CALIFORNIA AGRICULTURE OVERVIEW

CALIFORNIA'S CASH RECEIPTS JUMP 4% TO A NEW RECORD HIGH

California's ranchers and farmers sold an estimated \$22.1 billion in agricultural products in 1995, up 4% from 1994. Fruits and nuts, vegetables and melons, and livestock and poultry, each comprised 25% of the total farm marketings. Field crops accounted for 15%, while nursery and greenhouse products, and Christmas trees accounted for the remaining 10%. Fruit and nut cash receipts decreased 1% to \$5.53 billion, while field crops, and livestock and poultry each increased 1% to \$3.28 billion and \$5.55 billion, respectively. Vegetable crops jumped 12% to \$5.56 billion, and nursery and greenhouse products increased 9% to \$2.17 billion. Notable increases in marketings: cotton, +17%; sweet potatoes, +24%; Freestone peaches, +43%; plums, +49%; pistachios, +18%; lettuce, +34%; celery, +27%; carrots, +26%; onions, +28%; milk and cream, +4%; and melons (cantaloupes, honeydew, watermelon), +38%. Significant decreases in marketings: rice, -29%; sugar beets, -18%; grapes, -5%; cattle and calves, -10%; and fresh market tomatoes, -23%.

RAIN BRINGS MUCH NEEDED RELIEF TO CALIFORNIA

The Golden State experienced a very wet year (July 1994-June 1995) with precipitation much above normal for most of the State. Heavy rainfall across the State in January and March caused severe flooding and many crops were damaged. Because of the saturated soils and strong winds many trees were blown over, but especially hard hit were the almonds. The cool, rainy weather during the critical pollination reduced the production of many fruit and nut crops. Crops affected and reductions in production from the preceding year were: almonds, -50%; apricots, -64%; cherries, -62%; plums, -50%; and strawberries, -10%. March storms wrecked havoc in Monterey, California's leading vegetable county. Many vegetable crops actually showed an increase for the year. However, the storms reduced the production of the following: artichokes, -57%; asparagus, -21%; and head lettuce, -16%. Late plantings of field crops, caused by the wet, cool spring weather, and combined with heavy pest infestations in cotton, substantially reduced production of the following: Upland cotton, -15%; potatoes, -11%; rice, -14%; sugar beets, -18%; and wheat, -26%. Significant increases in production were; dry beans, +7%; Pima cotton, +21%; all hay, +10%; and sweet potatoes, +14%. Red meat production was up a modest 1% (beef, 1%; lambs and mutton, 17%; and pork, -7%). Poultry production was up 4%. California continues to lead the Nation in milk production; milk is the Golden State's leading agricultural commodity.

CALIFORNIA FIRSTS

Some 250 crops are recognized in California, including seeds, flowers and ornamentals.

This report contains information about 65 major crops grown on a large commercial scale in California:

13 Field Crops
 25 Fruits and Nuts
 25 Vegetables and Melons
 Nursery Products and Cut Flowers

In addition, data are shown for 10 livestock, poultry, and other products.

California leads the Nation in the crops shown in the table below. A large number are specialty crops in which the Golden State accounts for most of the U.S. production.

CROP AND LIVESTOCK COMMODITIES IN WHICH CALIFORNIA LEADS THE NATION		
Alfalfa Hay	Dates	Oriental Vegetables
Alfalfa Seed	Dry Baby Lima Beans	Parsley
Almonds	Dry Large Lima Beans	Peaches
Apricots	Eggs	Pears, Bartlett
Artichokes	Figs	Persian Melons
Asparagus	Garbanzo Beans	Persimmons
Avocados	Garlic	Pigeons & Squabs
Bedding Plants	Goat's Milk	Pistachios
Bell Peppers	Green Lima Beans	Plums
Bermuda Grass Seed	Green Onions	Pomegranates
Blackeye Beans	Greenhouse Vegetables	Prunes
Broccoli	Herbs	Rabbits
Brussels Sprouts	Honey	Raisins
Bulbs	Honeydew Melons	Safflower
Cantaloupes	Indoor Plants	Sod
Carrots	Dry Kidney Beans	Spinach
Casaba Melons	Kiwifruit	Strawberries
Cauliflower	Ladino Clover Seed	Sudan Grass
Celery	Lemons	Sweet Rice
Chicary	Romaine Lettuce	Table Grapes
Chinchillas	Leaf Lettuce	Processing Tomatoes
Chinese Cabbage	Head Lettuce	Vegetable & Flower Seed
Chinese Peas	Milk	Walnuts
Crenshaw Melons	Nectarines	Wild Rice
Currants	Olives	Wine Grapes
Cut Flowers	Onions	

CALIFORNIA FARM INCOME INDICATORS, 1991-95

Item	1991	1992	1993	1994	1995

Number Of Farms	83,000	82,000	79,000	79,000	80,000

^{1/} Value added to gross income. Value added to net farm income equals difference in net farm income and returns to operators. ^{2/} Includes landlord capital consumption. ^{3/} Statistics in and above the Net Farm Income line represent the farm sector, defined as including farm operators' dwellings located on farms. Statistics below the Net Farm Income line represent only the farm businesses to the exclusion of the operators' dwellings. ^{4/} Returns to operators is equivalent to net farm income excluding the income and expenses associated with farm operators' dwellings. ^{5/} Excludes landlord capital consumption.

CASH RECEIPTS DEFINED

Cash receipt data as prepared by the Economic Research Service (ERS) reflect income derived from the sale of agricultural commodities during a calendar year for only that portion of the commodity that is sold. Whereas, value of production data for crops and livestock products as prepared by the National Agricultural Statistics Service (NASS) reflect the total value of the commodity produced based on a marketing year average price. For certain commodities such as some fruits and vegetables which are normally sold in the same calendar year in which they were produced, cash receipt data and value of production data will be in close agreement. However, for most field crops, the marketing year will span portions of two calendar years, making the two data series non comparable. Data users should be aware of the differences between the ERS and NASS data series in their use of the data.

CALIFORNIA CASH INCOME BY COMMODITIES AND COMMODITY GROUPS, 1993-95

Source of Income	1993	1994	1995
	<i>\$1,000</i>		
FIELD CROPS

^{1/} Based on quantity produced for crops and on quantity marketed for livestock and poultry products.

^{2/} Based on value of quantity harvested for crops, value of quantity marketed for livestock and value of quantity produced for poultry products.

^{3/} Based on values published in the Annual County Agricultural Commissioners' Reports.

^{4/} Share of U.S. production based on 1987 Census of Agriculture.

^{5/} The 1995 price and value are based on the 1994 California average price.

^{6/} Extracted from Agricultural Commissioners' Annual Crop Reports.

^{7/} Includes Sunflower, Safflower, and Canola.

^{8/} Includes trees, shrubs, vines, bulbs, turf, etc., not included in flowers and foliage category.

^{9/} Includes cut flowers, potted plants, foliage plants, bedding plants and indoor decoratives.

CALIFORNIA'S LEADING FARM PRODUCTS

- California's "Top Twenty" crop and livestock commodities account for 72% of the State's gross farm income.
 - This is illustrated by the fact that only one product exceeds 10%, and the five leading commodities account for about two-fifths, of the State's total gross farm income.
- California's Diversity**
- California agriculture is considered one of the most diversified in the world, with no one crop dominating the State's farm economy.
 - California continues to lead the nation with many commodities, primarily fruit and nut crops and vegetables. Fruit, nut and vegetable crops produced in California account for over half of the nation's production.

CALIFORNIA'S TOP TWENTY

CALIFORNIA 1995 FARM FACTS

- About 11.6% of the national gross cash receipts for farming are produced in California on 80,000 farms.
- This constitutes 3.9% of the Nation's total farms (based on the Census of Agriculture definition of farms as places with annual sales of agricultural products of \$1,000 or more).

CALIFORNIA NUMBER OF FARMS, LAND IN FARMS, AND SIZE OF FARM, 1950-95

1994	79,000	29,900	378
1995	80,000	30,000	375

a/ Old definition of farm: Places of 10 or more acres that had annual sales of agricultural products of \$50 or more and places of less than 10 acres that had annual sales of \$250 or more.

b/ New definition of farm: Places with annual sales of agricultural products of \$1,000 or more.

PROFILE OF CALIFORNIA'S AGRICULTURE

SOURCE: 1992 Census of Agriculture

CALIFORNIA FIELD CROPS

SUMMARY OF FIELD CROPS

California's 1995 field crop production was worth \$3.51 billion at the farm-gate level. This value was 2% below the previous year.

Alfalfa, wheat, Upland cotton, cottonseed and oats recorded significantly lower farm returns. Although wheat prices were up, production was down considerably. The declining production was primarily due to widespread flooding in the Sacramento Valley, and persistent wet conditions which led to disease problems. Upland cotton prices were up slightly, but production was off dramatically. This was caused by the cool, wet spring and heavy insect damage throughout the growing season.

Rice, barley, potatoes, sweet potatoes, other hay, and American Pima cotton showed significantly higher farm values, which nearly offset the declines in wheat and Upland cotton. Rice, barley and potato production were down, but sharply higher prices helped push their total values above 1994 levels. For sweet potatoes and American Pima cotton, production and prices were considerably higher than the previous year.

The average value per harvested acre in 1995 dropped to \$670 from the \$700 per acre value in 1994.

Production of the major field crops totaled 26.8 million tons, up fractionally from the 26.7 million tons produced on 1994. Harvested acreage was higher than the previous year for cotton, dry beans, corn for silage, hay and sweet potatoes. Wheat, rice, barley, corn for grain, sugarbeets and potatoes showed declines in harvested acreage.

Upland cotton was again the state's highest valued field crop with a total value of \$927 million. Nationally, California ranked second in Upland cotton production with 2.31 million bales produced, at an average price of 83.5 cents per pound.

All hay was California's second leading field crop, with a total value of \$841 million. At the U.S. level, the state ranked second in the production of all hay with a total of 9.00 million tons.

a/ Production is on a clean basis

b/ Estimate discontinued.

c/ Excludes beans grown for garden seed.

d/ Not estimated.

e/ Cotton: 480 lbs. net-weight per bale.

f/ Estimated marketings of alfalfa and other hay used as weights to calculate all hay price for 1989-95.

g/ Excludes sweet and wild rice.

h/ Includes some acreage carried over and harvested the following spring.

i/ Not available.

TOTAL ALL PLANTS 5/	953							685,638

1/ The total covered growing area of 123,844,000 square feet consisted of the following: 17,359,000 square feet of shade and temporary cover; 16,456,000 square feet of glass; 44,008,000 square feet of fiberglass and other rigid greenhouses; and 46,021,000 square feet of film plastic (single/multi) greenhouses. In addition, plants were produced on 7,547 acres of open ground.

2/ For potted plants, price represents a weighted average for plants sold in pots less than 5 inches and in pots 5 inches or more.

3/ Total includes Gladioli, which are not published to avoid disclosure of individual operations.

4/ Total includes New Guinea Impatiens, which are not published to avoid disclosure of individual operations.

5/ Based on equivalent wholesale value of all sales for all crops, except potted foliage plants which are based on net value of sales.

FRUIT AND NUT CROPS

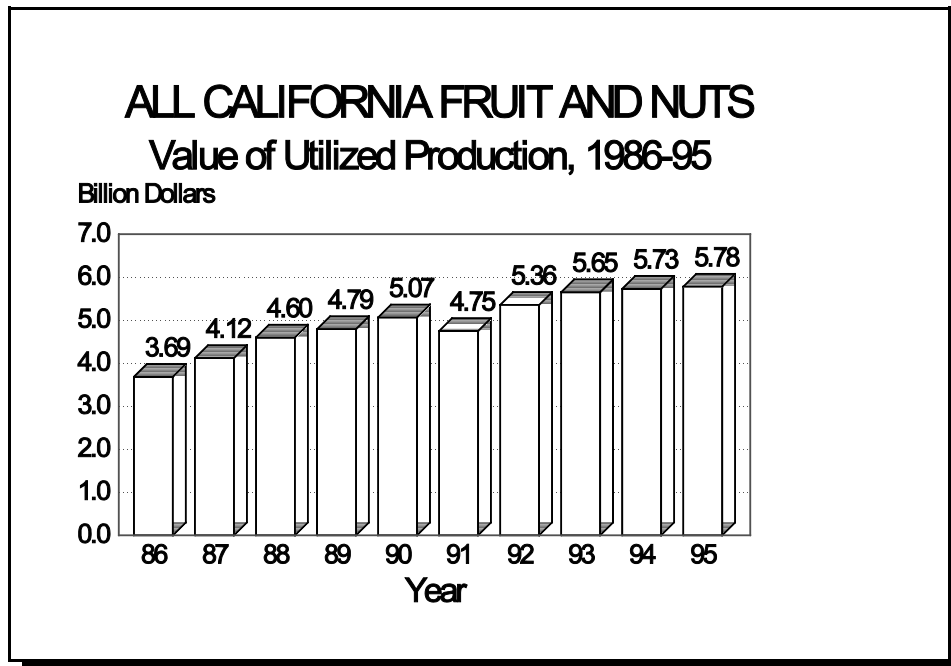

SUMMARY OF FRUIT AND NUT CROPS

California produced 13.1 million tons of fruit and nut crops in 1995, 8% less than 1994. The Golden State grew 39% of U.S. fruit and nut production in 1995, down from 42% last year. The total value of fruit and nut production was \$5.78 billion in 1995, up 1% from 1994. This was 55% of the U.S. total value. California accounts for virtually all of the U.S. production of dates, figs, kiwifruit, nectarines, olives, almonds, pistachios, and English walnuts.

California dominates U.S. production of apricots, avocados, grapes, lemons, plums, prunes, and strawberries. Several crops had major changes in production from 1994 to 1995. They include the following changes: apricots, down 64%; sweet cherries, down 62%; nectarines, down 27%; Cling peaches, down 23%; Freestone peaches, down 21%; pears, down 26%; plums, down 50%; almonds, down 50%; pecans up 93%, pistachios, up 15%; and avocados, up 12%.

Precipitation during the winter was well above normal. Several storms hit the State in March with strong winds, heavy rains, and flooding. Particularly hard hit were almonds where many trees were uprooted and the poor weather during the critical pollination period reduced the crop to the smallest since 1986. The strawberry crop also

suffered extreme damage, especially in Monterey and Santa Cruz counties. Many other fruit crops were also affected by the storms and production of some crops was down substantially. Because of the cool rainy weather, crop development was generally behind normal. However, mild weather during the summer and fall months permitted the crops to be harvested without any major difficulties.

NOTES FOR USERS

Total production is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested. It also includes fruit that was harvested but not sold due to marketing conditions.

Utilized production is the amount sold, plus the quantities used at home or held in storage. **Crop year production** for citrus and avocados are from the bloom of the first year shown. For example, 1995-96 would represent the 1996 production from the 1995 bloom.

Utilization refers to first, but not necessarily final, utilization. For example, frozen fruit used for preserves is included as frozen. **Canned** includes all canned products -- jam, jelly, baby food, nectar, juice, puree, and all fruit packs combined.

The price quoted is at the packinghouse door, which includes the transportation costs. Drying costs are excluded from prices on all fruit crops except grapes.

Crop value estimates cover the marketing season or crop year and should not be confused with **cash receipts** from these crops which are calculated on a single calendar year. The season average price is applied to utilized production to compute **value of production**.

Price and value for citrus fruits are based on equivalent packinghouse door returns for the entire data series. The processing price for berries is based on equivalent returns at the processing plant door. The fresh market price is on a packed and loaded basis, F.O.B. shipping point.

	1994	6,600	---	---	600,000	---	80,642
	1995	6,600	---	---	600,000	---	79,150

^{1/} Return at processing plant door or packinghouse door.

^{2/} Acres of raisin type grapes enrolled in the California Raisin Industry Diversion (RID) program were; in 1986, 50,000; in 1987, 15,000; in 1988, 25,000; in 1991, 20,000; in 1992, 12,500; in 1993, 20,000; in 1994, zero; in 1995, 25,000. These acres were deducted from bearing acres before calculating yield.

^{3/} Raisin type production is the fresh equivalent of dried and not dried.

^{4/} Total value based on grower return.

^{5/} Reported as miscellaneous after 1989.

^{6/} Acreage by county, variety, and year of planting for 1995 are available upon request.

^{7/} These crops are almond hulls, black walnuts, jojobas (until 1991), limes, persimmons, pomegranates (starting in 1990), and in 1991, bushberries. Acres exclude almond hulls.

DRYING RATIO -- TONS OF GREEN FRUIT REQUIRED TO PRODUCE ONE DRIED TON

Year	Apples	Apricots	Figs	Raisins	Freestone Peaches	Bartlett Pears	Prunes

- 1/ Dried and frozen fruit included in total processed to avoid disclosure of individual operations.
- 2/ Processed fruit included in fresh market total to avoid disclosure of individual operations.
- 3/ Total processed includes canned, crushed, frozen, and brined.
- 4/ For 1986-95, prices for processing and fresh totals were not published to avoid disclosure of individual operations. Small quantities processed included in fresh to avoid disclosure of individual operations.
- 5/ Includes substandard raisins diverted to other uses.
- 6/ Processed and fresh fruit not published to avoid disclosure of individual operations but included in total utilized.
- 7/ Limited and undersized combined prior to 1988.
- 8/ Processed mostly canned, but includes other small quantities not published separately to avoid disclosure of individual operations.
- 9/ Pomegranates reported as miscellaneous after 1989 crop.

^{1/} Equivalent packinghouse door returns.

^{2/} Season average prices for all grapefruit are derived by weighting the season average prices for each area by their carton weights.

^{3/} Prior to 1993-94 net weight per carton was 32 pounds.

1/ Price and value are based on the edible portion of the crop only. Included in production are inedible quantities of no value as follows: 1986 -- 9.8 million pounds, 1987 -- 12.0 million pounds, 1988 -- 18.5 million pounds, 1989 -- 18.5 million pounds, 1990 -- 17.0 million pounds, 1991 -- 15.9 million pounds, 1992 -- 16.2 million pounds, 1993 -- 10.3 million pounds, 1994 -- 14.7 million pounds, 1995 -- 11.1 million pounds.

2/ Data for 1995 acreage by county, variety, and year of planting available upon request.

3/ Pecan production data begins with the 1988 crop.

^{1/} Equivalent packinghouse door returns.

^{2/} Season average prices for all grapefruit are derived by weighting the season average prices for each area by their carton weights.

^{3/} Prior to 1993-94 net weight per carton was 32 pounds.

CALIFORNIA LIVESTOCK AND DAIRY

SUMMARY OF LIVESTOCK INVENTORY AND CASH RECEIPTS

The increase in California's milk and cream cash receipts offset declines in most other livestock. Livestock cash receipts totaled \$5.55 billion, 1% above 1994.

Red meat production, at 2.12 billion pounds, was 1% above last year's production. Beef production, at 1.97 billion pounds, was up 1% from a year ago. Lamb and mutton production of 60.1 million pounds was up 17%. Pork production of 88.6 million pounds was 7% below a year ago.

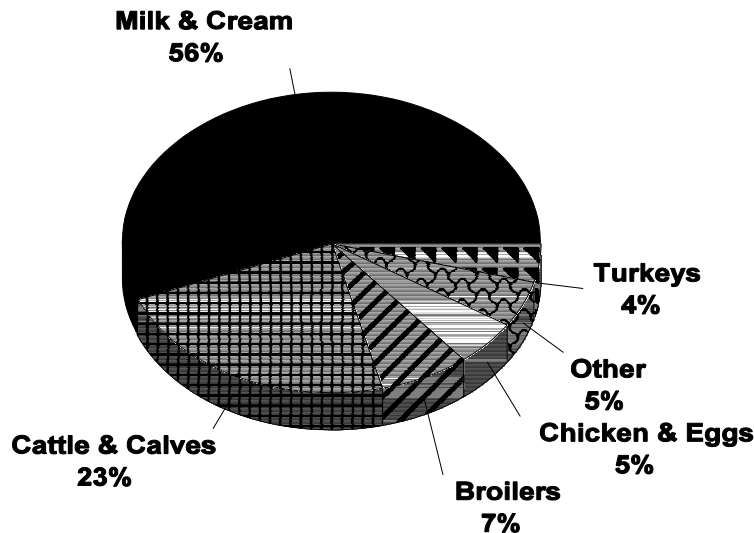

Poultry production, at 1.70 billion pounds, increased 4% from 1994. Broiler production of 1.18 billion pounds increased 4% from the previous year. Turkey production was 3% higher at 462 million pounds. The 54.4 million pounds of other chickens produced was up 3% from a year ago.

Milk production, at 25.3 billion pounds, was fractionally above a year ago. Egg production, at 6.44 billion eggs, was down 2%. Honey production of 39.1 million pounds increased by 63% from the 1994 production year. Wool production of 5.25 million pounds was 1% less than 1994.

1/ Live weight; adjustments made for changes in inventory and for inshipments.

2/ Live weight; excludes custom slaughter for use on farms where produced and interfarm sales within the State.

3/ Receipts from marketing and sale of farm slaughter.

4/ Hogs and pigs receipts for 1994 and 1995 include allowance for higher average price of State inshipments and outshipments of feeder pigs.

CALIFORNIA VEGETABLES AND MELONS

SUMMARY OF VEGETABLE AND MELON CROPS

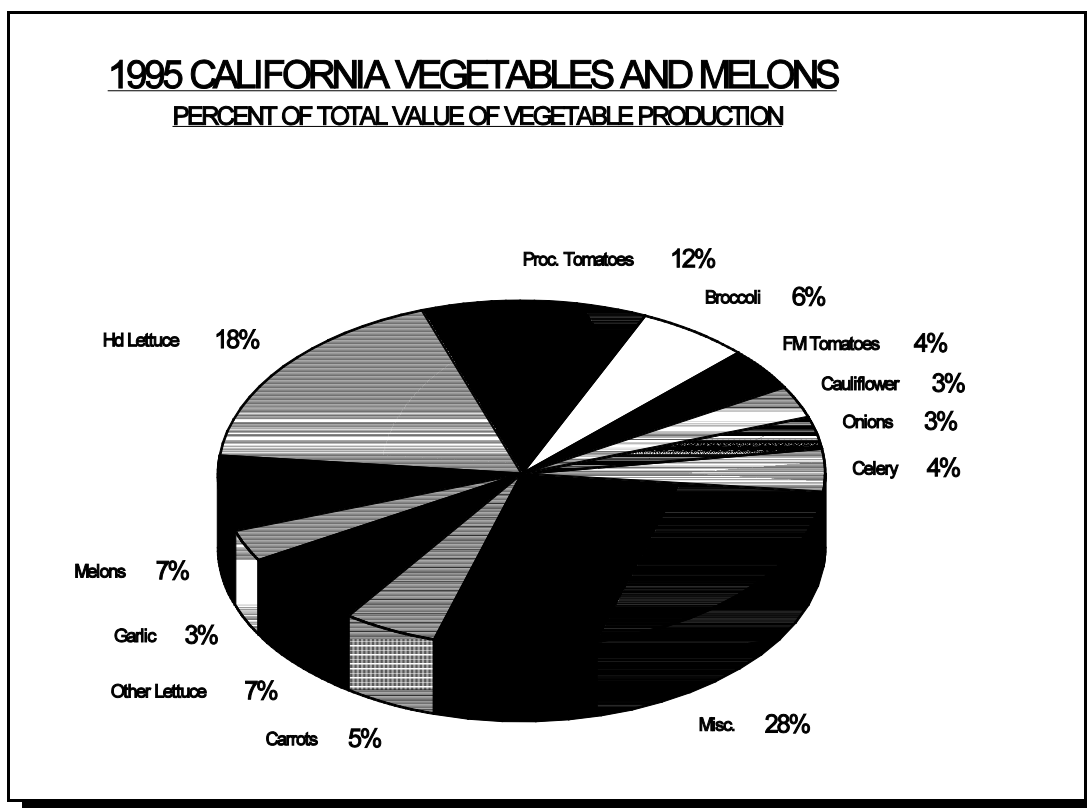

California produced 19.8 million tons of vegetables and melons in 1995, 2% less than in 1994. Total value of vegetable production was \$5.55 billion, up 13% from 1994. Spring onions had the greatest percentage increase in value, which was 95% above 1994. Only fresh market artichokes, asparagus, garlic, bell peppers, and tomatoes, as well as processing broccoli and carrots, had lower total values than a year ago.

The Golden State continues to lead the Nation in vegetables and melons, accounting for 36% of the harvested acres, 54% of the production, and 63% of the total value.

The vegetable and melon estimates include commercial production, excluding garden production and vegetables grown for seed. Prices for processing crops and processed segments of dual utilization crops are based upon equivalent returns at the processing plant door.

For fresh market sales, the price is on a packed and loaded basis, F.O.B. shipping point. Not all data are published for California to avoid disclosure of individual plants.

MISCELLANEOUS VEGETABLES AND MELONS <u>f/</u> Fresh Market & Processing	1986	182,300	---	---	---	629,256
	1987	241,690	---	---	---	702,180
	1988	249,098	---	---	---	692,478
	1989	201,132	---	---	---	669,884
	1990	219,350	---	---	---	711,961
	1991	303,700	---	---	---	884,344
	1992	131,118	---	---	---	356,077
	1993	132,470	---	---	---	666,130
	1994	122,084	---	---	---	841,438
	1995	151,572	---	---	---	841,919

a/ The processed price is based on equivalent returns at the processing plant door. The fresh market price is on a packed and loaded basis, f.o.b. shipping point.

b/ Program initiated for 1992.

c/ Fresh market and processed acreage separated starting in 1993.

d/ Information unavailable due to disclosure.

e/ Onion production includes quantity harvested, but not marketed because of loss during storage (shrinkage): 1986 -- 200,000 cwt., 1987 -- 320,000 cwt., 1988 -- 280,000 cwt., 1989 -- 200,000 cwt., 1990 -- 234,000 cwt., 1991 -- 174,000 cwt., 1992 -- 275,000 cwt., 1993 -- 313,000 cwt., 1994 -- 248,000 cwt.; 1995 -- 253,000 cwt. Storage loss amounts are excluded when computing total value.

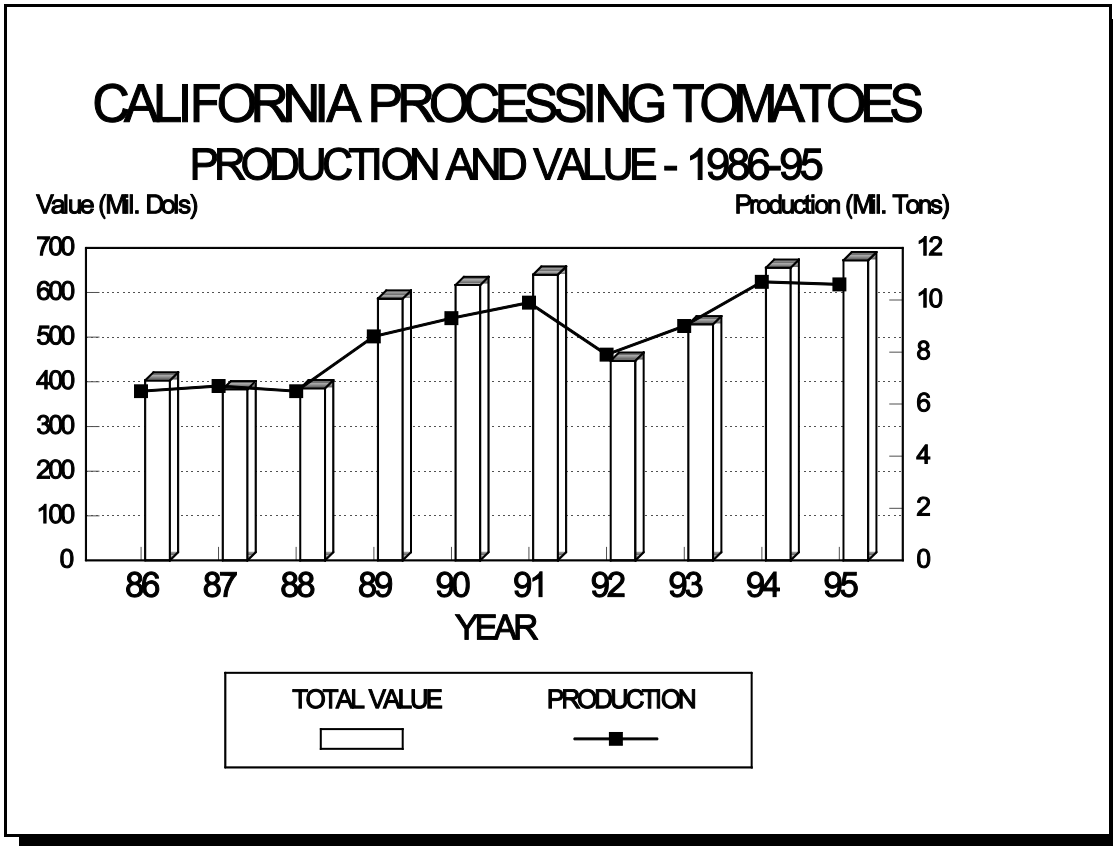

f/ Miscellaneous vegetables and melons include: Green lima beans for processing, oriental vegetables, green peas, chili peppers, squash, etc. The new crops added in 1992 are excluded from the 1992 to present miscellaneous totals. Miscellaneous figures come from County Agricultural Commissioners.

CALIFORNIA TOMATOES FOR PROCESSING BY COUNTY, 1995

County	Contracted and Open Market			
	Planted Acres	Harvested Acres	Yield	Production 1/
	Acres		Tons/Acre	Tons
Contra Costa	4,200	4,000	34.58	138,300
San Benito	2,200	2,100	34.14	71,700
Santa Clara	1,200	1,100	36.45	40,100
Colusa	30,200	28,500	32.95	939,000
Sacramento	7,000	6,400	28.36	181,500
Solano	20,500	19,200	30.25	580,800
Sutter	22,900	21,500	31.52	677,700
Yolo	71,000	68,200	32.58	2,221,800
Fresno	101,000	98,000	34.46	3,377,400
Merced	10,000	9,600	41.94	402,600
San Joaquin	24,200	23,500	38.49	904,400
Stanislaus	18,200	17,400	28.73	499,900
Other Counties 2/	18,400	17,500	32.66	571,620
State Total	331,000	317,000	33.46	10,606,820

1/ On the basis of PAID FOR TONNAGE purchased from growers as reported by processors, dockage not included.

2/ To avoid disclosure of individual operations, OTHER COUNTIES include: Madera, Monterey, Kern, Kings, Imperial, Santa Barbara, Tulare, and Ventura.
