NASS releases 2022 Census of Agriculture Specialty Crops Report

TRENTON, NJ – The Census of Agriculture Specialty Crops report provides national and state data on farms and farmland, irrigated acreage, value of sales, and producer characteristics for specialty crops as defined in the 2018 Farm Bill. “Specialty Crops is one of the [Subject Series reports](#) released or to be released for this Census of Agriculture,” said NASS New Jersey State Statistician Bruce Eklund.

Also, available through the NASS website for the 2022 ag census are the Market Value of Ag Products Rankings; State and County Profiles; Congressional District Profiles and Rankings; Race, Ethnicity, and Gender Profiles; Ag Census Web Maps; and Zip Code Tabulations. Highlight publications are found on the NASS website at www.nass.usda.gov/Publications/Highlights.

Spanning more than 6 million data points about America’s farms and ranches and the people who operate them, the full ag census report can be accessed at nass.usda.gov/AgCensus. Ag census data can also be found in NASS’s searchable online database, [Quick Stats](#).

In preparation for the 2027 Census of Agriculture, NASS is already asking for [content change suggestions](#) and for new producers who did not receive a 2022 Census of Agriculture questionnaire last year to [sign up to be counted](#) in future censuses and surveys. Both forms can be found at nass.usda.gov.
