Wisconsin **corn** production is forecast at 540 million bushels, down 1 percent from the previous year, according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of September 1, yields are expected to average 183.0 bushels per acre, down 2.0 bushels from the August 1 forecast but up 3.0 bushels from last year. Corn planted acreage is estimated at 3.95 million acres. An estimated 2.95 million of the acres planted will be harvested for grain, down 50,000 acres from the previous forecast. Acreage updates were made based on a thorough review of all available data.

**Soybean** production is forecast at 113 million bushels, down 1 percent from 2021. The yield is forecast at 53.0 bushels per acre, 1.0 bushel higher than the August forecast but 2.0 bushels lower than 2021. Soybean planted acreage is estimated at 2.16 million acres. An estimated 2.13 million of the acres planted will be harvested, down 90,000 acres from the previous forecast. Acreage updates were made based on a thorough review of all available data.

The forecasts in this report are based on September 1 conditions and do not reflect weather effects since that time. The next crop production forecasts, based on conditions as of October 1, will be released on October 12.

Corn Production – Wisconsin: 2008-2022

Soybean Production – Wisconsin: 2008-2022

## Area Harvested, Yield, and Production Summary – Wisconsin and United States: 2021 and Forecasted September 1, 2022

Crop	Area harvested		Yield per acre		Production	
	2021	2022	2021	2022	2021	2022
	(1,000 acres)	(1,000 acres)			(1,000)	(1,000)

## United States Summary

Corn production for grain is forecast at 13.9 billion bushels, down 3 percent from the previous forecast and down 8 percent from 2021. Based on conditions as of September 1, yields are expected to average 172.5 bushels per harvested acre, down 2.9 bushels from the previous forecast and down 4.5 bushels from last year. Acreage updates were made in several States based on a thorough review of all available data. Total planted area, at 88.6 million acres, is down 1 percent from the previous estimate and down 5 percent from the previous year. Area harvested for grain is forecast at 80.8 million acres, down 1 percent from the previous forecast and down 5 percent from the previous year.

Soybean production for beans is forecast at 4.38 billion bushels, down 3 percent from the previous forecast and down 1 percent from 2021. Based on conditions as of September 1, yields are expected to average 50.5 bushels per acre, down 1.4 bushels from the previous forecast and down 0.9 bushel from 2021. Total planted area, at 87.5 million acres, is down 1 percent from the previous estimate but up less than 1 percent from the previous year. Area harvested for beans in the United States is forecast at 86.6 million acres, down 1 percent from the previous forecast but up less than 1 percent from 2021. Acreage updates were made in several States based on a thorough review of all available data.
