USDA SURVEYING SHEEP AND GOAT OPERATIONS

Springfield, Illinois -- December 2024 – Starting in late December, the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will measure sheep and goat inventories and wool and mohair production through a nationwide survey. The agency will contact over 500 producers across Illinois.

“Interest in sheep and goat data continues to grow with increased diversification in agriculture and consumer demands,” said Illinois State Statistician Mark Schleusener. “The Sheep and Goat Survey gives producers the opportunity to report the latest information on conditions and trends in the industry.” Illinois operators surveyed will be asked to provide information about

their sheep and goat inventories, counts of lambs and kids born during 2024, and production and prices received for wool and mohair.

“Accurate data on sheep and goat inventory and production is a significant decision-making tool for USDA and the industry to be more responsive to domestic and international markets and consumer needs. The information can also help create public appreciation for the many benefits of U.S. sheep and goats and their needed products,” added Schleusener.

To make it as easy as possible for producers to participate in the survey, NASS offers the option of responding online, by telephone or by mail. The results of this survey will be available in aggregate form only, ensuring that no individual operation or producer can be identified, as required by federal law. NASS will publish the survey results January 31, 2025, in the Sheep and Goats report available online at www.nass.usda.gov/Publications.

For assistance with the survey, or for more information, contact the NASS Heartland Regional Field Office at (800) 551-1014 or nassrfohlr@usda.gov.
