~ ~ ~ About the Cover ~ ~ ~

"Southern Indiana Sunset" was taken by eleven-year-old Mac Mowrer from Owensville, Indiana and appears on the cover. Mac captured this photograph after rinsing show cattle. "I looked out from the barn and saw an amazing summer sunset". He became interested in photography because of his mom and brother. He states, "Photography opens your eyes to see the details and the beauty around you." Mac has taken the photography project all three years he has been in 4-H.

The photograph on the back cover, "Big Ol' Barn", was taken by ten-year-old Henry Vollmer from Huntingburg, Indiana. Henry is a second-year member of 4-H and the photography project. He took this picture while his family was having a gathering on their farm. He says, "I like to be outside and find cool things to take pictures of." His interest in photography came from watching his mom take pictures.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all the 4-H photography members that submitted pictures for use in our publication. All the photos were included on posters displayed at the 2023 Indiana State Fair.

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

Bernie Engel, Glenn W. Sample Dean of Agriculture

#### Nathanial Warenski State Statistician

In this 2023-2024 annual issue of the "Indiana Agricultural Statistics" publication you will find information about Indiana's entire agricultural industry. This is the 98th edition and is published by the cooperative efforts of Purdue University and USDA's National Agricultural Statistics Service.

We are again pleased to feature the photography talents of 15 individual 4-H members within Indiana's 2023-2024 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2023 Indiana State Fair, provide a glimpse of Indiana's agriculture from future farmers' perspective. We are grateful to all the 4-H members who submitted their photos for publication.

I would like to thank you for completing surveys throughout the year. The information provided helps us publish this report and many others for Indiana and the nation. At NASS, we strive for excellence. As part of the commitment, we aim to use the latest and best data points and sources of information. Even though we do use various sources of data, the most valuable piece of information is the data you provide on surveys.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The uses of the data are as diverse as the agriculture of Indiana. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana's farming community and future opportunities. While we strive to exceed this goal, the Indiana Field Office of USDA's National Agricultural Statistics Service, assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State's economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, maple syrup, spearmint, watermelons, and pumpkins. Indiana livestock producers put our state's rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Results of these special research efforts are published by the individual research program. Not all results from the special surveys are a part of this publication but please feel free to contact us for reference to those researchers for additional information. One of the cooperative projects include the Indiana Popcorn Survey. The results of this report can be found on page 31.

Thank you for the opportunity to serve the agricultural community, with your help in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Nathanial Warenski State Statistician USDA, NASS, Great Lakes Region Serving Indiana, Michigan, and Ohio

#### **FARM INCOME**

#### **CASH RECEIPTS**

Indiana farmers received \$17.1 billion in cash receipts from farm marketings in 2023, down 7 percent from 2022. Cash receipts from crops and livestock were both down 7 percent from the previous year. Marketings of crops, at \$11.2 billion, accounted for 65.7 percent of the total cash receipts in 2023 while livestock receipts, at \$5.9 billion, accounted for the remaining 34.3 percent. In the previous year's revised totals, crop receipts accounted for 65.6 percent and livestock 34.4 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2023 and amounted to \$5.62 billion, followed again by soybeans with \$4.78 billion. Poultry and eggs remained in third place with \$2.53 billion. Meat animals were the fourth leading contributor with \$2.08 billion and dairy followed with \$955 million. These five commodity groups accounted for 93 percent of the 2023 cash receipts.

<sup>&</sup>lt;sup>1</sup> Includes fruits and nuts.

<sup>&</sup>lt;sup>1</sup> Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Net Farm Income	1,818,416	3,230,350	5,801,888	6,135,961	5,498,145		

Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Data as of September 5, 2024 Source: Economic Research Service

 $<sup>^{\</sup>rm 2}$  Includes expenses associated with operator dwellings.

<sup>&</sup>lt;sup>3</sup> Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle, and all other insurance.

State	0	0	18	206	352	665	774	688	490	235	7	0	3,435

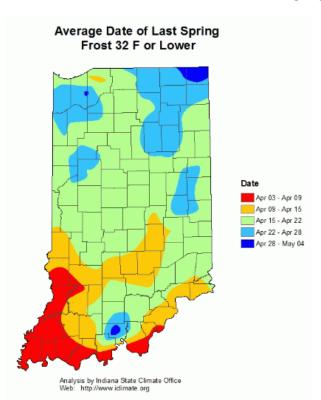

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1991-2020) at mid-month and the corresponding GDD. For example, a weekly average temperature of  $60^{\circ}F$  resulted in 84 GDD. The basic formula is: 1/2 (max T -50) + 1/2 (min T -50) = GDD for one day. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

#### **CROP HIGHLIGHTS**

**ACREAGE:** Indiana's principal field crops totaled 11.8 million acres for harvest during 2023, 45 thousand acres less than 2022. Soybean harvested acreage at 5.48 million was down 350 thousand from the previous year. Corn harvested for grain acreage was 5.31 million up 180 thousand acres from previous year.

**YIELDS:** A relatively warm and dry start to spring aided planting progress throughout April. The average temperature for the month was 52.5 degrees Fahrenheit, 1.2 degrees above normal. By the end of April, planting progress for both corn and soybeans were around 20 percent complete, ahead of their respective five-year averages. Winter wheat jointing progress was 14 percentage points ahead of it's five-year average.

Dry conditions persisted throughout much of May, allowing planting to progress ahead of schedule but also raising concerns about soil moisture levels. The average temperature for May was 62.6 degrees. By the end of the month, planting progress for both corn and soybeans were well ahead of the five-year averages, and winter wheat headed was 11 points ahead its five-year average.

The month of June brought cool temperatures, but dry conditions continued. The average temperature for the month was 69.5 degrees. Corn and soybean planting wrapped up in early June, well ahead of schedule. Dry conditions lingered throughout the first two weeks of the month, with only 29 percent of topsoil moisture reported as adequate or surplus by mid-June. Much needed rainfall arrived in the following weeks, and topsoil moisture was rated at 61 percent adequate or surplus by the end of the month.

By mid-June, corn and soybean emergence neared completion with 56 percent of corn and 57 percent of soybeans rated in good to excellent condition. At this time, first cuttings of alfalfa and other hay also neared completion, and second cuttings were beginning. By the end of June, over a third of the State's winter wheat had been harvested with 70

percent of the crop rated in good to excellent condition.

Timely rains continued to replenish moisture levels throughout the month of July. Topsoil moisture level ratings averaged 64 percent adequate or surplus throughout the month. The average temperature for the month was 74.4 degrees. By July 23, winter wheat harvest was all but complete with 96 percent harvested, just one point below the five-year average. At the end of the month, corn silking progress was in line with the five-year average, and 63 percent of corn was rated in good to excellent condition. Soybean blooming progressed on schedule as well, while soybean condition was rated 65 percent good to excellent. Livestock were reportedly doing well with 51 percent of pastures rated in good to excellent condition as of July 30.

#### **CROP HIGHLIGHTS**

Moderate temperatures and timely rains continued throughout August, with topsoil moisture level ratings averaging 72 percent adequate or surplus for the month. Crop progress items remaining roughly in line with the five-year averages. Drier conditions took hold in September, but corn and soybean crop conditions remained stable as the crops reached maturity. By the end of September, corn condition was rated 55 percent good to excellent and soybeans were rated 54 percent good to excellent. Winter wheat planting was 11 percent complete, 5 percentage points behind the five-year average.

Corn and soybean harvest progressed just slightly behind schedule throughout October. Corn harvested for silage wrapped up around the middle of the month. Drier conditions in November allowed farmers to make up ground, and corn and soybean harvests finished up on schedule around mid- to late-November. As of November 26, winter wheat emergence was at 89 percent, just 2 points behind the five-year average. In 2023, the Indiana Winter Wheat yield was 92.0 bushels per acre; a record high. The 2023 Indiana corn yield was 203.0 bushels per acre while soybeans yielded 61.0 bushels per acre. Both were record high yields

**PRODUCTION:** Indiana corn production in 2023 totaled 1.08 billion bushels, 11 percent above 2022's total of 974.7 million bushels. Indiana's soybean production totaled 334.3 million bushels, down less than 1 percent from 2022's 335.2 million bushels. Indiana wheat production at 30.8 million bushels was up 59 percent from 2022's 19.4 million bushels. All hay production, at 1.27 million tons, was down 20 percent from the previous year.

<sup>1</sup> Data f	rom Objective	Yield Survey.			<u> </u>				

#### **BIOTECHNOLOGY VARIETIES**

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

#### BIOTECHNOLOGY VARIETIES, PERCENT OF ALL PLANTED ACRES INDIANA, 2018-2024

			Corn			Soybeans			
Year	Acres Planted	Insect Resistant (Bt)	Herbicide Resistant	Stacked Gene Varieties	All Biotech Varieties	Acres Planted	Herbicide Resistant	All Biotech Varieties

#### LIVESTOCK HIGHLIGHTS

**HOG AND PIG** numbers (December 1, 2023), at 4.5 million, were up 1 percent from a year earlier. The average value per head decreased from \$135.00 in 2022 to \$125.00 in 2023. This lowered the total inventory value to \$562.5 million, 6 percent below a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2023.

**CATTLE** inventory numbers, at 790,000, were unchanged from January 1, 2023, while value per head increased to \$1,410 per head, up \$220.00 from the previous year. Total cattle inventory value, at \$1.11 billion, increased 18 percent from the \$940.1 million last year. Cows and heifers that have calved totaled 370,000 head, up 1 percent from a year earlier. Of this total, 180,000 were beef cows, up 1 percent; and 190,000 were milk cows, up 2 percent from the previous year.

Total **SHEEP** inventory, at 80,000 head for January 1, 2024, was up 3 percent from a year earlier. Breeding sheep totaled 70,000 head. Average value per head, at \$295.00, was up \$8.00 from 2023. Total inventory value, at \$23.6 million, was 5 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2023, at 45.7 million birds, was down 1 percent from the previous year. Indiana remained in third place in the nation for total chickens, excluding broilers, and for layers (35.8 million). The total value of the chicken inventory was \$192.1 million, up 22 percent from 2022. The value per bird, at \$4.20, was up \$0.80 from the previous year.

<sup>&</sup>lt;sup>1</sup> NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking", utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data\_and\_Statistics/County\_Data\_Files/Livestock\_County\_Estimates/index.asp

2022 Popcorn

#### **COUNTY HIGHLIGHTS**

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2023 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2022 Census of Agriculture, and 2022 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage and yield for both hay and popcorn are represented by three dashes because this category is not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2022 chicken data from Census includes only layers twenty weeks old and older. County level data from the 2022 Census was used for hay, popcorn, hogs, sheep, chickens and turkeys.

Below is a list of comparable items at the state level.

# REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

#### Internet:

Reports and data from NASS as well as the Great Lakes Regional Field Office are available on the internet.

For access, choose from the following:

#### NASS

http://www.nass.usda.gov/

Today's reports will be listed on the screen. To select from other reports, click on the **View previous reports** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

#### Indiana Data

http://www.nass.usda.gov/Statistics\_by\_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the top right side of the screen.

#### **NASS Subject Specialists:**

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click or hover over **Contact Us**, then select the option to **Ask a Specialist**.

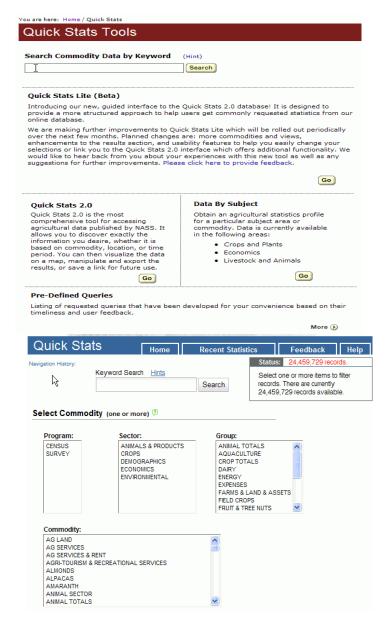

#### NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday (except for federal holidays), to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call 1-800-727-9540.

#### **Quick Stats Tools:**

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produces an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

### **CUSTOMER SERVICE**

#### **E-Mail Subscriptions:**

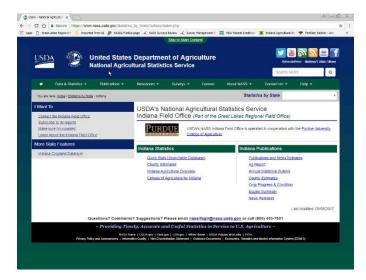

**NASS Reports:** Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select State Reports.

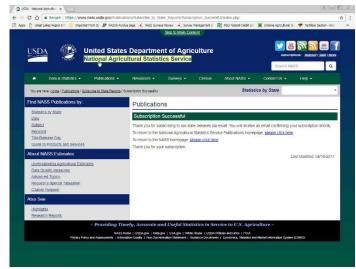

On the next screen, there is an option to sign up and subscribe to national reports. To receive reports by E-mail, select the "Sign Up" option in the upper right-hand corner. First time users will be required to set up an account. Enter our email and set up a password to continue. Then follow instructions to choose the National reports you would like to receive, and they will be delivered as soon as they are published.

Indiana Field Office Reports: State specific reports are also available free via e-mail. Under the Publications drop down menu of the NASS Home page, select State Reports under the heading Receive reports by E-mail. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name, and e-mail address, and then click on Subscribe. Or, on the left side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on Subscribe. E-mail reports available through the Indiana Field Office include: All Reports, Crop-Weather, Crops and Livestock, Miscellaneous, News Releases.

Once you "Subscribe", you will receive a confirmation message in your email.
