Ohio Agricultural Contacts	119

Ohio's food and agriculture industry is made up of a myriad of people working the land, supporting local communities, and capitalizing on science-based uses for home-grown products, all of which help secure our state's future. It is the one industry that gives us so much and is vital to our survival, yet is also the least understood.

Never has it been more important to educate business representatives, opinion leaders, and consumers about stories that illustrate the far-reaching importance of agriculture to our state's economy and the daily lives of Ohioans. In an effort to share some of those stories and to showcase the state's most important industry, the Ohio Department of Agriculture partnered with Journal Communications to produce the magazine *Growing Ohio*. It is available at: www.agri.ohio.gov.

GROWING OHIO

• CREATING CONNECTIONS TO THE STATE'S TOP INDUSTRY •

Rows of Progress

OHIO SEES GROWTH IN CORN AND SOYBEANS

Founding Families

Ohio farms enjoy 200 years of same-family ownership

Governor Kasich is fond of saying that members of his cabinet are repairmen. It is our job to fix the things that don't work in state government. It is our job to streamline efficiencies and share resources. Governor Kasich has repaired a lot of things in this state, including Ohio's economy and economic climate. For Ohio farmers, this has meant the elimination of the death tax, income tax rate reduction of 10 percent and a new 15 percent deduction for small businesses.

I am proud to be a repairman that helps protect the food supply, keeps consumers safe, and helps Ohio's farmers find greater economic opportunity. As with all state agencies, we have scrutinized our costs, which allows us to keep our costs in check while performing our regulatory duties.

In 2013, in the midst of carrying out our mission of safeguarding the public and the food supply, and supporting farmers, we worked on pressing issues like nutrient management. We also worked to seamlessly integrate two new programs into our Animal Health Division. This year, we have had two additional regulatory duties added to our department – the Dangerous Wild Animal Office and Commercial Dog Breeders Office.

The majority of our budget and resources are devoted to protecting the food supply. More than 11 million people in Ohio have safe food to eat because of the sampling, testing and inspecting we do every day. We partner with other state, local and federal agencies to ensure safe and wholesome food, milk, meat, over-the-counter drugs, and cosmetics.

In addition, department resources are also focused on protecting the state's plant and animal resources. The emergence of porcine epidemic diarrhea virus in pigs and pests like hemlock woolly adelgid and walnut twig beetle brought new challenges to the department in 2013.

But along with the challenges, we also took time to educate about and helped find ways to advance the state's most important industry. One of the highlights over this past year was celebrating our Bicentennial Farm families, those who have maintained the same farm in their family for at least 200 years. What made this even more special was that we were able to recognize these families at their local fairs.

Also this past year, the department continued its work with Jobs Ohio and Development Services Agency to identify opportunities within agriculture for job creators.

Two dairy processors announced planned expansions in Ohio. The Daisy Brand Company, maker of sour cream and cottage cheese, which will break ground in the Wooster area in 2014, and the Meijer Corporation, which plans to build a full-service dairy in the Tipp City area. They presently have a grocery and dry goods warehouse at the location. Plans are to be operational in late 2015.

It has certainly been an eventful year for our fairs, our agriculture industry and for the Ohio Department of Agriculture. As we move on to another productive year of carrying out our mission, I am proud to serve our state and our food and ag industry.

Sincerely,

David T. Daniels
Director

The Ohio Department of Agriculture provides leadership for Ohio's No. 1 industry – food and agriculture – to create greater economic opportunity for Ohio's farmers and processors; to preserve and enhance Ohio's bountiful resources; and to partner with Ohio's research institutions to further the development of new agricultural products and services. The department administers numerous regulatory, food safety and consumer protection programs for the benefit of all Ohioans and helps build marketing opportunities for Ohio farmers and food processors.

The department's workload is divided among the following divisions and programs: Administration, Amusement Ride Safety, Animal Health, Consumer Protection Laboratory, Dairy, Enforcement, Farmland Preservation, Food Safety, Livestock Environmental Permitting, Markets, Meat Inspection, Ohio Grape Industries, Plant Health and Weights and Measures.

2013 - 2014 EVENTS

Ohio Agriculture Week

Ohio Department of Agriculture Director David T. Daniels (right) presents a Governor's Proclamation to Steven Davis, chairman of the board and executive officer of Bob Evans Farms, Inc.

Director Daniels traveled the state and made a multitude of stops at various food and agriculture facilities during Ohio Agriculture Week, March 10-14. His stops included: Bob Evans Farms, Inc., Marshallville Packing, Buehler's Food Market, Troutman Vineyard, Lakeview Farms, LLC., Cooper Farms, Sugar Creek Packing Co., and The Andersons. Ohio Agriculture Week is celebrated each March to help educate Ohioans about the importance of the state's \$105 billion food and agriculture industry, on our dinner plates and beyond.

ODA University Launched

ODA University is a college internship program within the agency launched in 2013 to increase awareness of the food and agriculture industry and the Ohio Department of Agriculture as a career for any interest, such as engineering, biology, chemistry, political science, communications, or geography. Interns are exposed to a multitude of experiences- working on various projects in the divisions and labs, lectures, and field experiences in food and agriculture-related entities around Central Ohio. All interns give a presentation at the end of their internship on what they learned.

ODA University interns visit Tamarack Dairy in Newark, Ohio to learn about the dairy industry and the Ohio Department of Agriculture's role in keeping the food supply safe.

2013 Ohio Agriculture Women of the Year

Ohio First Lady Karen W. Kasich and Ohio Agriculture Director Daniels honored four 2013 Ohio Agriculture Women of the Year Award winners at a reception at the Ohio Governor's Residence and Heritage Garden in December: Joanne Kick-Raack (Pataskala), Lisa Schacht (Canal Winchester), Morgan Taggart (Cleveland), and Micki Zartman (Worthington).

The award program is administered through the Ohio Department of Agriculture and the Office of the First Lady. Nominations were reviewed by a diverse committee of industry leaders. Winners were selected on the basis of their outstanding contributions to Ohio agriculture, leadership and advocacy in the agricultural community and significant impact on the agriculture industry as a whole.

Pictured (left to right): Director Daniels, Micki Zartman, Morgan Taggart, Joanne Kick-Raack, Lisa Schacht, and First Lady Karen W. Kasich.

Kids Honored for *Agriculture is Cool!* Artwork at the Ohio State Fair

Governor John R. Kasich and Director Daniels announced the winners for the 2013 “Agriculture is Cool” visual arts contest. Ohio school children enrolled in school or home schooled during the 2012-2013 academic year shared their personal interpretation of why Ohio agriculture is “cool.”

Entries, which included an original video, photographs, drawings, and paintings, were judged in the four different age categories: K-2, 3-5, 6-8, and 9-12. Ten entries were selected as winners in their respective categories:

K-2 Drawing: **Grace Draeger**, Sandusky County
K-2 Photograph: **Asa DeMange**, Darke County
3-5 Drawing: **Regan Draeger**, Sandusky County
3-5 Drawing: **Marlo Young**, Morrow County
3-5 Painting: **Reegan Sheets**, Wood County
3-5 Photograph: **Jessie Abke**, Shelby County
3-5 Video: **Matthew John Harris**, Franklin County
6-8 Drawing: **Jared Draeger**, Sandusky County
6-8 Photograph: **Logan Schlauch**, Holmes County
9-12 Photograph: **Heather Remy**, Vinton County

Matthew John Harris of Powell was announced as the “Best in Show” winner, and **Marlo Young** of Cardington was declared the “Director’s Choice” winner.

First Lady Karen W. Kasich and Governor John R. Kasich congratulate Asa DeMange, age 7, for being the K-2 winner for her photography submission in the 2012-2013 *Ag is Cool!* creative expression art contest.

Census Data Shows Ohio Ag is Growing

Ohio’s thriving agriculture industry is seeing continued growth, based on results of the 2012 Census of Agriculture released in May 2014 by the U.S. Department of Agriculture. In several cases, Ohio’s growth significantly outpaced the nation, highlighting the strength of the state’s agricultural producers.

Among the most notable results in the preliminary data is the increase in the market value of crops and livestock sold since the census was last completed in 2007. While market value numbers increased 32.7 percent nationally, the value of Ohio crops and livestock increased 42.3 percent. This is primarily due to a sharp increase in crop values, which increased in Ohio by 60.5 percent but only 47.9 percent nationally. Ohio is ranked 13th nationally with a total value of crop and livestock sales just over \$10 billion in 2012.

While the number of farms has decreased both in Ohio and in the nation, Ohio has lost only 0.5 percent of its farms when the number of farms nationally has decreased by 4.3 percent; Ohio now ranks 7th for the number of farms in the nation with 75,462. Furthermore, in a time when farm acres are disappearing, with the nation losing about 7.5 million acres of farmland since the 2007 census, the numbers of acres in agricultural production in Ohio have remained steady and actually increased slightly. The state now has nearly 14 million acres of farmland.

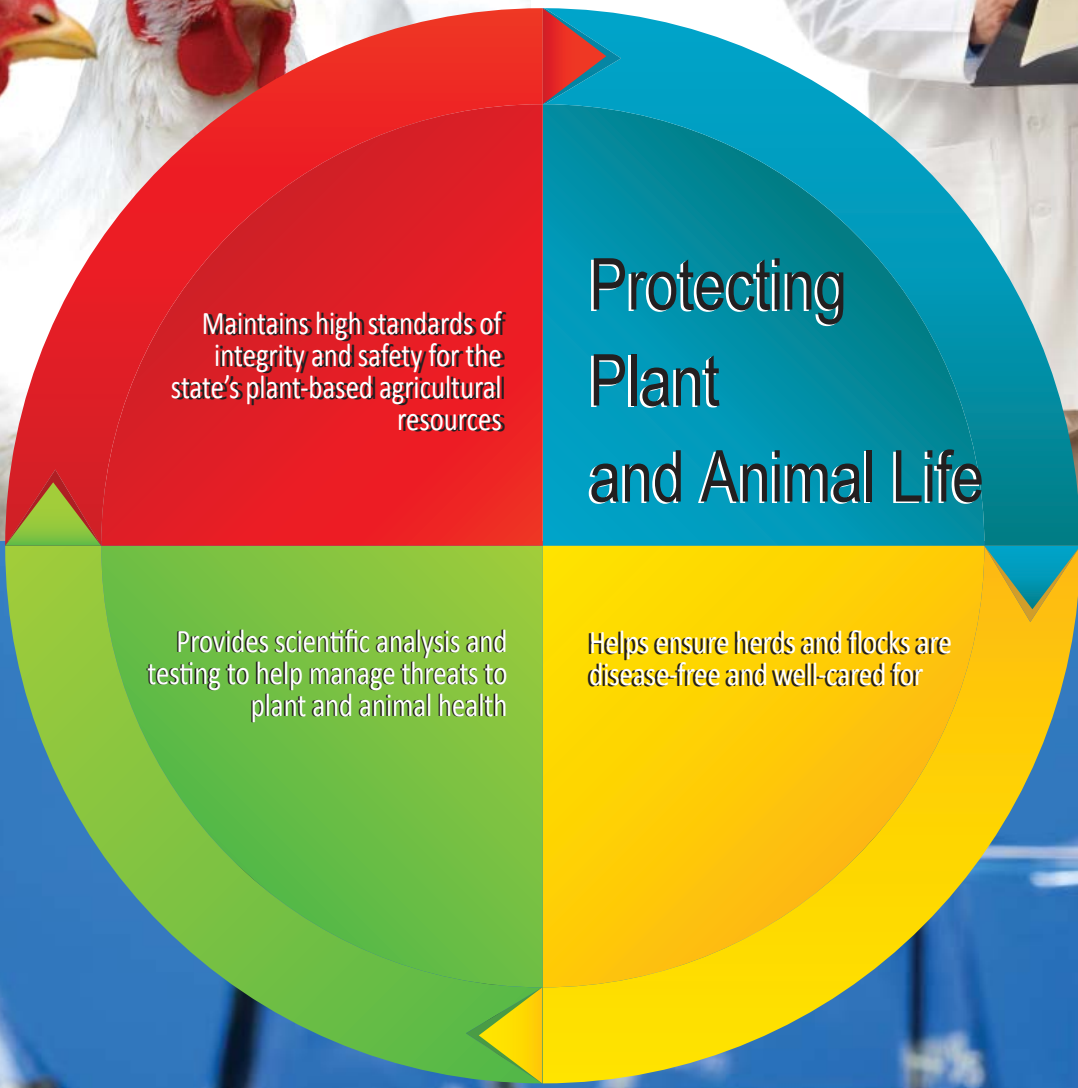

Ohio Bicentennial Farm Families Recognized

Carol and Mike Shay gave the thumbs-up for the Bicentennial Farm ceremony at the Brown County Fair in September. In addition to receiving a Bicentennial Farm certificate from the Governor, State Representative Doug Green (left) recognized the family and their achievements during the event.

In the summer of 2013 the Ohio Department of Agriculture honored 64 bicentennial farm families at 30 fairs for their contributions to the state’s food and agriculture industry.

Ohio’s Century and Bicentennial Farms program is a recognition program that celebrates Ohio’s oldest farms and their families who have been providing the state with jobs, supporting the local economy, and providing food and other necessities for at least 100, sometimes 200, years or more.

Veterinarians and scientists in the Animal Health Division help protect the health and safety of Ohio’s livestock and poultry industries. Animal Health staff members provide quick response in the event of an animal disease outbreak, provide ongoing tests and inspections of livestock to verify the absence of disease, and control and eradicate infectious animal diseases in Ohio.

Staff members license and inspect livestock dealers, weighers, renderers, raw rendering collectors, garbage feeders, and white-tailed deer farms. Staff members also actively participate in a number of federal cooperative agreements with the U.S. Department of Agriculture’s Animal and Plant Health Inspection Service and the Food and Drug Administration relative to national disease control programs: scrapie, bovine spongiform encephalopathy, foreign animal disease, exotic Newcastle disease, avian influenza, chronic wasting disease, premise and animal identification, and tissue drug residues. Animal Health also administers the brand registration program and exhibition livestock inspection and testing. Division staff members work closely with the Ohio Poultry Association through the Ohio Egg Quality Assurance Program to reduce consumer exposure to *Salmonella enteritidis*.

The division administers the Animal Disease Diagnostic Laboratory, which provides regulatory testing support for disease control programs and full diagnostic laboratory services for veterinarians, livestock producers and agribusinesses. It is one of 42 accredited laboratories in the United States. As the only American Association of Veterinary Laboratory Diagnosticians accredited laboratory in the state of Ohio, the lab operates under guidelines that ensure the quality of personnel, facilities and procedures.

Licenses	
Livestock Dealer	263
Weigher	642
Renderer.....	10
Collector	137
Garbage Feeder	15
Tests	
Avian Serology.....	150,720
Brucellosis	50,705
Pseudorabies.....	2,120
Equine Infectious Anemia.....	27,396
John’s	28,596
Salmonella (SE).....	2,951
Pathology Cases	1,970
Histological Slides and Tissues	6,819
Chronic Wasting Disease	5,896
Scrapie.....	124
Molecular Diagnostics	26,551
Avian Influenza/Exotic Newcastle	49,954

This laboratory serves as a participating member of the National Animal Health Laboratory Network, providing high-caliber diagnostic testing support in a number of animal disease situations and provides surge capacity for the nation in the event of a regional or national animal disease outbreak.

In 2013, two new regulatory duties were given to the Division of Animal Health: Commercial Dog Breeders Office and the Dangerous Wild Animal Office.

Rules established by Senate Bill 130, became effective on October 10, 2013, which established the Commercial Dog Breeders Office. High-volume dog breeders, animal rescue for dogs and dog retail operations were required to apply for a 2014 license or register. Provisions in the law provide for rescues, retailing and breeding. Since it became operational, office staff members have issued 145 dog breeding licenses, 179 retailing licenses and 348 rescue acknowledgements.

Inspections of kennels began on February 1, 2014. Noncompliant issues will be noted and the producer will be given a set time frame to address and comply with the rules. Outreach is conducted on a daily basis with kennels that did not self-identify and complete application packets are left with suspected high-volume kennel operations.

The Dangerous Wild Animal Office, created from Senate Bill 310, was effective September 5, 2012 and prohibits a person from possessing a dangerous wild animal on or after January 1, 2014.

New laws require a person who possesses a dangerous wild animal to register and microchip the animal.

Two committees, the Dangerous and Restricted Animals Advisory Board and the Dangerous Wild Animal State Emergency Response Commission, were created. The advisory board meets three times a year and requires a review of the rules proposed to be adopted under the act governing the care of dangerous wild animals, and advises the director of agriculture. The emergency response commission meets as needed to establish a state dangerous wild animal emergency response plan for escaped dangerous wild animals. Each county’s dangerous wild animal response team is to prepare an emergency response plan for its county. The plan includes the methods and procedures that will be used in the event of an escaped dangerous wild animal. The team will submit the plan to the commission for approval and must notify the commission of status of their plan annually, including updates.

The Plant Health Division is responsible for enforcing many consumer and public protection regulations. Staff members' duties include testing germination of packaged seeds, verifying label statements on feed and fertilizers, regulating plant nursery stock, monitoring the financial stability of grain elevators, registering pesticides, licensing pesticide applicators, investigating pesticide use complaints, and working with the U.S. Department of Agriculture's Animal and Plant Health Inspection Service and the U.S. Forest Service to control invasive pest species. The division's role is to assure businesses that produce, process and distribute agricultural products provide safe and properly labeled products to consumers.

Apiary

Honey bees play a vital role in Ohio agriculture as pollinators of one third of what we eat every day. Research has found that 80 percent of insect pollination of crops is accomplished by honey bees. Honey bees are responsible for pollinating the fruit, vegetable and seed crops grown in Ohio, as well as soybeans, hay and wild plants.

The division's Apiary Program coordinates state and county apiary inspections to ensure a healthy beekeeping industry. Beekeepers are required to register each apiary annually with the Ohio Department of Agriculture so that colonies may be counted and examined for diseases and parasites. In 2013, 4,390 beekeepers registered 7,199 apiaries and an estimated 39,822 bee colonies.

Staff members cooperate with national groups and the U.S. Department of Agriculture to provide information about Ohio's beekeeping industry. Since the fall of 2011, a survey has been conducted in conjunction with a U.S. Department of Agriculture study to determine the health of Ohio's honey bee colonies and factors causing Colony Collapse Disorder, which has caused massive colony deaths in many states, including Ohio. The survey will continue in 2014.

Apiary

Registration Certificates Issued	4,395
Apiaries Registered	7,199
Estimated Colonies	39,822
County Apiary Inspectors	52
Apiaries Inspected	4,190
Colonies Inspected	16,496
Colonies with American Foulbrood	34
Colonies with European Foulbrood	16
Colonies with Chalkbrood	83
Colonies with Nosema Symptoms	46
Colonies with Varroa Mite	5,800
Colonies with Small Hive Beetle	1,741

Pesticide and Fertilizer Regulation

The division's Pesticide and Fertilizer Regulation Program regulates the use and distribution of pesticides as well as the manufacturing and distribution of fertilizer, lime, and agricultural additives. This section issues licenses to pesticide

applicators and serves as the registrar for pesticide and fertilizer companies. Through routine inspections, staff members enforce the state laws and rules that govern these activities. In addition to these responsibilities, staff members conduct inspections for the U.S. Environmental Protection Agency in accordance with a cooperative agreement to ensure compliance with the Federal Insecticide, Fungicide and Rodenticide Act.

In 2013, there were 28,690 licensed pesticide applicators, 14,803 registered pesticide products and 4,498 registered specialty fertilizers in Ohio. Training and testing sessions for certification and re-certification of pesticide applicators were also held during the year, helping to assure the safe use of pesticides and preventing misuse and mishandling.

This section also organizes the Clean Sweep Pesticide Disposal Program, holding three regional pesticide collections to assist farmers with a safe and environmentally responsible disposal of unusable, outdated pesticides.

Grain, Feed and Seed

The Grain, Feed and Seed Program licenses and regulates commodity handlers in Ohio; helps assure label claims are accurate on all agricultural, vegetable, flower and lawn seeds; and monitors animal feed, including pet food, to make sure claims of protein, fat, vitamins, minerals and antibiotics are accurate.

Licensed grain handlers are required to meet certain net worth requirements, verified by financial statements annually submitted to the department. Licensed handlers are required to have insurance coverage equal to full-market value on all grain in their facilities to protect all or part of their losses in case of fire or other disasters. This section also administers the state grain indemnity fund, which reimburses eligible farmers when a licensed elevator becomes insolvent.

Inspectors examine records and check production facilities for verification that feeds are manufactured properly. They help assure precautions are taken to prevent possible cross-contamination and that feeds are correctly labeled to prevent any prohibited material from being fed to ruminants.

Program staff members work with the U.S. Food and Drug Administration performing inspections to help prevent the occurrence of bovine spongiform encephalopathy. In 2013 there were no violations of these regulations or any serious violations of the U.S. Food and Drug Administration's medicated feed regulations.

Plant Pest Control

Ohio's green industry is one of the highest-value segments of the state's agricultural sector. The Plant Pest Control Program helps protect the state's plant nurseries and consumers by performing annual inspections to detect pests that pose a threat to plants. This section enforces federal and state

quarantines that restrict the movement of articles capable of harboring destructive pests. It provides inspections and phytosanitary certificates for shipments of grain, seed, logs, lumber, greenhouse plants and other agricultural commodities destined for other states and foreign markets. Plant Pest Control staff members also perform exotic pest surveys for destructive insects and disease. Early detection of these pests can increase the likelihood of control and decrease the negative impact to growers or the environment.

In 2013, staff members were involved in the initial detection and response for several serious plant pest problems, including Asian longhorned beetle, boxwood blight, hemlock woolly adelgid, and thousand cankers disease.

The August 2013 samples from walnut trees in Butler County confirmed to be infected with thousand cankers disease marked the first discovery of this destructive fungus in Ohio.

Working closely with the U.S. Department of Agriculture’s Animal and Plant Health Inspection Service, the Plant Pest Control section continues to support the efforts to survey, contain and eventually eradicate the Asian longhorned beetle from southeastern Ohio. Asian longhorned beetle was discovered in Clermont County in June 2011. This invasive beetle poses a threat to Ohio’s hardwood forests (more than \$2.5 billion in standing maple lumber) and the state’s \$5 billion nursery industry which employs nearly 240,000 people. Currently there are 61 square miles under quarantine in Clermont County for the Asian longhorned beetle.

The gypsy moth is a non-native insect threatening our hardwood forest and ornamental plants in Ohio. It will feed on more than 300 different species of trees and shrubs, with oak being its preferred host. The Ohio Department of Agriculture’s Gypsy Moth Program is part of a national integrated pest management program that involves several state agriculture departments along the leading edge of the infestation and the U.S. Department of Agriculture’s Forest Service.

Traps are placed across Ohio to detect, isolate, and monitor gypsy moth populations. Treatments are conducted to suppress, slow the spread of, or eradicate, any developing populations. Currently 51 counties in Ohio are under quarantine for movement of regulated materials.

The Ohio Plant Diagnostic Network is a cooperative partnership between the Ohio Department of Agriculture’s Plant Health Diagnostic Laboratory and The Ohio State University’s C. Wayne Ellett Plant and Pest Diagnostic Clinic. This network brings together research and regulation to more efficiently address Ohio’s plant pest, disease and diagnostic needs; eliminates duplicative functions; and increases response efficiency to pest or disease outbreak. It follows the National Plant Diagnostic Network model and offers remote teaching and diagnostic nodes across Ohio that will facilitate a more rapid response to diseases and pests, as well as provides remote areas of the state with access to educational opportunities.

The Plant Health Diagnostic Laboratory was designed and constructed to meet U.S. Department of Agriculture Animal and Plant Health Inspection Service - PPQ 526 permit containment specifications. The lab is versatile and handles viral, bacterial, fungal, oomycete, and nematode pathogens, as well as insect pests requiring containment conditions.

Safeguarding the Food Supply

Oversees the production,
transportation, and sale
of food in Ohio

Safeguards against dangerous
pathogens in meat, milk,
and produce

Houses the state's
premier food testing
laboratory

Consumer Protection Laboratory

The Consumer Protection Laboratory is Ohio's premier food and agriculture testing lab and carries out an important component of the department's mission to protect the public. Scientists test food, feed, fertilizers, pesticides and animal exhibition and racehorse samples. The lab houses the official Equine Drug Testing Laboratory for the Ohio State Racing Commission. It is the state's primary emergency response lab for biological and chemical terrorism in food and environmental products as a member of the U.S. Department of Agriculture's Food and Drug Administration-sponsored Food Emergency Response Network (FERN). Staff members help assure the safety of and provides consumer protection for, Ohio's food supply, agricultural products and animal competitions and exhibitions.

The lab analyzes samples originating in the food chain - from the farm, through processing and distribution, to the retail level. Microbiologists test dairy products, raw and processed meat products, vegetables, fruits, drinking water and dairy process water for bacteria that cause foodborne illness. Chemists test for dangerous pesticides in Ohio food products. They also confirm the claims made on food and feed labels, evaluate apple juice and cider for Patulin, test maple syrup for lead, and test food samples for extraneous matter in response to consumer complaints. Regulatory action is taken if bacteria or dangerous chemicals are found.

The Analytical Toxicology Laboratory is the official drug testing lab for the Ohio State Racing Commission. Lab staff members test samples from horses competing at Ohio's seven commercial race tracks and more than 60 county fairs for prohibited substances under the commission's medication and drug-related regulations. This internationally renowned laboratory provides testing on approximately 9,000 horses each year.

The Consumer Protection Laboratory was awarded three major competitive federal grants from the Food and Drug Administration and the U.S. Department of Agriculture for response to foodborne outbreaks, emergency management and to provide capacity for any FERN-related projects.

The FERN grant provides funding for method development and surveillance for highly pathogenic agents, such as anthrax, in food. The Consumer Protection Laboratory also provides critical expertise to respond to natural foodborne illness outbreaks or emergencies that are intentionally introduced.

In 2013, Microbiology Laboratory staff members processed more than 12,000 samples resulting in more than 23,000 tests performed to detect common pathogens found in meat and food samples. The laboratory regularly isolated *Campylobacter sp.*, *E. coli O157:H7*, *Listeria monocytogenes*, and *Salmonella sp.* from several different food products such as raw ground beef, hot dogs, and pet food.

Honeybee health has been declining in recent years and has created an adverse effect on crop pollination. One factor implicated in this decline is pesticide exposure. In 2013, chemists performed chemical analyses of several bee and bee-related samples. One or more residues of strazine, acetochlor, metochlor, or etofenprox were detected in some of these samples.

In 2013, chemists in the Consumer Protection Laboratory provided analysis of exhibition animals in Ohio's 94 state, county, and independent fairs. This program, administered by the Ohio Department of Agriculture's Division of Animal Health, is one of the most comprehensive programs in the national for evaluating exhibition animals for illegal drugs. These chemists also provided testing for exhibitions in other states.

The Pesticide Data Program, Microbiology Laboratory, and the Analytical Toxicology Laboratory are all accredited by the American Association for Laboratory Accreditation. In 2013, the Analytical Toxicology Laboratory became the third horseracing laboratory in the nation to be granted full or interim accreditation status by the Racing Medication and Testing Consortium.

Lab Sections	No. of Samples Reported	No. of Tests Reported
Microbiology	12,615	23,150
General Chemistry	4,309	27,403
Pesticides	313	2,075

USDA Pesticide Data Program	1,425	185,205
FERN (FDA and USDA)	504	2,464
Total	33,443	274,721

Dairy

Ohio's Dairy Division helps assure that dairy products produced, transported and processed in Ohio are wholesome and safe for consumers. The division's registered sanitarians work daily across the state to provide critical services through a series of inspections, evaluations and sampling of raw and pasteurized milk products.

Sanitary inspections and sampling serve as the heart of the Ohio Dairy Division in terms of regulating milk producers, milk haulers, and dairy processors. These activities meet or exceed the standards set by the U.S. Department of Health and Human Services, Food and Drug Administration and the U.S. Department of Agriculture. Ohio has adopted the Pasteurized Milk Ordinance as the state's Grade A rules. This ordinance is a model document as it relates to all state regulatory dairy activity and allows for dairy products to move in interstate commerce.

Ohio's Dairy Division staff members play an important role in providing protection to consumers, producers and processors. For example, every supply of milk coming off a farm is tested for drug residues before being made into a variety of dairy products. Every finished product made at processing facilities is tested for bacteria, coliforms, vitamins, standard of identity, chemicals, pesticides and water quality. Additionally, processing plants are inspected quarterly and pasteurization equipment is tested quarterly.

Dairy producers need to pass numerous monthly quality tests that include bacteria, somatic cell counts and water quality.

Producers also undergo a rigorous inspection that is conducted every six months, with additional state, U.S. Department of Agriculture, and Food and Drug Administration oversight.

Staff members evaluate and regulate milk hauling. Proper permitting and evaluating tanks are critical to maintaining safety standards.

The Ohio Department of Agriculture's Consumer Protection Laboratory is a key partner in the efforts of maintaining Food and Drug Administration compliance through housing our lab evaluation officer and performing mandatory evaluations for bacteria, coliform, and antibiotics, among other tests. The lab evaluation officer is charged with educating and maintaining drug residue testers at milk receiving locations across the state. On-site visits and split sample evaluations are conducted to assure the quality of dairy products available to all consumers.

Many developments took place during 2013. Two dairy processors announced planned expansions in Ohio. First was the Daisy Brand Company, maker of sour cream and cottage cheese, which will break ground in the Wooster area in 2014. The other major announcement was the Meijer Corporation, which plans to build a full-service dairy in the Tipp City area. They presently have a grocery and dry goods warehouse at the location. Plans are to be operational in late 2015.

Small on-farm and artisan processors are being licensed. This movement towards local and niche marketing continues to accelerate. Robotic milking machines are another technology that has gain acceptance throughout Ohio. The number of robots has increased more than 25 percent in the last year, with numerous more in the planning stages.

In 2013, Ohio's production was 5.4 billion pounds of milk per year, which was a record for Ohio as milk production in the state was up 1.7 percent. Achieving more than 20,000 pounds of milk per cow kept Ohio as the 11th milk-producing state in the nation, and the 1st in Swiss cheese production. As a result of this robust dairy industry, Ohio has a vital dairy infrastructure within the state and looks forward to partnering with prospective licensees to join in the effort to provide safe and wholesome dairy products.

Food Safety

The Division of Food Safety helps assure consumers are provided foods, over-the-counter drugs, dietary supplements and cosmetics that are safe, unadulterated and honestly presented. Division staff members work toward this goal through regulatory oversight of the wholesale and retail industry and through contracts, partnerships and educational activities with federal, state and local food regulatory agencies.

Division staff members work to increase awareness of food defense and assist operators in assessing their vulnerabilities. Representatives also participated in several key emergency preparedness activities, including Utility Radiological Safety Board, After Action Working Group and Ohio Homeland Security Strategic Analysis and Information Center meetings.

Food Safety Division’s retail staff members continue to offer training and education programs to the local health departments. In 2013, more than 100 trainings and programs were available. These programs addressed farmers’ markets, farm markets, cottage food, reduced oxygen packaging, acidified white rice, process reviews, home bakeries and labeling.

Division of Food Safety inspectors inspect wholesale operations, such as bakeries, canneries, snack food and candy manufacturers, water and soft drink bottlers, seafood processors and food warehouses. Staff members who inspect wholesale operations also perform contract inspections for the U.S Food and Drug Administration and conduct weekly sampling for the U.S. Department of Agriculture’s Pesticide Data Program.

Division staff members conduct a food surveillance sampling program. This includes the routine sampling of ready-to-eat-

foods and then testing for *Listeria monocytogenes*, *E. coli* O157:H7, *Salmonella* and generic *E. coli*. The samples collected included fresh produce, deli salads, sandwiches, bottled water, fresh juices, maple syrup and various imported canned food products.

In conjunction with the Ohio Department of Health, Division of Food Safety staff members disseminated 172 food recall notices to local health officials and the public. The recalls, for a variety of food products, were issued based on bacteriological and allergen concerns.

Division of Food Safety staff and the Ohio Department of Health jointly conduct the Retail Food Safety Advisory Council meetings. These meetings are co-chaired by the directors of agriculture and health with council members representing local health departments, the retail food industry, academia and the consuming public. The council serves as a forum to discuss and resolve issues related to Ohio’s food safety program.

Food Safety staff members hosted a three-day labeling training for state and federal regulators. The training, provided by the American Institute of Baking, covered all aspects of labeling for Food and Drug Administration regulated products. In attendance were employees from Food Safety, Meat and Dairy from the Ohio Department of Agriculture; and employees from various Ohio offices of the Food and Drug Administration.

Food Safety, Plant Health, Animal Health, State Highway Patrol Motor Carriers and the Food and Drug Administration participated in two truck exercises in 2013. These exercises surveyed the types of material trucks were hauling. If a truck was hauling items regulated by the Ohio Department of Agriculture, an inspection was conducted to ensure the safety of the product on the truck. All divisions were working together to survey the trucks as they were sent around to the back of the weigh station. The first exercise was August 20 in Clermont County and the second exercise was held September 19 in Guernsey County. More than 100 trucks were examined between the two exercises and there were no problems found in the moving and handling of plant material, animals or food.

In 2013, Food Safety sent employees to nine Food and Drug Administration training courses offered across the United States. These courses cover all aspects of food safety from basic sanitation, to juice inspections, seafood inspections, canning and produce safety.

Meat Inspection

The Division of Meat Inspection helps assure that all meat and poultry establishments with a state license are producing safe, wholesome and truthfully labeled products in a sanitary environment.

Division staff members oversee 292 slaughter and processing facilities. Of those 213 are fully inspected facilities, which provide products that are eligible for re-sale within Ohio. The remaining establishments operate under a “custom exempt” status and simply provide a “not for sale” service to individuals who wish to have their own animals processed to be consumed by their own families. Division staff members oversee seven establishments that have been selected for the Cooperative Interstate Shipment program. This program allows selected state establishments to ship their state-inspected products in interstate commerce.

The state’s inspection approach is centered on an establishment’s performance, incorporating the concepts of Hazard Analysis and Critical Control Point (HACCP) and Sanitation Operating Procedures. The required HACCP procedures make each fully inspected establishment responsible for safeguarding the meat and poultry product they produce. The sanitary operating procedures help assure the environment in which the establishment operated is maintained in a sanitary manner.

Establishments are expected to develop programs for the control of *Listeria monocytogenes*, *Salmonella* and *Campylobacter* in fresh product. They are also required to have programs on Specified Risk Materials for preventing bovine spongiform encephalopathy in cattle over 30 months of age and *E. coli* O157:H7 and other forms of *E. coli* STEC in beef, along with a variety of other programs to support their food safety system.

Ohio’s charter schools, daycare centers and senior meal programs across the state continues to provide opportunities for caterers and food service operators to provide meals to these growing numbers of consumers. The Division of Meat Inspection is required to inspect such providers if they don’t meet the legal definition of catering. Division staff members provide daily inspection services to facilities that specialize in meal production and continue to work with other prospective facilities to license and enter this market. On average, these facilities produce a total of more than 100,000 meals per day.

The division’s sampling program is a significant tool used to verify an establishment’s food safety system is working. The division conducts sampling frequencies on a wide range of products at a frequency that is comparable to that of the U. S.

Department of Agriculture, Food Safety and Inspection Service. The Food Safety and Inspection Service provides 50 percent of the funding of the program and in order to maintain the program’s “equal to” status, the sampling has to be comparable. In 2013, meat samples were analyzed for *E. coli* O157:H7, *Salmonella*, *Campylobacter* and *Listeria monocytogenes*, the causes of major foodborne illnesses. In the many establishments producing ready-to-eat meat and poultry products, the division has developed a proactive sampling program of the processing establishment environment and product contact surfaces.

Selected state-inspected establishments, as a result of the 2012 Cooperative Interstate Shipment Program approval, are now able to ship their products in interstate commerce. The advantage of qualifying for the program is that the establishment will still be inspected by the same state inspector and they will have all of the United States as a market place, not just Ohio. This is a significant step for Ohio meat and poultry establishments to expand, grow and give others outside of Ohio an opportunity to consume their high quality, unique products.

One establishment in Cleveland estimates their business at the outset will grow by one million dollars a year and they have more out-of-state customers wanting their quality products. A Lorain business estimates their business will triple at the start and their products will be distributed to 45 states. A Baltic establishment has expanded their facility in anticipation of what the ability to ship in interstate commerce means for the “backyard flock” producers for whom they provide slaughter service. An establishment in Wooster is preparing and shipping soups to three states to the east with a likelihood of more soup varieties going to more states in the east. A Columbus establishment is now shipping meat raviolis to the Pacific Northwest. Two catering companies in Cincinnati are now able to provide meals to recipients in Northern Kentucky.

Amusement Ride Safety

Under Ohio law, all amusement rides must be inspected and licensed before operating to assure that they are assembled, maintained, and operated to manufacturer’s specifications and recommendations. Along with the initial inspection, Amusement Ride Safety Division inspectors conduct supplemental and midseason operational inspections on amusement rides. Inspectors evaluate everything from the structural integrity, safety systems, and signage to general ride operations.

Amusement rides inspected under Ohio law vary from mechanical rides, roller coasters, go-karts, water rides at water parks, to inflatable devices. In addition to amusement ride inspections, the division ensures that midway games of skill and side shows operating at all 94 county and independent agricultural fairs and the Ohio State Fair are skillful and properly operated. Annually, 7,000 concession inspections are conducted during these fairs.

Ohio is known for the quality and quantity of its amusement rides. The state is also known for having one of the best inspection programs in the country. Inspectors annually

attend safety seminars sponsored by Amusement Industries Manufacturers and Suppliers and the National Association Amusement Ride Safety Officials. Training includes structural integrity, non-destructive testing, electrical safety, hydraulic systems, braking systems, vehicle harnesses and lap restraints, general signage and ride operations.

In 2013, the department staff inspected licensed and maintained records on 3,589 amusement rides and 592 games in the state. Inspections were conducted at 279 permanent facilities and amusement parks, 35 go-kart facilities, 24 waterpark facilities, and rides owned by 338 portable ride companies.

Enforcement

The Enforcement Division provides support for the Ohio Department of Agriculture’s regulatory divisions in gaining compliance with Ohio’s agricultural laws and regulations. If a business or a person regulated by the department fails to abide by state laws and regulations, Enforcement Division staff members step in to take appropriate action. This may be in the form of notices of violations, letters of warning, administrative action, and or criminal prosecutions. Gaining food safety regulation compliance is especially important because non-compliance can pose a risk to the public’s health and safety. In 2013, the Enforcement Division conducted 225 investigations, 433 random reviews/planned compliance inspections, and embargoed 3,881 pounds of misbranded or adulterated products.

The department has entered into a contract with the Ohio Veterinary Medical Licensing Board authorizing state enforcement agents to conduct investigations regarding

complaints against its licensees in Ohio. The Enforcement Division has been conducting these investigations since October 2000.

The Auctioneer Program is administered by the Enforcement Division. Ohio currently has 3,250 active licensees. There are five license types: auctioneer, apprentice auctioneer, special auctioneer, auction firm, and auctioneer corporation, partnership or association.

The Auctioneer Program issues licenses, gives license examinations, and receives and processes complaints against auctioneers. When a complaint is received, the investigation is referred to the enforcement chief for assignment to an investigator. Once the investigation is complete, the file is reviewed by the Auction Review Committee which consists of the program manager, the enforcement chief and the assigned assistant Attorney General.

In 2013, division staff members facilitated a training for Ohio Department of Agriculture’s Dangerous Wild Animal Response Team. Team members were trained and certified as shotgun operators by the Ohio Peace Officer’s Training Academy to provide security at the Dangerous Wild Animal facility during confinement and transfers.

Livestock Environmental Permitting

Ohio's Division of Livestock Environmental Permitting regulates Ohio's largest livestock and poultry farms. Inspectors assure the farms follow science-based guidelines that protect the environment and allow the facility to remain productive while managing manure, mortalities, flies, rodents and other pests. Livestock inspectors inspect facilities and investigate complaints, and engineers review new permit applications and oversee construction of new facilities.

As of December 31, 2013, there were 204 permitted farms in Ohio. In 2013, staff members issued permits to 54 large livestock and poultry farms, including 17 Permits to Install and 54 Permits to Operate. Of those Permits to Operate, 37 were renewal permits. Permits to Operate allow the farms to operate for a period of five years, at which time they are required to apply for a renewal, which is also valid for five years. In addition, there were 6 Major Operational Changes issued to permitted facilities which authorize construction or expansion projects. At year-end 2013, there were 25 farms that had pending applications that were being processed.

Inspectors conducted 364 inspections during 2013. Of this total, 318 were routine inspections on permitted facilities, 9 were partial inspections and 37 were inspections of Certified Livestock Managers.

Inspectors responded to 24 complaints. Of those, 10 complaints involved dairy operations and 14 involved poultry manure.

Of the total, nine involved manure applications, six were complaints about flies/beetles, one was odor-related, six were on stockpiles and two were investigations on actual discharges to waters of the state. Twenty-seven enforcement actions were issued in 2013, which included 15 warning letters, eight notices of deficiencies, two notices of violation, one notice of hearing and one emergency order.

Certified Livestock Manager training is required for those who manage or handle manure at a major concentrated animal feeding facility or anyone who buys, sells, or land applies more than 4,500 dry tons or 25 million gallons of liquid manure a year.

A two-day training session was conducted during 2013, attracting more than 100 individuals. During 2013, 32 new Certified Livestock Manager certifications were issued and 36 were recertified. Since the program began in 2004, a total of 223 have received certification.

Earlier in 2013, division staff members were successful in completing revisions to the Ohio statutory language that were required by U.S. Environmental Protection Agency. Also in 2013, the division went through an extensive review of existing rules, mostly which were required by the five-year rule review process. These rules will be filed and finalized in the first quarter of 2014. Once these rules are finalized, the Ohio Department of Agriculture will continue to work to finalize the transfer of federal NPDES permitting authority from U.S. Environmental Protection Agency.

Weights and Measures

The Division of Weights and Measures helps assure consumer confidence and equity in the marketplace by administering and enforcing all laws pertaining to true and uniform weights and measures standards. Division staff members work with county and city weights and measures programs to test devices ranging from fuel meters and retail store scanners to vehicle and livestock scales for consistent measuring standards.

Ohio law designates the Director of the Ohio Department of Agriculture as the “State Sealer” of weights and measures. The Ohio Department of Agriculture administers the Metrology Laboratory, which houses the state standards of mass, length and volume. Ohio’s Metrology lab received recognition to the International Standards Organization (ISO) laboratory standard and successfully received accreditation by the National Voluntary Laboratory Accreditation Program 17025 (the accreditation standard for laboratories). This means the lab exceeded standards required by a state standards lab. Ohio’s Metrology Laboratory is one of only 15 state measurement laboratories in the U.S. to achieve the ISO 17025 level of accreditation, which provides necessary traceability for Ohio manufacturers and other businesses using these metrology services.

Ohio boasts one of only four National Type Evaluation Program (NTEP) Laboratories in the nation that test and evaluate new scale designs and technology, keeping Ohio on the cutting edge of today’s technology. The Ohio lab is also authorized by Canada to test for compliance to Canada’s standards and is one of only two state labs in the nation authorized to test scales for compliance to international standards. This means businesses can sell their commercial devices in the U.S. and Canada. The Ohio lab is the only lab in the U.S. authorized to test multi-dimensional devices. National statistics released in 2012 show Ohio’s NTEP laboratory continues to be one of the busiest and most productive in the U.S.

Training more than 140 county and city weights and measures inspectors and keeping them up to date on new technology used in today’s gas pumps and supermarket scales is a huge task. The National Conference on Weights and Measures made significant changes to the testing procedure for scales. In 2013, the Ohio Department of Agriculture provided training regarding these significant issues and other Ohio laws to the state’s 90 local weights and measures offices and all inspectors. Training was also conducted for 347 of Ohio’s 708 registered service people, representing 71 different scale and meter service agencies. This is done as a means to promote uniform inspecting and testing procedures across the state.

Farmland Preservation

The Office of Farmland Preservation strengthens the base of the state’s #1 industry, food and agriculture, by purchasing permanent agricultural easements from landowners who compete to sell them.

An agricultural easement is a voluntary, permanent, legally binding restriction placed on a farm. The easement limits the use of the land to predominantly agricultural activity. The land remains under private ownership and management and stays on the tax rolls. The farmland can be sold or passed along as a gift to others at any time, but the restriction prohibiting non-farm development stays with the land. Agricultural easements are acquired through purchase or donation.

Clean Ohio Local Agricultural Easement Purchase Program (LAEPP), formerly known as the Clean Ohio Agricultural Easement Purchase Program, was launched in 2013. By localizing the program, the department helped build partner capacity by certifying local sponsors to hold and administer their own agricultural easement purchase programs; helped

reduce the administrative role of the state; and helped attract additional federal farmland preservation funds to Ohio.

In the summer of 2013, the Ohio Farmland Preservation Advisory Board recommended the selection of easements to be purchased under the LAEPP pilot funding round. Each of the 17 local partner organizations received an allocation of \$2.7 million. Sponsors forwarded the applications representing the highest scoring farms in their service area, a total of 28 easements covering 4,365 acres, to the department. When the purchase of the easements has been completed, approximately \$5.2 million will have been paid to landowners. These funds circulate in and strengthen Ohio’s rural communities.

All easement transactions are recorded on the property deed and transfer with the land.

Since the beginning of the Clean Ohio purchase program in 2002, the Office of Farmland Preservation has received approximately 2,400 applications, and with available funding, preserved 239 of those farms, totaling 43,956 acres. In addition, easements have been donated on 62 farms totaling 7,316 acres. Including Tobacco easements, Ohioans permanently set aside 54,212 acres in agricultural production.

Ohio Agricultural Security Area (ASA) Program authorizes one or more landowners of at least 500 acres of contiguous farmland to request enrollment an ASA for a 10-year period. Enrollment offers some protection to landowners from roadway, sewer and water assessments. The office provides technical assistance to farmers and local officials. Since 2005, 32,138 acres have been enrolled.

Acres Preserved (2013):

Clean Ohio Ag. Easement Purchase Program 3,179 acres

Acres Preserved to Date (2001-2013):

Clean Ohio Ag. Easement Purchase Program 43,956 acres
 Ag. Easement Donation Program 7,316 acres
 Tobacco Ag. Easement Purchase Program (2002) 2,940 acres
 Total (2001-2013) 54,212 acres
 Agricultural Security Areas 32,138 acres

Ohio Century and Bicentennial Farms Program

In 2013, the Ohio Department of Agriculture recognized 103 century or bicentennial farms owned by the same family for at least 100 or 200 consecutive years. There are now more than 1,000 of these farms registered across the state.

Each family received a certificate signed by Governor John R. Kasich and Director Daniels to keep with their historic documents and pass down to future generations.

The Ohio Bicentennial and Century Farm program is a voluntary program administered by the Ohio Department of Agriculture. The department has been recognizing families who have owned their farms for at least 100 years since 1993.

In 2013, the department began officially recognizing bicentennial farms in acknowledgment of the growing number of century farms that had reached their 200-year anniversary

of same-family ownership. To kick off the new Bicentennial Farm designation, Director Daniels presented certificates to those who qualified and were already enrolled in the program.

This Clinton County farm has remained in John Levo’s family since 1902. John and Kathy represent the fourth generation of family ownership. Their son David is an architect in New York City, and daughter Jennifer, a graphic designer, lives in Portland, Oregon.

Markets

When consumers buy Ohio-grown, raised or processed products, they help support local farmers and economies and the state's multi-billion dollar food and agriculture industry.

The Markets Division provides marketing services to Ohio's food and agricultural sectors to help retain and create jobs and enhance their competitive advantage in Ohio and the United States.

Ohio Proud is the state's domestic marketing program that promotes Ohio food and agricultural products within Ohio's borders and beyond. The logo helps consumers identify foods that are made in Ohio and grown in Ohio. Ohio Proud supports the state's goal to provide safe, local foods to consumers and to create new opportunities for Ohio growers, producers and processors. In 2013, Ohio Proud had 505 partners.

The Ohio Proud program celebrated its 20th year as it was unveiled at the 1993 Ohio State Fair. A special logo was created for the commemorative birthday. First Lady Karen W. Kasich participated in the celebration.

In 2013, holiday videos offering suggestions for Ohio Proud themed gift baskets were also created and posted on social media. These gift baskets were then delivered to local radio and television stations encouraging them to promote Ohio products during the holidays.

Division of Markets staff helped implement the Agriculture is Cool! program at the Ohio State Fair. In 2013, fourth-grade students and their parent received free admittance to the state fair and had the opportunity to learn about Ohio agriculture. Students were encouraged to visit various educational stations on the fairgrounds and then write an essay about why agriculture is cool. Four winning students were presented with \$500 scholarships.

Ohio Grape Industries

The Ohio Grape Industries Program oversees promotional, research and production funds for the grape and wine industries, as determined by the Ohio Grape Industries Committee.

In accordance with state law, the director of the Ohio Department of Agriculture serves as chairman of the nine-member committee, whose activities are funded from a portion of the excise tax on the sale of wine in Ohio.

The program serves as the marketing and promotional advocate of Ohio's grape and wine industries. The program also supports grape growers by funding research and extension programs focusing on viticulture (cultivating grapes), entomology, plant pathology, and weed science.

Ohio is home to nearly 200 wineries that produce more than 1.1 million gallons of wine per year. Ohio also has more than 1,600 acres of grapes, with Riesling the most widely grown variety.

The Ohio Grape Industries Committee contracted with Frank Rimerman/MKF Research to conduct the 2012 Economic Impact Study. Highlights from the study show:

- Full economic impact of Ohio wine and grapes - \$786 million (34% increase from 2008)
- Provide 5,291 full-time jobs (nearly 1,200 additional jobs created since 2008)
- 175 licensed wineries (up 41% from 2008)
- Ohio is the 7th largest wine producer in the country, producing 1.2 million gallons of wine

- Ohio is the 9th largest grape producer with just over 1,900 acres
- 2.74 million people visit Ohio wineries annually

In June 2013, the Ohio Grape Industries Committee debuted the Ohio Wines Visitor Incentive Program for Ohio Wine Month. Since the program's inception more than 6,200 consumers have signed up for the program, which rewards consumers for visits to the state's 116 participating wineries.

The committee approved funding to publish the second annual custom Ohio wine publication – Ohio Wines Love at First Sip. Great Lakes Publishing produced this publication. The 2013 edition included the new 2013 Ohio Wine Guide, as well as Ohio wine editorial and advertisements. The magazine helps to create and market regional identities for each of Ohio's wine regions, including the Appalachian, Canal Country, Capital City, Lake Erie Shores and Islands, Ohio River Valley and Vines and Wines wine regions.

There were 150,000 copies of the 40-page magazine printed and distributed at various locations including convention and visitor's bureaus, AAA offices, Ohio Department of Transportation travel information centers, hotels and lodging businesses, state parks and wineries.

A digital version of the magazine is available on-line: www.glpublishing.com/digitaleditions/loveatfirstsip/index.html.

Acknowledgements

Estimates made by the Ohio Field Office are based on information supplied by farmers and agri-businesses. These estimates are the result of the data collected on probability designed surveys. Considerable information is collected from farmers randomly selected for telephone or personal interviews. Data for county estimates are collected from a large mail survey, and where available, check data are used to the extent possible.

March	28,188	28,589	2,320	2,319	654	663
April	28,249	28,401	2,230	2,250	630	639
May	28,133	28,489	2,293	2,362	645	673
June	27,896	28,672	2,208	2,277	616	653
July	27,491	28,640	2,292	2,304	630	660
August	27,338	28,656	2,323	2,352	635	674
September	27,361	28,660	2,233	2,359	611	676
October	27,974	28,607	2,345	2,461	656	704
November	28,521	28,715	2,374	2,372	677	681
Total ²	28,008	28,535	274	271	7,685	7,988

1/ December preceding year. 2/ For layers columns this is average for the year. For eggs per 100 layers columns this is total egg production divided by average number of layers on hand.

TABLE 41

Egg Production, Price and Value, Ohio and United States, 2012-2013¹

Item	Ohio		United States	
	2012	2013	2012	2013
Eggs Produced (million eggs)	7,685	7,988	93,292	95,176
Value of Production (\$1,000)	523,067	574,767	7,851,830	8,498,935

1/ Estimates cover the 12 month period Dec. 1, previous year through Nov. 30.

TABLE 42

Broiler Production, Price and Value, Ohio and United States, 2012-2013¹

Item	Ohio		United States ²	
	2012	2013	2012	2013
Number produced (1,000 head)	63,200	70,100	8,463,000	8,524,800
Pounds produced (1,000 pounds)	379,200	406,600	49,655,600	50,626,700
Value of production (\$1,000)	189,600	246,400	24,827,800	30,679,781

1/ Broiler production including other domestic meat-type breeds. 2/ Excludes states producing less than 500,000 broilers.

TABLE 43

Turkey Production, Price and Value, Ohio and United States, 2012-2013

Item	Ohio		United States	
	2012	2013	2012	2013
Number produced (1,000 head) ¹	5,500	5,500	253,500	240,000
Pounds produced (1,000 pounds)	217,250	224,950	7,561,905	7,276,800
Price per pound (dollars) ²	³	³	0.721	0.665
Value of production (\$1,000)	156,637	149,592	5,452,135	4,839,072

1/ Based on turkeys hatched September 1, previous year, through August 31, current year. Excludes young turkeys lost. 2/ Liveweight equivalent price. 3/ State level price per pound discontinued.

TABLE 44

Bee Colonies and Honey Production, Ohio, 2009-2013¹

Year	Honey Producing Colonies	Yield Per Colony	Production	Stocks Dec 15 ²	Average Price Per Pound ³	Value of Production
	Thous.	Pounds	Thous. Pounds	Thous. Pounds	Cents	Thous. Dollars
2009	11	50	550	132	281	1,546
2010	18	62	1,116	346	228	2,544
2011	15	66	990	228	234	2,317
2012	18	60	1,080	410	246	2,657
2013	17	45	765	390	321	2,456

1/ For producers with 5 or more colonies. 2/ Stocks held by producers. 3/ Prices weighted by sales.
