The US Department of Agriculture's (USDA) National Agricultural Statistics Service's (NASS) – Ohio Field Office is pleased to present the 2020 - 2021 edition of *Ohio Agricultural Statistics Annual Bulletin*. This publication, which is also available on our web site, is a compilation of the many statistical reports published over the past year that highlight Ohio's diverse agriculture sector.

The statistics in this bulletin showcase this diversity and are used on a regular basis to make informed decisions by producers, consultants, advisors, government officials, and others. The compilation of this bulletin is a product of the partnership between the Ohio Department of Agriculture and NASS.

I would like to extend a special thanks to all those producers, agri-businesses, commodity groups, and countless others who have given their valuable time to provide the information that serve as a basis for these data. Their responses are through the Internet, mail, via telephone, and face-to-face interviews.

Special thanks also go to the National Association of State Department of Agriculture enumerators for their outstanding work in collecting and providing timely and accurate data. Without their dedication to Ohio agriculture, we would be unable to successfully provide these many data.

The Census of Agriculture is conducted by NASS every 5 years. The 2017 Census of Agriculture was released in April 2019. Results include information on farm numbers, acreage, crops, livestock, income, expenses, and demographics at the county, state, and national level. The wide-array of Census data are used by policy makers, universities, communities, and organizations throughout Ohio and the United States to plan for the future and compete for valuable resources. We thank Ohio's producers for their cooperation and providing the information which helps ensure the success of Ohio agriculture.

The 2022 Census of Agriculture will be mailed out in December 2021 with an anticipated release date in early 2024. We encourage all of Ohio agriculture to be counted and respond to the 2022 Census of Agriculture.

Good decisions can only be made with good information. Our agency continually strives to meet our mission of providing timely, accurate, and useful statistics in service to U.S. agriculture. Thanks again to all those who provided, collected, and analyzed the data in this publication. If you have any questions about these data or need any additional information, please visit our web site at www.nass.usda.gov and/or contact our office at (614) 728-2100. We look forward to serving you.

Sincerely,

Cheryl Turner

August 1, 2021

I am proud to jointly issue the Ohio Agricultural Statistics 2020-2021 Annual Bulletin, a cooperative publication between the Ohio Department of Agriculture and the United States Department of Agriculture, National Agricultural Statistics Service, Ohio Field Office.

This publication helps quantify the value of Ohio's important food and agriculture industry. The information in this publication helps local, state, and federal leaders understand the importance of agriculture to make informed decisions and helps us carry out one of our important missions of educating the public about the diversity and scope of Ohio's number one industry.

On behalf of the State of Ohio and the Ohio Department of Agriculture, thank you for all that you do to support Ohio agriculture.

Sincerely,

Dorothy Pelanda
Director
