WEST VIRGINIA BULLETIN

National Agricultural
Statistics Service

West Virginia
Agricultural Statistics

Agriculture has been my life. Even before I began my five-decade career at the West Virginia Department of Agriculture (WVDA), I was the state and national FFA president. And for as long as I can remember, I helped my family with the work that needed to be done on our farm.

It's hard to measure what agriculture has meant to me – it's been such an integral part of my working life. And it's even more difficult to measure what agriculture means to all of us because it's a fundamental part of everyone's daily life – whether or not they've ever stood in a corn field or sat on a tractor.

But every year the National Agricultural Statistics Service (NASS) West Virginia Field Office does just that. They gather, analyze and distribute reams of farm data. That information is vital to state and national decision-makers who set agricultural policy. It's also important to the general public because it provides them with a snapshot of the surprisingly vast, but often unnoticed, industry that is agriculture.

This booklet documents the work of the Mountain State's 23,000 family farms, which generate over a half-billion dollars' worth of economic impact for the state, while preserving our rural heritage and our history of self-reliance.

I will be retiring from the WVDA and returning to the farm I grew up on in January, so this will be the last time this message from me will appear in these pages. I would like to

thank all the people who have supported me throughout the years, and all the farmers out there whose work we all depend upon every day. I also want to thank the dedicated staff of NASS, here in West Virginia and throughout the nation, who each year shine a light on the important work of farmers.

Agriculture made America great, and it remains the cornerstone of American exports. I hope this report helps more people understand the scope of agriculture in this state and country, and its importance to our society and our economy.

Sincerely,

Gus R. Douglass
West Virginia Commissioner of Agriculture

CROPS

CROPS

GENERAL

Winter weather across the state was seasonally cold with scattered light snow accumulations followed by heavy rains during March and April. As a result of these rains, flood watches and warnings were common for the entire state. Very wet spring weather continued for the Mountain State in April due to a storm system that crept over the region dumping as much as four inches in some locations. The continuous rain made it very difficult for farmers to plow fields and begin planting. The remainder of the year provided better conditions for growing crops.

ALL HAY

All hay harvested area in 2011 totaled 640,000 acres, up 20,000 acres from 2010. The average yield in 2011 was 2.04 tons per acre, up 0.5 tons per acre from 2010. Production totaled 1,306,000 tons, up 354,000 tons from 2010. Value of production totaled \$121.58 million, 34 percent higher than in 2010. Price per ton averaged \$93.00, \$2.50 less than the 2010 average price.

ALFALFA & ALFALFA MIXTURES

Alfalfa hay area harvested totaled 20,000 acres in 2011, unchanged from 2010. Yields in 2011 averaged 3.3 tons per acre, up 0.7 of a ton from 2010. Production totaled 66,000 tons, up 14,000 tons from 2010. Value of production totaled \$11.22 million, up 39 percent from 2010. Average price per ton was \$170.00, up \$15.00 from the revised price for 2010. New seedlings of alfalfa and alfalfa mixtures in 2011 are estimated at 4,000 acres, up 1,000 from 2010.

OTHER HAY

All other hay area harvested totaled 620,000 acres in 2011, up 20,000 acres from 2010. Yields averaged 2.0 tons per acre, up 0.5 tons per acre from 2010. Production totaled 1,240,000 tons, up 340,000 tons from 2010. Value of production totaled \$110.3 million, 33 percent more than 2010. Price per ton averaged \$89.00, \$3.00 less than the 2010 average price.

CORN

Area planted to corn for all purposes in 2011 totaled 48,000 acres, unchanged from 2010. Harvested area for grain totaled 31,000 acres, up 2,000 acres from 2010. The average yield of 114.0 bushels per acre was up 24 bushels from the previous year. Production was 3.5 million bushels, up 35 percent from 2010. Value of production totaled \$23.5 million, up 57 percent from 2010. Average price per bushel was \$6.65, up \$0.90 from the revised average for 2010. Corn for silage area harvested was 15,000 acres in 2011, down 2,000 acres from 2010. Yields averaged 15.0 tons per acre which was up 2.5 tons from 2010. Silage production was estimated at 225,000 tons, up 6 percent from 2010.

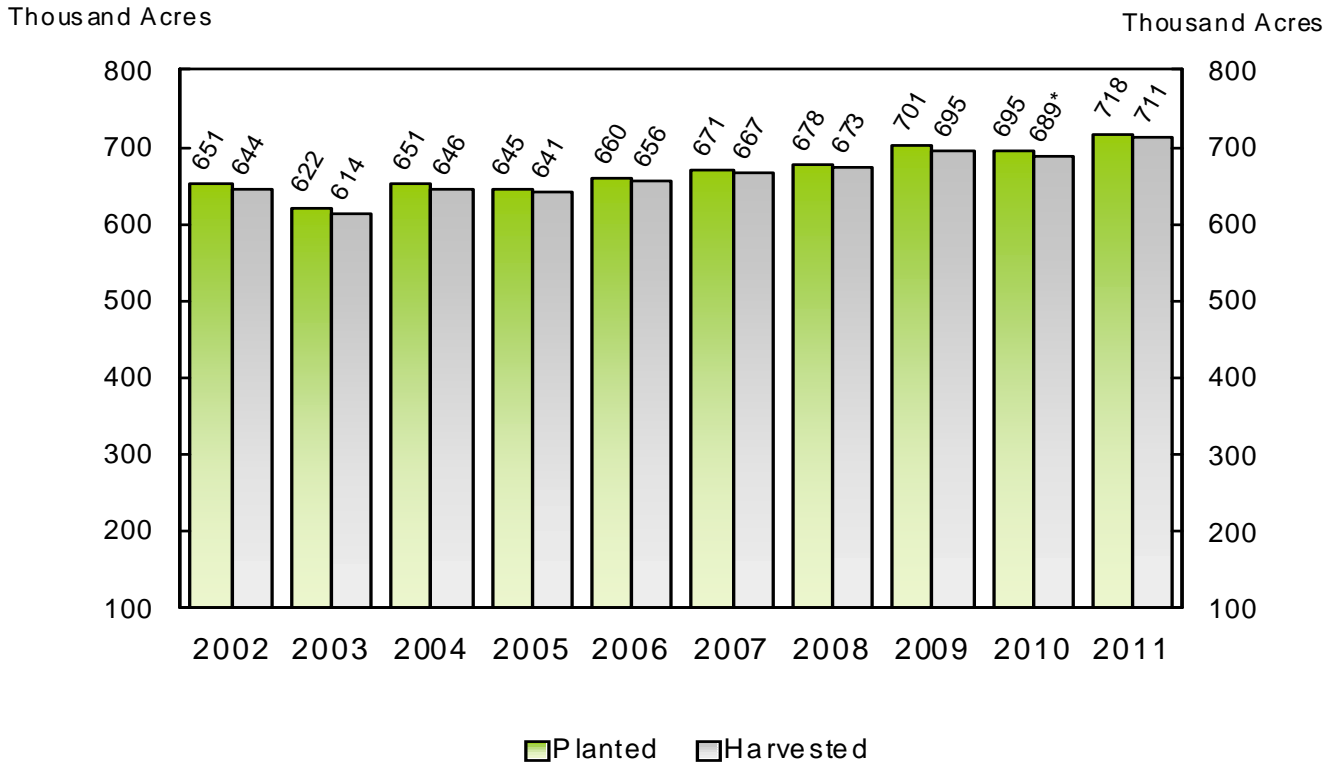

SOYBEANS

Area planted to soybeans totaled 20,000 acres, unchanged from 2010. Area harvested for soybeans totaled 19,000 acres, up 1,000 acres from 2010. The yield for soybeans in 2011 averaged 43.0 bushels per acre, up 13.0 bushels per acre from 2010. Production was estimated at 817,000 bushels, up 51 percent from 2010. Value of production totaled \$9.64 million, a 49 percent increase from 2010. Price per bushel averaged \$11.80, down \$0.20 from the revised 2010 average price.

WHEAT

Wheat planted acres totaled 10,000 for the 2011 crop, up 3,000 acres from 2010. Area harvested for grain totaled 6,000 acres, up 1,000 acres from 2010. The average yield for 2011 was estimated to be 59.0 bushels per acre. This was up 5 bushels from the previous year. Production was estimated at 354,000 bushels, up 31 percent or 84,000 bushels from 2010. Value of production totaled \$2.32 million, a 61 percent increase from the revised 2010 crop. Price per bushel averaged \$6.55, up \$1.22 from the revised price in 2010.

AREA PLANTED and HARVESTED Principal Crops

VALUE OF PRODUCTION ^{1/2/} Principal Crops

^{1/} Value of production is computed by multiplying the market year average price by production. Value of production estimates relate to the crop year. These estimates should not be confused with cash receipts, which relate to sales during a calendar year irrespective of the year of production. Principal crops include corn for grain, soybeans, winter wheat, hay and tobacco. ^{2/} Estimates in 2006 and later exclude tobacco as a principal crop. 2011 data will be published in *Crop Values 2012 Summary* released February 2013. * Revised.

WHEAT PRODUCTION 2002-2011

FRUIT

Orchards in West Virginia got off to a slow start with the cool wet spring in 2011. Windy and wet conditions proved less than optimal for pollination but favorable for fire blight and scab infection. In spite of the weather and pressures from insects, orchards were consistently reported in 'Good' condition during the year. In 2011, apple and peach production was up from the previous year. Prices for apples increased while prices for peaches decreased in 2011. The state's total apple production for 2011 was 67 million pounds, up 5 percent or 3 million pounds from 2010.

Value of utilized production, at 11.4 million dollars, was up 2.6 million dollars from the 2010 value. Peach production, at 5,700 tons, was up 8 percent from 2010. Value of utilized production totaled 4.69 million dollars, an increase of 1 percent from 2010. Nationally, total apple production for 2011 was 9.4 billion pounds, up 1 percent from the 2010 level. Total peach production was estimated at 1.07 million tons, down 7 percent from the 2010 estimate. Based on utilized production, West Virginia ranks 9th in the nation for apple production and 13th in the nation for peach production.

LIVESTOCK

LIVESTOCK

CATTLE

All cattle inventory as of January 1, 2012, was 390,000 head, up 20,000 head from the January 1, 2011, inventory. The inventory value for cattle was estimated at \$386.1 million, up 24 percent from the 2011 value of \$310.8 million. Value per head averaged \$990, up \$150 from 2011. The 2011 calf crop was 185,000 head, down 8 percent or 15,000 head from 2010. All cows that have calved, at 205,000 head, were down 2 percent from 2011. Beef production for 2011 totaled 133.9 million pounds live weight, down 9 percent from the 2010 production of 147.9 million pounds. Marketings totaled 129.2 million pounds, down 18 percent from 2010 marketings of 157.8 million pounds. Value of production increased from \$106.4 million in 2010 to \$141.6 million in 2011. Gross income, including home consumption, totaled \$143.8 million, increasing 19 percent from the 2010 value of \$120.8 million.

MILK

The average number of dairy cows in West Virginia during 2011 was 10,000 head, unchanged from 2010, which was a record low for West Virginia. Milk cow market year average price received for a West Virginia milk cow averaged \$1,470.00, up from \$1,300.00 in 2010. The total milk produced was 156 million pounds for 2011, down 1 million pounds from 2010. There were 154 million pounds marketed in 2011, down 1 million pounds from 2010. Cash receipts from the milk marketed totaled \$32.0 million, up 22 percent from the cash receipts of \$26.2 million in 2010. The gross producer income, including home consumption, totaled \$32.2 million, up 22 percent from the \$26.4 million in 2010.

HOGS AND PIGS

Hog and pig inventory as of December 1, 2011, totaled 5,000 head, the same as the 2010 total which was a record low. The inventory value was estimated at \$600,000 up 9 percent from the value of \$550,000 for 2010. The pig crop totaled 7,000 head, up 23 percent from the 2010 total of 5,700 head. Pork production for 2011 was 1.9 million pounds, up 48 percent from 2010. Marketings of 1.3 million pounds during 2011 were 9 percent above the 2010 total marketings of 1.2 million pounds. The value of production was \$1.3 million, 87 percent above the 2010 value of production of \$699,000. The gross income from hog production, including home consumption, totaled \$1.2 million, an increase of 54 percent from the 2010 value of \$798,000.

SHEEP AND LAMBS

Sheep and lamb inventory on January 1, 2012, was estimated at 33,000 head, down 1,000 head from January 1, 2011. The inventory value at \$7.2 million was up from the value of \$5.6 million in 2011. Value per head averaged \$219.00, up \$55.00 from 2011. The 2011 lamb crop totaled 31,000 head, unchanged from the previous year. Sheep shorn in 2011 totaled 21,000 head, down 2,000 head from 2010. The average fleece weight was 6.0 pounds, giving a production of 126,000 pounds, up almost 1 percent from the 2010 production of 125,000 pounds. The average price per pound for wool was 82 cents, up 34 cents from the previous year. Value of production for wool totaled \$103,000, up 72 percent from 2010.

GOATS

Meat and other goat inventory (excluding milk and angora goats) on January 1, 2012, totaled 23,000 head, down from the January 1, 2011 inventory of 24,500 head. Milk goat inventory totaled 2,500 head, unchanged from last year. Angora goat inventory was not published to avoid disclosing individual operations.

TROUT

The total value of fish sold for 2011 was 880 thousand dollars. In 2010, the commercial trout producers in West Virginia had a total value of fish sold of 863 thousand dollars for the 12 month period from January 1, 2010 - December 31, 2010. Trout losses in 2011 totaled 76,000 pounds, up from the 2010 total of 66,000 pounds. The number of trout losses in 2011 totaled 66,000 fish, down

from the 2010 total of 139,000 fish. The number of trout 12 inches or longer sold during 2011 totaled 370,000 fish, down from 490,000 fish in 2010. The average price per pound was \$1.70, down 24 cents from 2010. The value of sales for the 2011 marketing year was 860 thousand dollars, up from 826 thousand dollars in 2010. Other size categories are not published to avoid disclosure of individual operations.

POULTRY

POULTRY

CHICKENS

The total number of chickens on hand December 1, 2011 (excluding broilers) was 1.45 million head, down 25 percent from the number of head in 2010. The value per head at \$5.40 was down 20 cents from the value of \$5.60 per head in 2010. Total inventory value was \$7.8 million, down 28 percent from the 2010 total value. Value of sales of chickens (excluding commercial broilers) was \$1.46 million, down from \$2.03 million in 2010.

EGGS

Egg production in West Virginia during the production year (December 1, 2010 - November 30, 2011) totaled 237 million eggs. This was 11 percent lower than the 2010 production of 267 million eggs. Layer numbers during 2011 averaged 1.08 million, down 10 percent from the average number of layers in 2010. The average annual production per layer was 220 eggs, 3 eggs less than the 2010 average. The average price per dozen was \$2.00, up from the price of \$1.75 in 2010. The total value of production was \$39.4 million, up 1 percent from the value of \$38.9 million in 2010.

BROILERS

There were 85.4 million broilers produced in West Virginia during 2011, 3 percent below the 2010 production of 87.6 million. Total live weight production was 341.6 million pounds, down from 346.0 million pounds in 2010. Value of production totaled \$159.2 million, down 5 percent from the value of \$166.8 million in 2010. The average live weight equivalent price of \$0.47 per pound was down from the 2010 price of \$0.48 per pound.

TURKEYS

Turkeys raised in West Virginia totaled 3.3 million birds, up 6 percent from the 2010 total. Total production was 92.4 million pounds, up 5 percent from the revised total of 87.7 million pounds produced in 2010. Value of production totaled \$63.0 million, up 20 percent from the revised total of \$52.6 million in 2010. The average live weight equivalent price of \$0.68 per pound was up 8 cents per pound from \$0.60 per pound in 2010.

VALUE OF PRODUCTION AND SALES

The combined value of production from eggs, broilers and turkeys and the value of sales from chickens in 2011 was \$263.1 million, up 1 percent from the revised combined value of \$260.3 million in 2010.

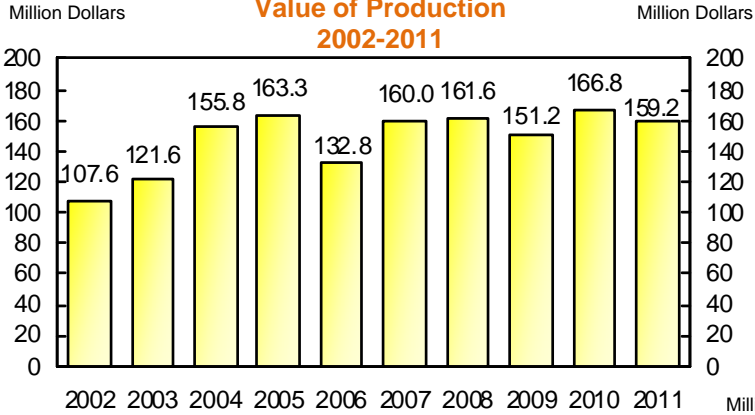

EGGS: Production, Disposition and Income, 2002-2011

Year	Layers ^{1/}	Eggs Produced per Layer ^{2/}	Total Eggs Produced	Price per Dozen ^{3/}	Value of Production
	(000) Birds	Number	Million Eggs	Dollars	(000) Dollars
2002	1,223	214	262	1.40	30,602
2003	1,231	220	271	1.51	34,128

^{1/}Excludes land rented on a whole farm, share and per head basis. ^{2/}Data from the 2007 Census of Agriculture. Cropland acres includes cropland: harvested, used only for pasture, on which all crops failed or were abandoned, and idled or used for cover crops or soil improvement. Permanent pasture acres include grazable land that does not qualify as woodland pasture or cropland pasture. ^{3/}Includes land used for row crops or hay. ^{4/}Includes counties not published to avoid disclosing individual operations.

^{1/} Data for 2011 were not available at the time of publishing. Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value added is the sector's contribution to the national economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. ^{2/} A positive value of inventory change represents current-year production not sold by December 31. A negative value (in parentheses) is an offset to production from prior years included in current-year sales. N/A - Not available. * Revised.

CHARTS

West Virginia Number Of Farms 1911 - 2011

The number of farms in 2011 was 22,500.
The number of farms in 1978 was a record low of 19,600.
The record high was in 1935 with 105,000 farms.

Total
Number

United States Number Of Farms 1911 - 2011

The number of farms in 2011 was 2,181,000.
The number of farms in 2006 was a record low of 2,088,790.
The record high was in 1935 with 6,813,700 farms.

Total
Number

This chart shows the per capita consumption of the United States resident population for beef, chicken, pork and lamb from the years 1909 to 2009 with these exceptions: prior to 1930, except for the war years, 1917-1919, resident population only; in the year of 1930 and after, the population included the Armed Forces overseas. Currently, chicken is the meat of choice, followed by beef, pork, and lamb. Per capita consumption of selected red meats and poultry during 2009 was as follows: chicken ~ 80.0 pounds; beef ~ 60.8 pounds; pork ~ 49.6 pounds; and lamb ~ 1.0 pound. Data for 2010 were not available at the time of publishing.

* Comparison data on retail-weight equivalent of turkeys was not available. Revised from previous year.

100 Years of Cattle and Calves Inventory in West Virginia

The cattle and calves inventory on January 1, 2012 is near record low with an inventory of 390,000. The record low was recorded in 1868 with an inventory of 362,000 head. The record high was recorded in 1944 with an inventory of 628,000 head.

Total Inventory

100 Years of Cattle and Calves Inventory in the United States

The cattle and calves inventory on January 1, 2012 was 90.8 million. The record low was recorded in 1867 with an inventory of 28.6 million head. The record high was recorded in 1975 with an inventory of 132.0 million head.

Total Inventory
