**December Summary of Weather and Agricultural Conditions
November 25, 2024 - January 5, 2025**

For the week ending December 1st, West Virginia began the week dry and remained dry through the day with well above average temperatures. Cold fronts moved in bringing periods of rain and snow and freezing temperatures. The week ended very cold and mostly dry with a few snow flurries. Overall, the Mountain State was cold with near normal precipitation. **For the week ending December 8th,** the week began very cold and dry after a strong cold front. All stations were 10 to 20 degrees colder than normal. During the week, cold temperatures stayed and brought snow showers. High pressure, with warmer temperatures, arrived back into the region for the weekend. This week was colder and drier than usual. **For the week ending December 15th,** the week began warmer than normal. Rain showers from a disturbance began early and spread eastward through the day, tapering off in the afternoon. Colder temperatures moved in Wednesday, bringing snow showers. The week ended rainy in the lowlands with mixed precipitation in the mountains. This week was mostly wet with near normal temperatures. **For the week ending December 22nd,** Monday was very warm with southerly winds ahead of another cold front approaching. The cold front, along with rain showers, slowly drifted eastward late in the afternoon. A few isolated showers remained until Tuesday morning, but quickly cleared out to become mostly sunny. More rain, and isolated thunderstorms, arrived again early Wednesday. Periods of light snow/rain showers continued into the weekend. Sunday was clear and cold. **For the week ending December 29th,** the week began warm and cloudy with some rain showers. More warm temperatures and some lingering precipitation lasted into Tuesday, before the high pressure set in for the rest of the work week. Temperatures continued to rise heading into the weekend. The week ended as a strong cold front moved over West Virginia. **For the week ending January 5th,** the week began with rainfall in the lowlands and snow in the higher elevations. Heading into Tuesday, high pressure took hold with warmer than normal temperatures for the season that lasted until Friday afternoon. A low pressure system approached from the west and brought some snow. Saturday was very cold and dry. Later, a strong cold front approached from the west. This system was cold enough to bring snow to most locations north of the coal fields. The southernmost counties reported mostly freezing rain. The rest of the Mountain State received between two and ten inches of snow. The first half of the week was warmer than normal, the last half was well below normal. Overall, West Virginia was slightly cooler than average.

Week ending 12/1: Williamson had the highest recorded temperature of 69 degrees. Elkins, Martinsburg, and Marlinton had the lowest recorded temperature of 16 degrees. The state average temperature was 37 degrees. Morgantown had the highest recorded amount of precipitation with 1.24 inches. Bluestone Dam had the lowest recorded amount of precipitation with 0.22 inches. The state average precipitation was 0.65 inches.

Week ending 12/8: Williamson had the highest recorded temperature of 66 degrees. Elkins and White Sulphur Springs had the lowest recorded temperature of 8 degrees. The state average temperature was 29 degrees. Pineville had the highest recorded amount of precipitation with 0.75 inches. Martinsburg and Charles Town had the lowest recorded amount of precipitation with 0.01 inches. The state average precipitation was 0.40 inches.

Week ending 12/15: Charleston had the highest recorded temperature of 66 degrees. Keyser had the lowest recorded temperature of 16 degrees. The state average temperature was 39 degrees. Martinsburg had the highest recorded amount of precipitation with 2.26 inches. Wheeling had the lowest recorded amount of precipitation with 0.49 inches. The state average precipitation was 1.33 inches.

Week ending 12/22: Bluefield and Williamson had the highest recorded temperature of 62 degrees. Elkins had the lowest recorded temperature of 7 degrees. The state average temperature was 35 degrees. Ripley had the highest recorded amount of precipitation with 1.24 inches. Martinsburg had the lowest recorded amount of precipitation with 0.14 inches. The state average precipitation was 0.79 inches.

Week ending 12/29: Morgantown had the highest recorded temperature of 71 degrees. Moorefield had the lowest recorded temperature of 8 degrees. The state average temperature was 42 degrees. Bluestone Dam had the highest recorded amount of precipitation with 1.14 inches. Moorefield had the lowest recorded amount of precipitation with 0.14 inches. The state average precipitation was 0.54 inches.

Week ending 1/5: Williamson had the highest recorded temperature of 66 degrees. Elkins had the lowest recorded temperature of 4 degrees. The state average temperature was 32 degrees. White Sulphur Springs had the highest recorded amount of precipitation with 2.17 inches. Charles Town had the lowest recorded amount of precipitation with 0.30 inches. The state average precipitation was 1.06 inches.
