## **USDA to conduct end-of-year hogs and pigs survey**

**HARRISBURG, PA** – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) is contacting producers for the December Hogs and Pigs Survey. This end-of-year survey is a comprehensive gathering of quarterly data on market hog and breeding stock inventories as well as pig crop and farrowing intentions in every state.

“According to the most recent *Quarterly Hogs and Pigs* report in September, there were 76.5 million hogs and pigs in the United States, which is up about 2 percent from the previous quarter,” said David Knopf, director of the NASS Northeastern Regional Field Office. “The December survey and resulting report will continue to provide important indicators for the industry of what changes are occurring – if any,” added Knopf.

NASS will mail the questionnaires to all producers selected for the survey in mid November. To ensure all survey participants have an opportunity to respond, NASS interviewers will contact producers who do not respond by mail or online to telephone and personal interviews.

The data gathered in this survey allows NASS to accurately measure and report conditions and trends in the U.S. pork industry over the course of the year. The information is used by all sectors of the industry, including producers themselves, to help make sound and timely business decisions. NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS will publish the survey results in the *Quarterly Hogs and Pigs* report on December 23, 2024. All NASS reports are available online at [www.nass.usda.gov/Publications/](http://www.nass.usda.gov/Publications/). For more information, call the NASS Northeastern Regional Field Office at (800) 498-1518.
