WYOMING WINTER WHEAT VARIETIES 2019 CROP

Dear Wyoming Agriculturalist,

An estimated 120,000 total acres were seeded in Wyoming in the fall of 2018 for harvest in 2019. Cowboy was the most popular winter wheat variety seeded in Wyoming for the 2019 crop with 20.6 percent of the reported winter wheat acreage. SY Monument was second followed by SY Wolf.

The data for this release was collected from the 2018 December Ag Survey and the 2018 County Agricultural Production Survey conducted by the USDA/NASS, Mountain Regional Field Office. The surveys of producers in Wyoming were not sampled to provide a direct expansion of the seeded acreage by variety or a measure of the sampling error.

Thank you to the Wyoming Business Council - Agribusiness Division for providing funding and thank you to all the Wyoming producers whose continued cooperation makes this information possible. If you have any questions about this or any other report, please call us toll-free at 800-892-1660 or 800-392-3202.

Cowboy moved up from second place to first place accounting for 20.6 percent of the reported acres planted for harvest in 2019. SY Monument moved up from fourth place to second place at 17.2 percent, and SY Wolf, at 15.9 percent of reported acres remained the third most popular variety for the 2019 winter wheat crop. The next leading varieties with enough producer reports for publication separately were Brawl CL Plus, Buckskin, Warhorse, Spur, Pronghorn, Willow Creek, and Snowmass at 4.4 percent, 4.3 percent, 3.8 percent 2.4 percent, 2.2 percent, 2.1 percent and 1.6 percent of the reported acreage, respectively. Avery, Infinity CL, Langin and WB 4462 each had one percent or more of the reported seeded acreage but are not published separately to avoid disclosure of individual operations and are included in the Others category.
