### ~ ~ ~ About the Cover ~ ~ ~

"Red Barn & Wheat Field" was taken by Natalie Schuler from Roann, Indiana. This is Natalie's first year in 4-H and she is nine years old. Natalie said, "My aunt bought me a camera and taught me how to use it. I enjoy taking pictures to remember that event."

"Big Jake" was taken by Elese Hacker from New Castle, Indiana. Elese is a five year member of 4-H and is thirteen years old. The bull can be found on her grandparents farm. Elese enjoys the challenge of capturing photos that are show worthy. She likes to use her camera lens to turn the ordinary into extraordinary.

The photograph on the back of the cover is named "Best Buds", and was taken by nine year old Saige Dunafin of La Grange, Indiana. Saige is a first year 4-H member, and says she likes to capture memories so that she can look at them over and over again.

### Acknowledgments

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2005 Indiana State Fair.

---

Randy Woodson,  
Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

**Greg Preston  
Director**

In this issue of the 2005-2006 Indiana Agricultural Statistics Annual Summary you will find information about Indiana's agriculture. The data contained in this book provides the most accurate, reliable and unbiased information regarding Indiana's agricultural production. Our goal for this publication remains unchanged. We hope to help the public become better acquainted with and understand the current situation of Indiana's farming community. Hoosier crop farmers should take pride in the fact that Indiana continues to rank near the top in the production of corn, soybeans, popcorn, tobacco, blueberries, peppermint, spearmint, processing tomatoes, and vegetables for processing. Indiana livestock producers helped put Indiana's rank at the top for hogs, chickens, eggs, and turkeys raised. The information in this annual summary is collected from farmers using surveys throughout the year. The voluntary response and cooperation of Indiana farmers, agricultural business firms, USDA Farm Services Agency County staff, Purdue University County Extension Staff, the NASDA Enumerators, and others across the state makes this annual summary possible. As always, the Indiana Field Office of USDA's National Agricultural Statistics Service pledges confidentiality of all individual reports or business data.

We are again pleased to feature the photography talents of 24 individual 4-H members in Indiana's 2005-2006 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2005 Indiana State Fair, provide a glimpse of the wide variety of Indiana's agriculture from future farmers perspective. We are grateful to all of the 4-H members who submitted their photos for publication.

This is the 80th edition, which documents Indiana Agriculture in 2005, and is published by the cooperative efforts of USDA's National Agricultural Statistics Service and Purdue University Agricultural Research Programs. The Federal/University cooperative partnership has existed since 1925 and continues to enhance agricultural research programs with State specific statistical projects. Some of those projects include Timber Price Survey, Fruit Acreage, Soybean Growers, Corn Ear Rot & Mycotoxin Analysis, Soybean Phytophthora Root Rot & Cyst Nematode Sampling, and Grain Marketing Analysis. Results of these special research efforts are mostly published by the individual research programs and generally not a part of this publication.

Sincerely,

Greg Preston  
Director  
USDA, NASS, Indiana Field Office

# FARM INCOME

## CASH RECEIPTS

Indiana farmers received \$5.58 billion in cash receipts from farm marketings in 2005, 8 percent below 2004. Cash receipts from crops were down 12 percent, and receipts for livestock were down 1 percent from the previous year. Marketings of crops at \$3.54 billion, accounted for 63.4 percent of the total cash receipts in 2005 while livestock receipts, at \$2.04 billion, accounted for the remaining 36.6 percent. In the previous year crop receipts accounted for 66.1 percent and livestock 33.9 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2005 and amounted to \$1.51 billion. Soybeans were second at \$1.50 billion and meat animals were third with \$1.01 billion. Dairy became the fourth leading contributor with \$503 million and Poultry and eggs follows with \$494 million. These five commodity groups accounted for almost 90 percent of the 2005 cash receipts.

### 2005 Indiana Cash Receipts

1/ Includes fruits and nuts, tobacco and other miscellaneous crops.

<sup>1/</sup> Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

<sup>2/</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

## U.S. GOVERNMENT PAYMENTS, BY PROGRAM INDIANA, 2001-2005 1/

Program	2001	2002	2003	2004	2005
	<u>Thousand Dollars</u>				
Production Flexibility Contracts	162,777	145,198	(9,979)	(143)	<b>(60)</b>
Direct Payments 2/	---	13,933	317,368	232,556	<b>233,838</b>
Counter-cyclical Program Payments	---	---	27,053	23,742	<b>192,993</b>
Loan Deficiency Payments	407,830	77,032	2,631	208,965	<b>333,384</b>
Marketing Loan Gains	40,249	22,820	746	5,633	<b>17,450</b>
Commodity Certificate Exchange Gains	581	141	1	2,426	<b>8,444</b>
Milk Income Loss Payments 3/	---	13,609	16,138	3,025	<b>277</b>
Tobacco Transition Payments 4/	---	---	---	---	<b>20,675</b>
Conservation 5/	42,198	50,538	50,209	54,185	<b>67,995</b>
Supplemental Funding 6/	272,093	11,021	42,159	1,756	<b>39,014</b>
Miscellaneous 7/	130	28	(39)	(90)	<b>(44)</b>
Total	925,859	334,320	446,286	532,055	<b>914,166</b>

1/ Amounts include only cash payments made directly to farmers.

2/ Direct Payments are authorized by the Farm Security and Rural Investment Act of 2002 for 2002 through 2007 crops. Direct Payments for the 2002 crops are reduced by the amount of fiscal year 2002 payment received under Production Flexibility Contracts. The Act also increases the number of crops authorized to receive Direct Payments.

3/ Program authorized by the Farm Security and Rural Investment Act of 2002.

4/ Payment includes both the CCC payments to quota holders and producers and the third party payments to quota holders and producers who opted for the lump sum payment option.

5/ Includes amount paid under Conservation Reserve, Agriculture Conservation, Emergency Conservation, and Great Plains Program.

6/ Ad Hoc and emergency programs provided by the Agricultural Risk Protection Act of 2000, Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act 2001 and Agricultural Economic Assistance Act 2001. Some of these programs include; Crop Disaster Program, Dairy Disaster Assistance Program, Livestock Emergency Assistance program, Quality Losses Program, and Tobacco Disaster Assistance Program

7/ Miscellaneous Programs include; Forestry Incentive Annual, Dairy Indemnity, Interest Payments, Disaster Program Payments, Payment Limitation Refund, Noninsured Assistance, Disaster Reserve, and Environment Quality Incentives.

State	0	0	30	186	374	609	744	683	448	235	36	0	3,345

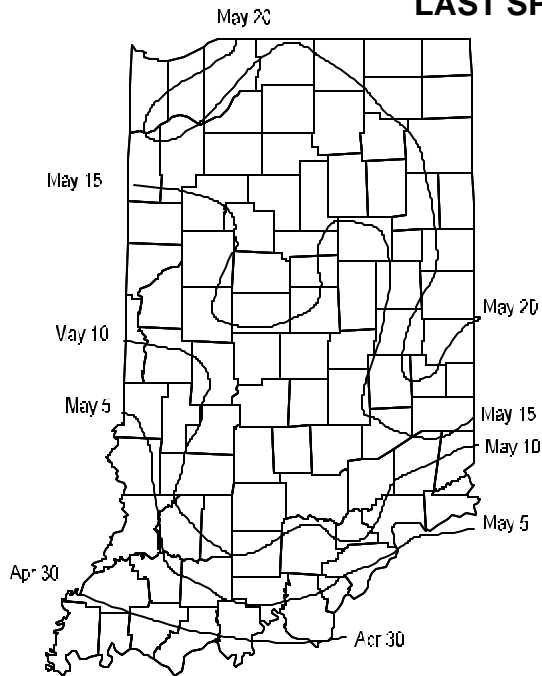

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60°F resulted in 84 GDD. The basic formula is:  $1/2 (\max T - 50) + 1/2 (\min T - 50) = \text{GDD for one day}$ . The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

## CROP HIGHLIGHTS

**ACREAGE:** Indiana's five major field crops totaled 12.3 million acres during 2005, down 1 percent from the 2004 planted acreage. Corn acreage for harvest was 4 percent above a year ago, while soybean acreage for harvest decreased 3 percent. Winter wheat harvested acreage was down 23 percent from a year ago and all hay harvested acreage fell 2 percent below the 2004 level. Oat acreage for harvest decreased 25 percent from the 2004 level. Other crops showing harvested acreage changes were processing tomatoes down 5 percent, snap beans for processing down 4 percent, and popcorn down 11 percent. In addition, tomatoes for fresh market harvested acreage decreased 12 percent, cantaloupes rose 7 percent, fresh market sweet corn decreased 4 percent, and watermelons increased 1 percent.

**YIELDS:** Planting of corn and soybean fields got off to an early start during the 2005 season with near ideal planting conditions during much of April and May. A considerable amount of tillage and fertilizer application was done the previous fall which helped save time during the spring. By May 1st, 51 percent of the intended corn acreage was planted and 11 percent of the soybean acreage was planted. Corn planting was on a pace well ahead of the 5-year average throughout the spring. As of May 22<sup>nd</sup>, 95 percent of the corn acreage was planted and 73 percent of the soybean acreage was planted. Above average temperatures and a shortage of precipitation during June and the first two weeks in July caused great concern over deteriorating crop conditions. Some much needed precipitation came to the state in mid July just in time to help with pollination and grain fill in corn and setting of pods in soybeans. Crops dried down

"A Delicious Treat"  
 Photographer -- Julie Saucerman  
 Age 10, Monrovia, IN

and rapidly advanced toward maturity with harvest really getting underway in mid-September. By mid-November, corn harvest was 96 percent complete and 99 percent of the soybean acreage was harvested. Many farmers had better than expected yields for both corn and soybeans. In fact, the state average corn yield of 154 bushels per acre was the third highest on record. The average yield for soybeans was 49 bushels per acre, down 2.5 bushels from the previous year. Winter wheat had a record yield of 72 bushels per acre, up 10 bushels from last year. Oat yield averaged 69 bushels per acre, 6 bushels lower than the 75 bushels per acre set in 2004 and 11 bushels per acre below the record high yield of 80 bushels per acre established in 2001. All hay yield, at 3.18, was 0.31 tons below the 3.49 tons per acre in 2004. The average yield for popcorn was 4,350 pounds per acre, 200 pounds per acre less than the 2004 average.

**PRODUCTION:** Corn produced during 2005 was 888.6 million bushels, 4 percent below the 2004 level of 929.0 million bushels. Soybean production was 263.6 million bushels, 7 percent below the 284.3 million bushels produced a year earlier. Winter wheat production, at 24.5 million bushels, was 10 percent less than the 27.3 million bushels harvested in 2004. Popcorn production totaled 326.3 million pounds, 15 percent below the 2004 level. Oat production of 621 thousand bushels was 31 percent below the 900 thousand bushels produced in 2004. All hay production, at 2.1 million tons, fell 10 percent. Peppermint production decreased 17 percent, while spearmint production rose 13 percent. Apple production decreased 17 percent to 50.0 million pounds. Blueberry production totaled 3.5 million pounds, a 13 percent increase from the previous year.

# CHEMICAL USAGE

## INDIANA PESTICIDE USAGE

Herbicides were used on 97 percent of Indiana's 5.9 million **CORN** acres during 2005 while insecticides were applied to 41 percent of the acreage. Atrazine, commonly known as Atrazine 80, Bicep II Magnum, and Guardsman, was Indiana's most widely used herbicide, applied to 80 percent of the state's acreage. S-Metolachlor, known as Bicep II Magnum, Cinch, and Sequence, was applied to 38 percent of the acreage.

### HERBICIDE AND INSECTICIDE USAGE CORN, INDIANA, 2005

	Acres Planted	Percent	Total	Percent of
<b>Corn</b>				
Herbicide	5,900	97	14,136	108
Insecticide	5,900	41	722	55

## LIVESTOCK HIGHLIGHTS

The total value of the four major species of livestock and poultry on Indiana farms January 1, 2006 (December 1, 2005 for swine and chickens) amounted to \$1,319.9 million, up 11 percent from a year earlier.

**CATTLE** inventory numbers, at 900,000, increased 6 percent from January 1, 2005 and value per head, at \$1,060 was \$130 above the previous year. Total cattle inventory value, at \$954.0 million, increased 21 percent from the \$790.5 million last year. Cows and heifers that have calved totaled 380,000 head, down 1 percent from a year earlier. Of this total, 222,000 were beef cows, down 3 percent from the previous year; and 158,000 were milk cows, up 2 percent from the previous year.

**HOG AND PIG** numbers (December 1, 2005), at 3.25 million, were up 2 percent from a year earlier. The average value per head decreased from \$110.00 in 2004 to \$94.00 in 2005. This lowered the total

inventory value to \$305.5 million, 13 percent below a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2005.

Total **SHEEP** inventory, at 50,000 head, for January 1, 2006 remained the same, compared to a year earlier. Breeding sheep totaled 46,000 head. Average value per head at \$190.00, was up \$8.00 from 2005. Total inventory value at \$9.5 million was 4 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2005, at 31.8 million birds, was up 4 percent from last year. With this inventory, Indiana held on to third place in the nation for total chickens, excluding broilers, and remained in third position for hens and pullets of laying age (24.7 million). The total value of the chicken inventory was \$50.9 million, up 52 percent from 2004. The value per bird increased \$0.50 from the previous year to \$1.60.

# HOGS AND PIGS

The total pig crop in 2005 was 3 percent below the pig crop in 2004. Sows farrowed during the year decreased 3 percent from the previous year, while litter rates dropped slightly at 8.89. A \$0.10 increase in average price per hundredweight brought a 5 percent increase in cash receipts for 2005. Gross income of \$772 million (cash receipts plus value of home consumption) increased 5 percent from a year earlier.

## SHEEP AND LAMBS

The number of sheep and lambs marketed during 2005 decreased 4 percent to 37,500 head. The total pounds of sheep and lambs marketed was 2 percent below the 2004 level. Cash receipts totaled \$2.82 million, up 2 percent from \$2.77 million in 2004. Gross income (cash receipts plus value of home consumption) totaled \$3.22 million in 2005 compared with \$3.14 million a year earlier. Sheep averaged \$43.40 per cwt. and lambs averaged \$108.00 per cwt. during 2005.

Lambs saved in 2005, at 42,000 head, was down 7 percent from the previous year. The number of ewes one year old and older on hand January 1, 2006 was down 1 percent from 2005. Lamb crop per 100 ewes one year old and older was 127 during 2005, down 4 percent from a year earlier.

Wool production decreased 2 percent during 2005 to 270,000 pounds. Sheep and lambs shorn totaled 42,000 head with an average fleece weight of 6.4 pounds. Total value of shorn wool was \$46,000, down 21 percent from a year earlier and averaging 17 cents per pound.

# POULTRY AND OTHER LIVESTOCK

Total value of production from eggs was \$192.8 million in 2005, down 34 percent from a year earlier. The average number of layers at 23.6 million was slightly above 2004. The average rate of lay was slightly below 2004, at 265 eggs per layer, resulting in a virtually unchanged total egg production during 2005. The average price received by producers for eggs was 36.9 cents per dozen compared with 56.0 cents a year earlier.

# COUNTY HIGHLIGHTS

## COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 11,000 farm operators following the 2005 harvest season. In addition to these data are selected items of interest from the 2000 U.S. Population Census, 2002 Census of Agriculture, and 2004 Cash Receipts information from the Bureau of Economics Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana county while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2002 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

### STATE DATA

2000 Census Population	6,080,485	2004 Cash Receipts	\$6,213,924,000

# CUSTOMER SERVICE

## REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

### Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

#### NASS

<http://www.nass.usda.gov/>

Today's reports will be listed on the screen. To select from other reports, click on the **More** button next to "Today's Reports from NASS". You will then be redirected to another screen to make your selections.

#### Indiana Field Office

[http://www.nass.usda.gov/Statistics\\_by\\_State/Indiana/](http://www.nass.usda.gov/Statistics_by_State/Indiana/)

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. For a list of available reports, click on **Indiana Publications**, or choose from the drop down menu below "Indiana Publications", and then click on the yellow **go** button.

Data for other States can be accessed by choosing the desired State under the **Statistics by State** button on the bottom left side of the screen.

### Internet Published Estimates Database:

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produce an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

### NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

### NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies. Please call **1-800-727-9540**.

### E-Mail Subscriptions:

**NASS Reports:** Subscriptions to NASS reports are offered free through our e-mail service. From the right side of the NASS Home page, select National under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive and they will be delivered as soon as they are published.

**Indiana Field Office Reports:** State specific reports are also available free via e-mail. From the right side of the NASS Home page, select State under the heading **Receive reports by E-mail**. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name and e-mail address, and then click on **Submit**. Or, on the right side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on **Submit**. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.

### Printed Report Subscriptions:

Printed copies of **NASS** reports are available for a fee to subscribers. To subscribe for national reports, call toll-free **1-800-999-6779** and ask for a list of reports and prices.

The **Indiana Field Office** also offers subscriptions to the following printed reports by completing the form on the next page and mailing it to our office, or by calling **1-800-363-0469**.

**Indiana Agriculture Report** - A comprehensive farm newsletter that covers planting reports, monthly and annual crop production, grain stocks, cattle, hogs, milk output, farm income and expenses, economic trends, etc.

**Weekly Crop & Weather** - Issued each Monday during the growing season, this report follows crop progress and condition, and provides weekly temperature and precipitation data.

**County Level Data** - An annual report providing county level data for the top crops in Indiana.

**Indiana Agricultural Statistics Bulletin** - Our annual summary, available each fall, contains data for rankings, farm income, weather, crops, livestock, prices, county crop and livestock data, etc.
