Wisconsin **corn** production is forecast at 532 million bushels according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of November 1, yields are expected to average 181.0 bushels per acre, down 1.0 bushel per acre from the October 1 forecast but up 5.0 bushels per acre from last year. Corn planted acreage is estimated at 3.75 million acres, with an estimated 2.94 million acres to be harvested for grain.

Soybean production is forecast at 104 million bushels. The yield is forecast at 49.0 bushels per acre, down 4.0 bushels from the October forecast and down 2.0 bushels from 2023. Soybean planted acreage is estimated at 2.15 million acres with 2.12 million acres to be harvested.

Potato production in Wisconsin is forecast at 25.1 million cwt, down 12 percent from 2023. Yield is forecast at 380 cwt per acre, with an expected 66,000 acres to be harvested.

The forecasts in this report are based on November 1 conditions and do not reflect weather effects since that time. The next corn and soybean production estimates will be published in the *Crop Production -- Annual Summary* report which will be released January 10, 2025.

United States Crop Production

Corn production for grain is forecast at 15.1 billion bushels, down less than 1 percent from the previous forecast and down 1 percent from 2023. Based on conditions as of November 1, yields are expected to average a record high 183.1 bushels per harvested acre, down 0.7 bushel from the previous forecast but up 5.8 bushels from last year. Area harvested for grain is forecast at 82.7 million acres, unchanged from the previous forecast but down 4 percent from the previous year.

Soybean production for beans is forecast at 4.46 billion bushels, down 3 percent from the previous forecast but up 7 percent from 2023. Based on conditions as of November 1, yields are expected to average 51.7 bushels per acre, down 1.4 bushels from the previous forecast but up 1.1 bushels from 2023. Area harvested for beans in the United States is forecast at 86.3 million acres, unchanged from the previous forecast but up 5 percent from 2023.
