USDA TO SURVEY FARMERS' PLANTING INTENTIONS FOR 2025

LAKESWOOD, Colo. – February 3, 2025 – As the 2025 crop production season begins, the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) will contact producers nationwide to determine their plans for the upcoming growing season.

“Each year, the agriculture industry eagerly awaits USDA's *Prospective Plantings* report, which provides the first survey-based estimates of U.S. farmers' planting intentions for the year,” said Rodger Ott, Director, Mountain Regional Field Office. “The March Agricultural Survey provides the factual data that underpins these projections, making it one of the most important surveys we conduct each year.”

NASS will mail the survey questionnaire in mid-February, asking producers to provide information about the types of crops they intend to plant in 2025, how many acres they intend to plant, and the amounts of grain and oilseed they store on their farms. NASS encourages producers to respond online or by mail. Those producers who do not respond by the deadline may be contacted for an interview.

“The data gathered in this survey allows NASS to accurately measure and report intentions throughout the U.S. agricultural industry over the course of the year,” added Ott. “The information is used by all sectors of the industry to help make sound and timely business decisions.”

As with all NASS surveys, the results of this survey will be available in aggregate form only, ensuring that no individual operation or producer can be identified. Survey results will be published in the *Prospective Plantings* and quarterly *Grain Stocks* reports to be released on March 31, 2025.

These and all NASS reports are available online at <http://www.nass.usda.gov/Publications/>. For state-specific questions, please contact your USDA NASS State Statistician at 1-800-392-3202.
