees</i>	<i>1,000 acres</i>	<i>Bushels</i>	<i>1,000 bushels</i>				<i>Dollars</i>	<i>1,000 dollars</i>
