~ ~ ~ About the Cover ~ ~ ~

"Grain Bins in the Sunset" was taken by sixteen year old Kaylee Krom from Knox, Indiana and appears on the front cover. Kaylee is an eight year 4-H member. She enjoys doing creative things like drawing and photography. She was able to capture the sun setting on her grandparent's grain bins.

The photograph on the back cover, "God's Country", was taken by twelve year old Aubrey Warnock from Converse, Indiana. She is a four year member of 4-H. Aubrey said this picture is of a local farmer planting his spring 2019 crop. She thought the sunset would make the perfect backdrop.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2019 Indiana State Fair.

Karen Plaut, Glenn W. Sample Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

John Baugh, Director of Agricultural Services and Regulations

#### Dedicated in the memory of......

#### Ralph Gann and Earl Park

In this 2019-2020 annual issue of the "Indiana Agricultural Statistics" publication you will find information about Indiana's entire agricultural industry. This is the 94th edition and is published by the cooperative efforts of Purdue University and USDA's National Agricultural Statistics Service. This year's edition will be the sixth edition that will be published and available from a free mobile app created by Purdue University. The app is available for Apple iPhone, iPad and iPod touch as well as Android users. It can be obtained through iTunes, Google Play and Amazon. Links to those sites where the app can be downloaded are in Purdue Extension's <u>The Education Store</u> or use the Quick Response Code (QRC) located on page 132 in this book.

We are again pleased to feature the photography talents of 20 individual 4-H members within Indiana's 2019-2020 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2019 Indiana State Fair, provide a glimpse of Indiana's agriculture from future farmers' perspective. We are grateful to all of the 4-H members who submitted their photos for publication.

This publication satisfies the growing need for accurate, reliable and unbiased information and data. We would especially like to thank all of the farmers who participated in completing the Census of Agriculture. The data in this publication is collected from Indiana Farmers, agricultural businesses, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, NASDA Enumerators and others that make this Publication possible.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana's farming community and future opportunities. While we strive to exceed this goal the Indiana Field Office of USDA's National Agricultural Statistics Service assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

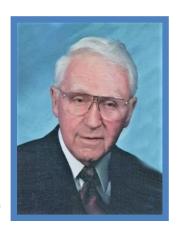

Indiana agriculture continues to be a growing segment of the State's economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state's rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

This edition is dedicated in the memory of Ralph Gann and Earl Park, former State Statisticians in the Indiana Field Office. Both Mr. Gann and Mr. Park served Indiana well for many years.

Ralph Gann August 2, 1942 – October 26, 2020

Earl Park December 31, 1919 – March 26, 2020

### **FARM INCOME**

#### **CASH RECEIPTS**

Indiana farmers received \$10.5 billion in cash receipts from farm marketing's in 2019, up fractionally from 2018. Cash receipts from crops were up 1 percent, and receipts for livestock were 2 percent below the previous year. Marketing's of crops at \$6.81 billion, accounted for 64.6 percent of the total cash receipts in 2019 while livestock receipts, at \$3.73 billion, accounted for the remaining 35.4 percent. In the previous year's revised totals, crop receipts accounted for 63.9 percent and livestock 36.1 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2019 and amounted to \$3.49 billion. Soybeans were second at \$2.77 billion and meat animals remained in third place with \$1.63 billion. Poultry and eggs was the fourth leading contributor with \$1.10 billion and Dairy follows with \$736 million. These five commodity groups accounted for almost 92 percent of the 2019 cash receipts.

<sup>&</sup>lt;sup>1</sup> Includes fruits and nuts.

<sup>&</sup>lt;sup>1</sup> Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Data as of September 2, 2020 Source: Economic Research Service

 $<sup>^{\</sup>rm 2}$  Includes expenses associated with operator dwellings.

<sup>&</sup>lt;sup>3</sup> Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle and all other insurance.

State	0	0	30	186	374	609	744	683	448	235	36	0	3,345

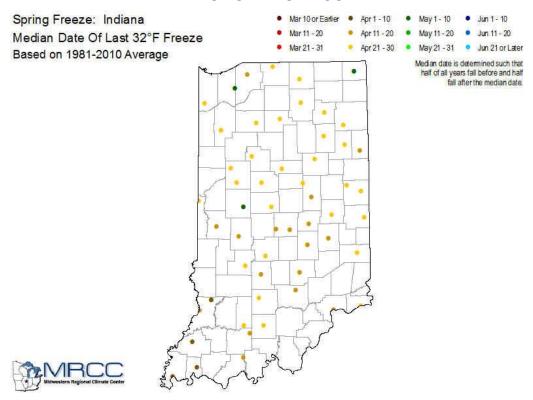

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of  $60^{\circ}F$  resulted in 84 GDD. The basic formula is: 1/2 (max T -50) + 1/2 (min T -50) = GDD for one day. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

### **CROP HIGHLIGHTS**

**ACREAGE:** Indiana's principal field crops totaled 11.1 million acres for harvest during 2019, 880 thousand acres less than 2018. Soybean acreage at 5.4 million and corn acreage at 5.0 million were down 600 thousand and 200 thousand acres less respectively from the previous year.

YIELDS: The 2019 spring planting season was the most difficult in recent memory. Extremely wet weather kept planters out of the fields for most of April and May, with planting only really picking up during mid-June. Farmers saw an average of 1.9 days suitable for fieldwork per week throughout the months of April and May. By the end of May, only 22% of corn had been planted, significantly lower than the 85% five-year average, and soybeans were 11% planted, compared to a 63% five-year average.

Weather conditions started to look up in June, which saw three weeks with over 4 days suitable for fieldwork. However, above average rainfall for the month still kept soil moisture levels high, and corn and soybean planting remained well behind schedule heading into July. With the extremely unusual spring, farmers had to make tough decisions on whether to stick to their planting intentions, switch acres to another crop, or to take prevent plant payments.

The first full week of July saw corn planting all but wrapped up, albeit about a month behind the five-year average, with soybean planting not far behind. Farmers took advantage of the dry July weather to focus on nutrient and pest management, winter wheat harvest, and catching up on hay cuttings, which had also fallen behind schedule due to the excessively wet spring. July brought below average levels of precipitation, a welcomed sight for most, and a large increase in days suitable for fieldwork, with weekly averages ranging from 4.9 to 6.5 days suitable. Though by the end of the month, soil moisture levels had fallen below the five-year averages, irrigation rigs were running, and fields in some areas were showing signs of moisture stress.

At the end of July, both corn and soybean development were still well behind schedule. As of July 28, only 40% of corn was silking, compared to the 84% five-year average, and 37% of soybeans were blooming, compared to the 79% five-year average. At that time, 38% percent of both corn and soybeans

were rated in good to excellent condition, compared to 69% and 57%, respectively, last year. Winter wheat harvest was mostly completed by the end of the month, one of the few progress items that remained on schedule during this challenging season.

Throughout the remainder of the growing season, corn and soybean progress continued to lag the five-year averages by significant margins. By September 1, only 33% of both corn and soybeans were rated in good to excellent condition, compared to 72% for both crops in 2018.

With harvest already delayed due to late planting, inclement weather throughout November further delayed progress. By December 1, harvest as all but finished with soybeans at 96% harvested and corn at 93% harvested. The Indiana corn yield was 169 bushels per acre, while soybeans yielded 51 bushels per acre.

**PRODUCTION:** Indiana corn production in 2019 totaled 814.6 million bushels, 16 percent below 2018's total of 967.7 million bushels. Indiana's soybean production totaled 273.4 million bushels, down 20 percent from 2018's 342.7 million bushels. Indiana wheat production at 16.1 million bushels was down 13 percent. All hay production at, 1.29 million tons, was down 7 percent from the previous year.

<sup>1</sup> Data f	rom Objective	Yield Survey.			1			

#### **BIOTECHNOLOGY VARIETIES**

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

#### BIOTECHNOLOGY VARIETIES, PERCENT OF ALL PLANTED ACRES INDIANA, 2014-2020

#### LIVESTOCK HIGHLIGHTS

**HOG AND PIG** numbers (December 1, 2019), at 4.45 million, were up 5 percent from a year earlier. The average value per head increased from \$97.00 in 2018 to \$102.00 in 2019. This raised the total inventory value to \$438.6 million, 6 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2019.

**CATTLE** inventory numbers, at 840,000, were down 5 percent from January 1, 2019 while value per head, at \$920 remained the same as the previous year. Total cattle inventory value, at \$772.8 million, decreased 5 percent from the \$809.6 million last year. Cows and heifers that have calved totaled 370,000 head, down 4 percent from a year earlier. Of this total, 194,000 were beef cows, down 5 percent; and 176,000 were milk cows, down 3 percent from the previous year.

Total **SHEEP** inventory, at 57,000 head for January 1, 2020, was down 5 percent from a year earlier. Breeding sheep totaled 50,000 head. Average value per head at \$239.00, was up \$4.00 from 2019. Total inventory value at \$13.6 million was 3 percent below the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2019, at 45.4 million birds, was up 2 percent from the previous year. With this inventory, Indiana dropped to third place in the nation for total chickens, excluding broilers, and for layers (36.0 million). The total value of the chicken inventory was \$104.4 million, up 2 percent from 2018. The value per bird, at \$2.30 was unchanged from the previous year.

April-June	26.8	12.5	1.8	20.2	5.4	1.5		

#### (Z) Less than .05 percent.

- A colony may be affected by multiple stressors during the quarter. This report has been discontinued.
- <sup>2</sup> Tracheal mites, nosema, hive beetle, wax moths, etc.
- <sup>3</sup> Includes American and European foulbrood, chalkbrood, stonebrood, paralysis (acute and chronic), Kashmir, deformed wing, sacbrood, IAPV, Lake Sinai II, etc.
- <sup>4</sup> Includes weather, starvation, insufficient forage, queen failure, hive damage/destroyed, etc.
- <sup>5</sup> Data not available.

<sup>&</sup>lt;sup>1</sup> Number of colonies plus all colonies moved into that state during the quarter.

<sup>&</sup>lt;sup>2</sup> Percent lost is the number of lost colonies divided by maximum colonies.

<sup>&</sup>lt;sup>3</sup> Defined as any surviving colony that was requeened or received new honey bees through nuc or package.

<sup>&</sup>lt;sup>4</sup> Percent renovated is the number of renovated colonies divided by maximum colonies.

<sup>&</sup>lt;sup>5</sup> Data not available.

<sup>&</sup>lt;sup>1</sup> NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking", utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data\_and\_Statistics/County\_Data\_Files/Livestock\_County\_Estimates/index.asp

#### **COUNTY HIGHLIGHTS**

#### **COUNTY HIGHLIGHTS**

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2019 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2017 Census of Agriculture, and 2017 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2017 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

## **CUSTOMER SERVICE**

# REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

#### Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

#### **NASS**

http://www.nass.usda.gov/

Today's reports will be listed on the screen. To select from other reports, click on the **View previous reports** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

#### **Indiana Field Office**

http://www.nass.usda.gov/Statistics\_by\_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the right side of the screen.

#### **NASS Subject Specialists:**

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

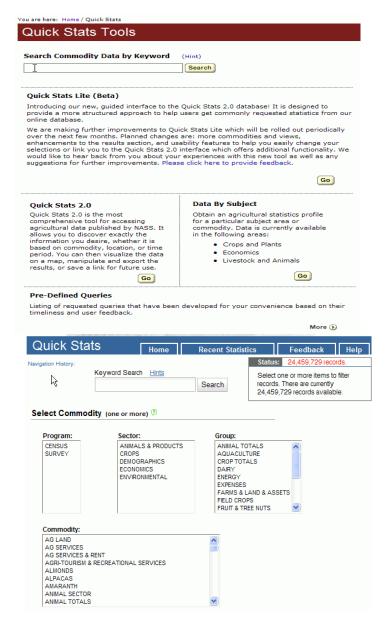

#### **NASS Customer Service:**

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call 1-800-727-9540.

#### **Quick Stats Tools:**

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produces an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

## **CUSTOMER SERVICE**

#### **E-Mail Subscriptions:**

NASS Reports: Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select <u>National Reports</u> under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive and they will be delivered as soon as they are published.

**GET THE APP:** 

The Indiana Annual Bulletin is available in an electronic reader format.

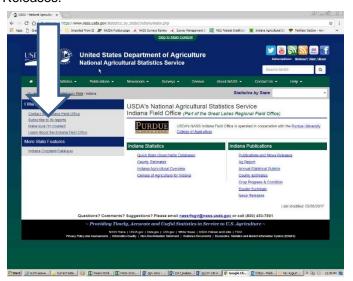

Download the FREE App!

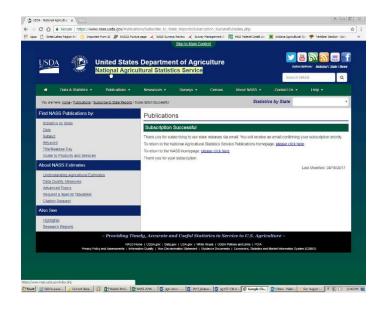

Compatible with Android and Apple Products.
Get it at iTunes, Google Play, and Amazon.

Indiana Field Office Reports: State specific reports are also available free via e-mail. Under the Publications drop down menu of the NASS Home page, select State Reports under the heading Receive reports by E-mail. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name and e-mail address, and then click on Subscribe. Or, on the left side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on Subscribe. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.

Once you "Subscribe", you will receive a confirmation message in your email.
