~ ~ ~ About the Cover ~ ~ ~

“Sweet Pea in the Sunset” was taken by ten-year-old Leia Emehiser from Lafayette, Indiana and appears on the front cover. Leia is a three-year 4-H member. She has enjoyed the photography project and says, “I learned how to take pictures from my mom. I enjoy taking pictures because it keeps my favorite memories alive”. Sweet Pea was her favorite 4-H pig. She captured this picture one evening while Sweet Pea hung out in the yard and was smelling the air.

The photograph on the back cover, “Amber Waves of Grain”, was taken by nine-year-old Inali Kinnear from Lake Mary, Florida. Inali’s poster originally appeared at the Fountain County Fair. This is Inali’s first year in 4-H. She said her brother and sister are both in 4-H photography and she wants to be like them. Inali took this picture while driving across the country. She said she had to take several shots because the wind kept moving the wheat.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all the 4-H photography members that submitted pictures for use in our publication. All the photos were included on posters displayed at the 2021 Indiana State Fair.

**Karen Plaut, Glenn W. Sample
Dean of Agriculture**

This information is very important,
but just as important are the
people. We take this opportunity to
thank the following for helping
provide this valuable resource to
the farmers of Indiana.

Nathanial Warenski State Statistician

In this 2021-2022 annual issue of the “Indiana Agricultural Statistics” publication you will find information about Indiana’s entire agricultural industry. This is the 96th edition and is published by the cooperative efforts of Purdue University and USDA’s National Agricultural Statistics Service. This year’s edition will be the eighth edition that will be published and available from a free mobile app created by Purdue University. The app is available for Apple iPhone, iPad and iPod touch as well as Android users. It can be obtained through iTunes, Google Play and Amazon. Links to those sites where the app can be downloaded are in Purdue Extension's [The Education Store](#) or use the Quick Response Code (QRC) located on page 132 in this book.

We are again pleased to feature the photography talents of 18 individual 4-H members within Indiana’s 2021-2022 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2021 Indiana State Fair, provide a glimpse of Indiana’s agriculture from future farmers’ perspective. We are grateful to all the 4-H members who submitted their photos for publication.

Data collection for the 2022 Census of Agriculture is upon us. The Census questionnaires will be mailed at the end of 2022. NASS will ensure that the data is accurate. The Census is your opportunity to tell the story of agriculture for your county, state, and the nation. The Census closes one book, yet it opens another. It sets the stage for telling the agricultural story for the next five years. The Census tell the most comprehensive story of what happens on the land. Some of you may have already received the Census and completed it. I thank you for taking time to fill it out and returning it.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana’s farming community and future opportunities. While we strive to exceed this goal, the Indiana Field Office of USDA's National Agricultural Statistics Service, assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State’s economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state’s rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

Thank you for the opportunity to serve the agricultural community, with your help in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Nathanial Warenski
State Statistician

FARM INCOME

CASH RECEIPTS

Indiana farmers received \$14.1 billion in cash receipts from farm marketings in 2021, up 31 percent from 2020. Cash receipts from crops were up 34 percent, and receipts for livestock were up 24 percent from the previous year. Marketings of crops, at \$9.56 billion, accounted for 68.0 percent of the total cash receipts in 2021 while livestock receipts, at \$4.50 billion, accounted for the remaining 32.0 percent. In the previous year's revised totals, crop receipts accounted for 66.1 percent and livestock 33.9 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2021 and amounted to \$5.05 billion. Soybeans were second at \$3.83 billion and meat animals remained in third place with \$1.97 billion. Poultry and eggs were the fourth leading contributor with \$1.44 billion and Dairy followed with \$833 million. These five commodity groups accounted for over 93 percent of the 2021 cash receipts.

2021 Indiana Cash Receipts

¹ Includes fruits and nuts.

Value of Agricultural Sector Production	11,540,146	11,627,252	11,064,187	12,133,166	15,397,877

¹ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Net Farm Income	1,663,931	2,089,988	1,822,279	3,217,326	5,829,014

¹ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

² Includes expenses associated with operator dwellings.

³ Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle, and all other insurance.

Data as of September 1, 2022

State	0	0	18	206	352	665	774	688	490	235	7	0	3,435

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1991-2020) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60°F resulted in 84 GDD. The basic formula is: $1/2 (\max T - 50) + 1/2 (\min T - 50) = \text{GDD for one day}$. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

FROST DATES

LAST SPRING FROST

Spring Freeze: Indiana
Median Date Of Last 32°F Freeze
Based on 1981-2010 Average

- Mar 10 or Earlier
- Mar 11 - 20
- Mar 21 - 31
- Apr 1 - 10
- Apr 11 - 20
- Apr 21 - 30
- May 1 - 10
- May 11 - 20
- May 21 - 31
- Jun 1 - 10
- Jun 11 - 20
- Jun 21 or Later

Median date is determined such that half of all years fall before and half fall after the median date.

FIRST FALL FROST

Fall Freeze: Indiana
Median Date Of 32°F Freeze
Based on 1981-2010 Average

- Aug 10 or Earlier
- Aug 11 - 20
- Aug 21 - 31
- Sep 1 - 10
- Sep 11 - 20
- Sep 21 - 30
- Oct 1 - 10
- Oct 11 - 20
- Oct 21 - 31
- Nov 1 - 10

CROP HIGHLIGHTS

ACREAGE: Indiana's principal field crops totaled 11.8 million acres for harvest during 2021, 30 thousand acres less than 2020. Soybean harvested acreage at 5.64 million was down 40 thousand from the previous year. Corn harvested for grain acreage was 5.27 million up 20 thousand acres from previous year.

YIELDS: A mild and mostly dry start to the 2021 planting season offered optimal weather conditions that spurred planting progress and winter wheat crop development. The average temperature for the month was 50.0 degrees Fahrenheit. Corn planting, soybean planting, and winter wheat jointing all closed out April well ahead of their respective five-year averages.

Frequent rain showers in early May initially hindered corn and soybean planting progress but helped replenish soil moisture levels after the relatively dry month of April. The average temperature for May was 58.9 degrees. Corn and soybean emergence consistently remained ahead of their respective five-year averages. Much to the relief of growers across the State, the cold spell that closed out April did little to hinder winter wheat crop condition as 72 percent of winter wheat was rated in good to excellent condition by the end of May.

By mid-June, corn and soybean planting neared completion. The average temperature for the month was 70.5 degrees. Consistent rainfall helped maintain soil moisture levels throughout the month. As June ended, corn and soybean emergence had nearly finished. Second cuttings of alfalfa and other hay were in full swing. While winter wheat harvest fell behind its five-year average, the crop was reportedly doing well with 76 percent rated in good to excellent condition by the end of June. Both corn and soybeans finished out the month with 73 percent of corn and 71 percent of soybeans rated in good to excellent condition.

Consistent rainfall continued throughout July. Topsoil moisture level ratings averaged 93 percent adequate or surplus during the month. The average temperature for July was 74.3 degrees. By the end of July, winter wheat harvesting wrapped up just behind its five-year average. Corn silking and soybean blooming progress continued well ahead of their respective five-year averages. Corn and soybeans were faring better than they had the year previous with 73 percent of corn and 68 percent of soybeans rated in good to excellent condition. Thanks to relatively consistent precipitation throughout the month, livestock enjoyed adequate pasture regrowth with 64 percent of pasture rated in good to excellent condition as July wrapped up.

August was generally hot and dry throughout much of the State, slowly drying out fields saturated from July's consistent rainfall. For the remainder of the growing season, nearly all crop progress items progressed either in line with or ahead of each crop's respective five-year averages. As September ended, the corn and soybean harvesting season was off to a good start with both crops consistently out-performing condition ratings of the year previous. By the end of September, winter wheat planting was in full swing and was progressing consistently ahead of its five-year average.

Corn harvested for silage wrapped up near mid-October. Harvesting progress for corn and soybeans was greatly slowed for much of the State until mid-to-late November due to excessive rainfall in late October and early November. As the harvesting season wrapped up, a reprieve from wet weather spurred all crop progress items helping corn harvested for grain, soybean harvest, and winter wheat emergence to catch up to their respective five-year averages. The 2021 Indiana corn yield was 195.0 bushels per acre while soybeans yielded 59.5 bushels per acre.

PRODUCTION: Indiana corn production in 2021 totaled 1,027.7 million bushels, 5 percent above 2020's total of 981.8 million bushels. Indiana's soybean production totaled 335.6 million bushels, up 2 percent from 2020's 329.4 million bushels. Indiana wheat production at 23.0 million bushels was up 31 percent from 2020's 17.5 million bushels. All hay production at, 1.56 million tons, was up 1 percent from the previous year.

¹ Data from Objective Yield Survey.

BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

LIVESTOCK HIGHLIGHTS

HOG AND PIG numbers (December 1, 2021), at 4.35 million, were down 2 percent from a year earlier. The average value per head increased from \$106.00 in 2020 to \$115.00 in 2021. This raised the total inventory value to \$500.3 million, 6 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2021.

CATTLE inventory numbers, at 810,000, were down 5 percent from January 1, 2021, and value per head increased to \$1,060 per head, up \$80.00 from the previous year. Total cattle inventory value, at \$858.6 million, increased 3 percent from the \$833.0 million last year. Cows and heifers that have calved totaled 370,000 head, down 1 percent from a year earlier. Of this total, 184,000 were beef cows, unchanged; and 186,000 were milk cows, down 3 percent from the previous year.

Total **SHEEP** inventory, at 60,000 head for January 1, 2022, was unchanged from a year earlier. Breeding sheep totaled 52,000 head. Average value per head, at \$259.00, was up \$15.00 from 2021. Total inventory value, at \$15.5 million, was 6 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2021, at 45.6 million birds, was up 2 percent from the previous year. With this inventory, Indiana moved to third place in the nation for total chickens, excluding broilers, and for layers (35.5 million). The total value of the chicken inventory was \$136.8 million, up 6 percent from 2020. The value per bird, at \$3.00, was up \$0.10 from the previous year.

¹ Prior to January 1, 1970, definition was milk cows and beef cows 2 years old and over.

HOGS AND PIGS

The total pig crop in 2021 was up 2 percent from the pig crop in 2020. Sows farrowed during the year was up 2 percent from the previous year, while litter rates decreased to 10.85. Hog and pig cash receipts totaled \$1.57 billion, increasing 52 percent from the previous year. Gross income of \$1.57 billion (cash receipts plus value of home consumption), also increased 52 percent from the previous year.

¹ NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking", utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp

COUNTY HIGHLIGHTS

COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2021 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2017 Census of Agriculture, and 2020 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2017 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

STATE DATA

2021 Census Population	6,805,985	2020 Cash Receipts	\$11,031,098,000

CUSTOMER SERVICE

REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

NASS

<http://www.nass.usda.gov/>

Today's reports will be listed on the screen. To select from other reports, click on the **View previous reports** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

Indiana Field Office

http://www.nass.usda.gov/Statistics_by_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the right side of the screen.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right-hand side of the screen.

NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday (except for federal holidays), to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call **1-800-727-9540**.

Quick Stats Tools:

Historical County, State, and U.S. information is available on the Internet **FREE OF CHARGE**. The database uses custom extracts based on commodity, year, State, and other selection criteria to produce an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

Search Commodity Data by Keyword (Hint)

Quick Stats Lite (Beta)

Introducing our new, guided interface to the Quick Stats 2.0 database! It is designed to provide a more structured approach to help users get commonly requested statistics from our online database.

We are making further improvements to Quick Stats Lite which will be rolled out periodically over the next few months. Planned changes are: more commodities and views, enhancements to the results section, and usability features to help you easily change your selections or link you to the Quick Stats 2.0 interface which offers additional functionality. We would like to hear back from you about your experiences with this new tool as well as any suggestions for further improvements. [Please click here to provide feedback.](#)

Quick Stats 2.0

Quick Stats 2.0 is the most comprehensive tool for accessing agricultural data published by NASS. It allows you to discover exactly the information you desire, whether it is based on commodity, location, or time period. You can then visualize the data on a map, manipulate and export the results, or save a link for future use.

Data By Subject

Obtain an agricultural statistics profile for a particular subject area or commodity. Data is currently available in the following areas:

- Crops and Plants
- Economics
- Livestock and Animals

Pre-Defined Queries

Listing of requested queries that have been developed for your convenience based on their timeliness and user feedback.

CUSTOMER SERVICE

E-Mail Subscriptions:

NASS Reports: Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select **National Reports** under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive, and they will be delivered as soon as they are published.

Indiana Field Office Reports: State specific reports are also available free via e-mail. Under the **Publications** drop down menu of the NASS Home page, select **State Reports** under the heading **Receive reports by E-mail**. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name, and e-mail address, and then click on **Subscribe**. Or, on the left side of the Indiana Field Office Home page, select **Subscribe to IN reports**. This will give you only reports for Indiana. After entering your name and e-mail address, click on **Subscribe**. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.

GET THE APP:

The Indiana Annual Bulletin is available in an electronic reader format.

Download the **FREE** App!

Compatible with Android and Apple Products. Get it at iTunes, Google Play, and Amazon.

Once you "Subscribe", you will receive a confirmation message in your email.
