

Ohio Crop Weather

OH-CW3621

September 7, 2021

Temperate Weather

Cooler temperatures coupled with rainfall made for a pleasant week, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Soil moisture levels remained conducive to crop needs with 72 percent of Ohio topsoil rated adequate to surplus, up 8 points from last week. Temperatures for the week ending September 5 were 1.4 degrees above normal, while the State averaged 1.45 inches of precipitation, 0.63 inches above normal. There were 5.0 days suitable for fieldwork for the week ending September 5.

Livestock enjoyed the cooler weather and lower humidity last week. Fall army worms were troublesome in some **hay** fields last week and caused losses for some farmers. **Tomatoes** harvested for the processing market and **corn** silage harvest were in full swing. Corn and **soybeans** were maturing rapidly. Seventy-three percent of Ohio corn was in or past dent; 19 percentage points more than the 5-year average.

Soil Moisture: Week Ending 09/05/21

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
