Indiana Crop Weather

June 3, 2024

Planting Nears Completion

Some farmers were able to finish planting last week, but continued rainfall left low-lying fields saturated and unworkable which prevented other farmers from finishing, according to Nathaniel Warenski, State Statistician, USDA NASS, Indiana Field Office. Topsoil moisture levels remained stable, with 94 percent rated adequate or surplus.

The average temperature for the week was 64.3 degrees Fahrenheit, 2.1 degrees below normal for the State. The statewide average precipitation was 1.57 inches, 0.47 inches above normal. There were 4.4 days suitable for fieldwork for the week ending June 2.

Favorable planting conditions allowed corn and soybean planting progress to continue ahead of their respective five-year averages. Some fields remain unplanted, as intermittent precipitation made planting particularly difficult on bottom ground and in clay soils. Winter wheat headed neared completion. Winter wheat condition was stable, but growers remained concerned about wet field conditions precipitating disease. Livestock enjoyed thriving pasture conditions with 77 percent of pastures rated in good to excellent condition. Hay cutting progressed slightly ahead of schedule compared to previous years. Other activities for the week included spraying herbicides, fertilizer applications, mowing roadsides, and harvesting asparagus.

Soil Moisture: Week Ending 06/02/24

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
