2002 YEAR-TO-DATE FRESH SALES LOWER

Hawaii fresh papaya utilization is estimated at 3.7 million pounds for December 2002, down 9 percent from last month, but 14 percent above last year. Year-to-date fresh sales were 24 percent lower than the same 12-month period of 2001.

Area in crop totaled 2,075 acres, down 4 and 19 percent from September and last December, respectively. Harvested area, totaling 1,495 acres, was 1 percent lower than September and 18 percent lower than a year ago.

December weather conditions were mostly favorable over major papaya producing areas. Soil moisture was adequate in non-irrigated orchards. Cool temperatures, short daylength, and drier than normal conditions, has slowed fruit maturation.

Papaya growers are expected to receive an estimated 26.0 cents per pound for fresh fruit in December. This is unchanged from last month, but 10 percent (2.9 cents) lower than a year ago.
