

Mississippi Crop Progress and Condition

Delta Region - Mississippi Field Office

121 North Jefferson Street, Suite 230 Jackson, MS 39201
(601) 359-1259 · FAX (855) 270-2705 · www.nass.usda.gov

Cooperating with Mississippi Department of Agriculture and Commerce

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at <https://www.nass.usda.gov/ms> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the county extension agents who responded to this survey.

Week Ending: October 27, 2024

Released: October 28, 2024

According to the National Agricultural Statistics Service in Mississippi, there were 6.8 days suitable for fieldwork for the **week ending Sunday, October 27, 2024**. Topsoil moisture supplies were 36 percent very short, 47 percent short, 16 percent adequate, and 1 percent surplus. Subsoil moisture supplies were 30 percent very short, 48 percent short, 22 percent adequate, and 0 percent surplus.

Crop Progress for Week Ending October 27, 2024

Crop	This week	Last week	Last year	5-year average
	(percent)	(percent)	(percent)	(percent)

Mississippi Subsoil Moisture Map for the week of October 14 – October 20, 2024

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.
