- 1/ Utilized production - The sum of fresh market and processed do not equal the utilized production for 1930-1958 because home use is not included in the breakdown.
- 2/ Prices - Season average price estimates were started in 1919 and represent an "as sold" price. The basis for price changed in 1949 to an equivalent PHD price (packinghouse door or processing plant door).
- 3/ Prices - Separate price estimates started in 1949 for fresh market and processed. Prices not published for type of processing to avoid disclosure of individual operations.
- 4/ Processed - Quantity estimates started in 1930. Quantity processed for 1954-55, 1957-69 combined with fresh market to avoid disclosure of individual operations.
- (D) Estimates not published to avoid disclosure of individual operations.
