2023 Irrigation and Water Management Survey Results Available Online

TRENTON, NJ – USDA/NASS published the 2023 Irrigation and Water Management Survey results. These results provide whole farm data on irrigated farms such as water use by source, expenditures, labor, and selected farm characteristics.

Data on irrigated crops and pastures as well as horticultural irrigation are also available. “The data are used by both the private and public sectors, as well as non-profit organizations in water-related local programs, economic models, legislative initiatives, market analyses, and feasibility studies,” said NASS New Jersey State Statistician Bruce Eklund.

The results are available online in PDF format and may be accessed directly from the following link:

www.nass.usda.gov/Publications/AgCensus/2022/Online_Resources/Farm_and_Ranch_Irrigation_Survey/index.php

Irrigation data may also be accessed through Quick Stats. If you have any questions regarding the irrigation information, please contact the Northeastern Regional Field Office at nassrfoner@usda.gov or 717-787-3804.
