

September 2012

Coffee Marketings Down 14 Percent for 2011/12 Season

In cooperation with

Hawaii coffee marketing for 2011/12 is estimated at 7.6 million pounds, 14 percent less than the 2010/11 season. Total acreage and harvested acreage remained unchanged at 8,000 and 6,300, respectively. Yields averaged 1,210 pounds per acre, down 190 pounds from the 2010/11. The Statewide farm price for coffee averaged \$4.15 per pound (parchment equivalent basis) for the 2011/12 season, 9 percent above the 2010/11 season of \$3.80 per pound. The farm revenue for coffee is estimated at \$31.5 million (parchment equivalent basis) for this season, 6 percent below last season. Coffee Berry Borer (CBB) remains a major concern for the coffee industry. Growers practiced prevention and sanitation to limit the insect spread by learning new management techniques. Harvesting and grading coffee was challenging. Cherry to parchment coffee ratio was higher this season as more cherry was needed to make parchment. Weather conditions were very dry for the 2011/2012 season also affecting the crop. ■

2011/12⁵	830	8,000	6,300	1.2	7,600	4.15	31,540	6,100

¹ Coffee harvesting occurs throughout the year in Hawaii. The main harvest normally begins in late summer and extends to the early part of the following year. ² Average yields based on parchment equivalent marketings and harvested acreage. ³ Expressed in parchment equivalent pounds. Coffee marketed in cherry form was converted to an equivalent parchment weight and added to parchment marketings. ⁴ Represents an average farm price for parchment equivalent sales. Obtained by dividing farm revenues from the sale of cherry and parchment coffee by total marketings (parchment equivalent basis). ⁵ Preliminary.
