USDA to measure grape production

HARRISBURG, PA –The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will conduct an end of season survey for 2024 grape production and disposition during February 2025. The survey will collect information about acreage, production and prices from growers in the northeastern region of the United States.

“The information from this survey directly impacts our regions’ grape growers in many positive ways,” said David Knopf, Director of the National Agricultural Statistics Service, Northeastern Regional Field Office. “Growers can use the survey results when making business plans and marketing decisions. USDA’s Farm Service Agency (FSA) relies on the average yields and prices to administer farm programs. Cooperative Extension uses the data to provide needed outreach and education, and State Departments and Agencies of Agriculture use the information to aid growers.”

In this survey, NASS asks participants to answer a variety of questions about grapes. The survey participant sample will be phoned by the New York NASDA staff. As with all NASS surveys, information provided by respondents is confidential by law. NASS safeguards the confidentiality of all responses and publishes only State and National level data, ensuring that no individual producer or operation can be identified.

NASS will compile, analyze, and publish survey results in the May 2nd, 2025, *Noncitrus Fruits and Nuts Annual* report. Publications are available online at <http://www.nass.usda.gov/Publications>. For more information on NASS surveys and reports, call the NASS Northeastern Regional Field Office at 1-800-498-1518.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
