

# Tennessee Crop Weather

Tennessee Field Office • PO Box 40627 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday, June 10, 2024, 3:00 PM

For the Week Ending June 9, 2024

## PROGRESS CONTINUES IN DRY TIMES

Tennessee saw a week of mostly dry weather. Producers took opportunities to continue work where available. Planting continued during dry patches across the state. Some producers are still waiting for fields to dry enough to finish planting. Hay harvest has been particularly challenging with little time for the cut hay to cure as there are few dry days. Additionally, some hay is being cut late, past the peak nutritional content stage. Vegetable producers are reporting disease pressure. Statewide, there were 4.4 days suitable for field work last week. Topsoil moisture was 2 percent short, 77 percent adequate, and 21 percent surplus. Subsoil moisture was 2 percent short, and 72 percent adequate, and 26 percent surplus.

CROP PROGRESS					CONDITION					
Item	This Week	Last Week	2023	5 Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent
