Michigan Crop Weather

November 4, 2024

Field Crops

Favorable weather last week allowed farmers to continue to make excellent harvest progress, according to Marlo D. Johnson, Director, USDA NASS, Great Lakes Regional Office. There were 6.2 days suitable for fieldwork in Michigan during the week ending November 3, 2024. **Corn** for grain progress remained ahead of schedule, reaching 82 percent harvested. **Soybeans** harvested and **winter wheat** planted were nearly finished for the season. Seventy-eight percent of wheat had emerged. Permanent piling of **sugarbeets** has begun, although warm weather caused several shutdowns last week. The Michigan **potato** harvest was virtually complete. A few growers were shipping straight from the field, due to favorable weather and the relatively large crop. Reports indicate that solids were good, and recovery rates have been above average. Other activities last week included soil testing, planting cover crops, hauling grain, fall tillage, tending to livestock, and farm planning for next year.
