Michigan Crop Weather

November 18, 2024

Field Crops

More precipitation and warm temperatures last week continued to help wheat progress as corn and sugarbeet growers were finishing up harvest across the State, according to Marlo D. Johnson, Director, USDA NASS, Great Lakes Regional Office. There were 4.5 days suitable for fieldwork in Michigan during the week ending November 17, 2024. **Corn** harvested for grain had wrapped up in most areas. Ninety-five percent of the crop has been harvested. **Winter wheat** condition saw improvements from recent rain events. Ninety-six percent of the crop has emerged. **Sugarbeet** harvest reached 98 percent last week. Harvest continued to experience permanent piling disruptions from the warmer temperatures. Other activities last week included soil testing, planting cover crops, hauling grain, fall tillage, applying herbicides and fertilizer, spreading lime and manure, tending to livestock, and farm planning for next year.

Crop Condition: Week Ending 11/17/24

Crop	Very poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Winter Wheat	0	1	25	57	17

Crop Progress: Week Ending 11/17/24

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork..	4.5	5.0	-	-
Corn Harvested for Grain	95	91	63	70
Winter Wheat Emerged	96	92	83	88
Sugarbeets Harvested	98	85	95	96

Soil Moisture: Week Ending 11/17/24

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture.....	7	21	65	7
Subsoil moisture.....	15	33	47	5
