California Agricultural Overview

The Golden State is, by far, the number-one agricultural producer and exporter in the United States. No other state in the union even comes close. In fact, last year the agricultural marketings of California's farmers and ranchers reached \$27.8 billion.

California produces one out of every five glasses of milk consumed in the nation. The dairy industry continues to grow at an astonishing rate with milk production increasing 1 percent from 2002 to 2003. It follows then, that California also has some of the largest dairies in the country with more than 700 cows on average, while the United States average is less than 100. In 2003, the average milk production per cow in California was 20,993 pounds, which is 12 percent higher than the national average.

California produces most of the grapes grown in the United States. Warm days and cool nights are very favorable to growing grapes, so it should be no surprise that California produces many of the best wines in the world. In 2003, 88 percent of all grapes (raisin, table and wine) came from right here in the Golden State.

California's agricultural abundance includes 350 different crops. Among those, the state grows more than half of the nation's total of fruits, nuts and vegetables. Many of these commodities are specialty crops and almost solely produced in California. It will be hard to find these crops growing in any other state—artichokes, Brussels sprouts, almonds, dates, figs, kiwifruit, nectarines, olives, pistachios, dried plums (prunes) and walnuts.

Top 5 Agricultural States in Cash Receipts, 2003

State	Rank	Total Value (Billion Dollars)
California	1	27.8
Texas	2	15.3
Iowa	3	12.6
Nebraska	4	10.6
Kansas	5	9.0

California's Gross Cash Income for 2003

Agricultural production and gross cash income in 2003 increased to \$29.4 billion, 4 percent higher than the previous year. Cash receipts from farm marketings totaled \$27.8 billion, up 5 percent from 2002, while other farm related income totaled \$1.57 billion.

Fruit and nut cash receipts, at \$7.84 billion, were 1 percent above last year and comprised 27 percent of the total. Vegetable receipts increased 6 percent from \$6.58 billion in 2002 to \$6.96 billion in 2003 and comprised 24 percent of the total. Livestock and poultry receipts jumped 12 percent and comprised 24 percent of the total. Nursery and flower crops, with 11 percent of the total, were fractionally lower than last year. Field crops accounted for 9 percent of the total, while cash receipts increased 1 percent from the previous year.

The Golden State's three leading commodities in cash receipts are milk with \$4.03 billion, nursery with \$2.44 billion, and grapes with \$2.30 billion. Nationally, California has about 19 percent of the total milk receipts and 89 percent of the grape receipts.

Notable Increases in Marketings:

Almonds	33%
Apples	40%
Apricots	27%
Broccoli	24%
Cattle and Calves	27%
Cauliflower	31%
Corn, Sweet	34%
Cucumbers	20%
Eggs	38%
Grapefruit	38%
Hogs	30%
Honey	47%
Lettuce	32%
Onions	24%
Plums, Dried (Prunes)	27%
Potatoes, Sweet	69%
Raspberries	43%
Rice	39%
Sheep and Lambs	33%
Sorghum, Grain	30%
Spinach	44%
Strawberries	20%
Wool	71%

Significant Decreases in Marketings:

Lemons	27%
Pistachios	57%

Crop and Livestock Commodities in which California Leads the Nation

Almonds	Eggplant	Lettuce, Romaine	Plums
Apricots	Escarole/Endive	Melons, Cantaloupe	Plums, Dried
Artichokes	Figs	Melons, Honeydew	Pomegranates
Asparagus	Flowers, Bulbs	Milk	Rice, Sweet
Avocados	Flowers, Cut	Milk Goats	Safflower
Beans, Black-eyed	Flowers, Potted Plants	Nectarines	Seed, Alfalfa
Beans, Dry Baby Lima	Garlic	Nursery, Bedding Plants	Seed, Bermuda Grass
Beans, Dry Large Lima	Grapes, Raisins	Nursery Crops	Seed, Ladino Clover
Beans, Garbanzo	Grapes, Table	Olives	Seed, Sudan Grass
Beans, Green Lima	Grapes, Wine	Onions, Dry	Seed, Vegetable and Flower
Bedding/Garden Plants	Greens, Mustard	Onions, Green	Spinach
Bee Colonies	Hay, Alfalfa	Parsley	Squash
Broccoli	Herbs	Passion Fruit	Strawberries
Brussels Sprouts	Honey	Peaches, Clingstone	Tomatoes, Processing
Cabbage, Chinese	Jojoba	Peaches, Freestone	Turnips
Carrots	Kale	Pears, Bartlett	Vegetables, Greenhouse
Cauliflower	Kiwifruit	Peas, Chinese	Vegetables, Oriental
Celery	Kumquats	Peppers, Bell	Walnuts
Chicory	Lemons	Persimmons	
Daikon	Lettuce, Head	Pigeons and Squabs	
Dates	Lettuce, Leaf	Pistachios	

California is the sole producer (99% or more) of the commodities in bold.

California Farm Facts

California has 78,500 farming operations, which is less than 4 percent of the nation's total. However, these farms account for 13 percent of the national gross cash receipts from farming. In 2003, land in farms totaled 27.1 million acres. The average farm size in California is 345 acres. Some 350 crops are recognized in the state, including seeds, flowers, and ornamentals.

California's Top 20 Commodities

California's top 20 crop and livestock commodities account for 74 percent of the state's gross farm income. Milk and cream production remained number one in 2003, followed by nursery products and grapes.

Leading Counties

California has some of the most agriculturally productive counties in the nation. According to the 2002 Census of Agriculture's ranking of market value of agricultural products sold, nine of the nation's top 10 producing counties are in California.

In 2003, Fresno, with \$4.05 billion in agricultural value, remained the number one county in the nation followed by Tulare and Monterey. If ranked separately, the value of agricultural commodities in Fresno County would rank it ahead of more than half the other states in the nation.

California's Top 20 Commodities for 2001-2003

Commodity	Value and Rank					
	2001		2002		2003	
	\$1,000					
Milk and Cream	4,625,431	(1)	3,832,501	(1)	4,028,520	(1)

Ventura	1,161,070	10	1,117,567	10	Strawberries, Nursery Stock, Lemons, Celery, Avocados

Weather Highlights for 2003

In California, the 2003 season started with normal rainfall in the northern part of the state, but below normal in the southern areas. Temperatures were generally above normal for most of January and early February. However, cooler temperatures and rain over most of the state later in February slowed crop development. Growers performed the needed cultural practices as weather permitted. The cold weather in February helped ease growers' concerns over the lack of chilling-hours required for most tree fruit. Bee hives were placed in almond and stone fruit orchards in anticipation of bloom.

After the first week in March, temperatures were mostly above normal, which accelerated plant growth and the harvesting of winter vegetables. The winter vegetable harvest started in the desert area and moved into the San Joaquin Valley. Field preparation and planting of various vegetables continued throughout the state as conditions permitted. The early stone fruit and almonds began blooming in February, but were soon in full bloom from the warm March temperatures. April was a wet month as California experienced a series of storms that brought both rain and hail to many areas of the state. Stone fruit thinning was active during April and May. By the end of April, harvesting commenced on some of the early peach and cherry varieties. Warm weather and sunny skies prevailed throughout most of May allowing the picking and packing of stone fruit to gain momentum. A steady harvest of stone fruit varieties continued during the summer months as the warm weather accelerated fruit maturity.

A high pressure system over the western United States in mid-July resulted in very warm conditions across most of California and temperatures were well above normal. Some stone fruit orchards experienced heat and humidity related problems, while sunburn damage was evident in some walnut orchards. In late August, a weather system brought thunderstorms and widespread showers across foothill and mountain locations. The vegetable growing season was uneventful and planting and harvesting proceeded on schedule. The weather during the fall

months was variable and rain showers disrupted harvest of some of the later fruit and nut crops. Even with the variable weather, harvesting of most fruits, nuts, and vegetables remained on schedule with few problems.

Cotton planting began in late March, but the cool, wet weather in April delayed planting and growth. The unfavorable weather prompted growers to plant Upland cotton instead of American Pima, which requires a longer growing season. A few fields had to be replanted due to poor germination. By mid-May, warm, sunny weather improved growth in cotton fields so cultivation and irrigation were underway in many fields as plants emerged. Emerged fields showed generally good stands, but growth remained slow and stunted in several fields due to the previous cool weather. By the end of June, crops in a few areas were 2-3 weeks behind normal due to poor growth caused by the cool, wet spring. Harvest began in September, about two weeks later than normal, and progressed rapidly under ideal harvesting conditions. Harvest was virtually complete by the end of December.

Weather conditions were less than ideal for rice during planting as cool weather caused delays. Rice yields were down from the previous three years, but the weather during the fall was favorable and harvest proceeded with no major problems.

Global Marketplace

California is the nation's leader in agricultural exports and in 2003 shipped more than \$7.20 billion in both food and agricultural commodities around the world. To highlight the significance of this figure, it is estimated that 14 percent of California's agricultural production is exported.

In terms of foreign markets, Canada, the European Union, and Japan are the largest export destinations for California agriculture. Those three represent about 50 percent of the agricultural exports from the Golden State.

With key international markets in Asia, Europe, and North America, California agriculture is clearly enjoyed around the world.

Cash Income by Commodity Groups, 2001-2003

Source of Income	2001	2002	2003
	\$1,000		
FIELD CROPS			
Alfalfa Seed	33,024	17,986	18,000

1/ Value of agricultural sector production is the gross value of commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

1/ Based on quantity produced for crops and on quantity marketed for livestock and poultry products.

2/ Based on value of quantity harvested for crops, value of quantity marketed for livestock, and value of quantity produced for poultry products.

3/ Based on values published in the county agricultural commissioners' annual crop reports.

4/ Share of U.S. production based on 2002 Census of Agriculture.

5/ The 2003 price and value are based on the 2002 California average price.

6/ Extracted from county agricultural commissioners' annual crop reports.

7/ Includes sunflower, safflower, and canola.

8/ Includes trees, shrubs, vines, bulbs, turf, etc., not included in flowers and foliage category.

9/ Includes cut flowers, potted plants, foliage plants, bedding plants, and indoor decoratives.

4/ California share of U.S. production is less than one-half percent.

California's Farm Numbers and Size, 1950-2003

Year 1/	Number of Farms	Land in Farms	Average Size of Farm
		1,000 Acres	Acres
1950	144,000	37,500	260
1955	124,000	39,000	316
1960	108,000	38,800	359
1965	82,000	37,800	461
1970	64,000	36,600	572
1975	73,000	34,300	470
1980	81,000	33,800	417
1985	79,000	32,900	416
1990	85,000	30,800	362
1991	83,000	30,500	367
1992	82,000	30,200	368
1993	85,000	29,900	352
1994	85,000	29,600	348
1995	86,000	29,300	341
1996	86,000	29,000	337
1997	87,000	28,700	330
1998	87,000	28,500	328
1999	85,000	28,100	331
2000	83,100	28,000	337
2001	81,000	27,800	343
2002	79,700	27,600	346
2003	78,500	27,100	345

1/ Until 1950 the definition of a farm was: Places of 10 or more acres that had annual sales of agricultural products of \$50 or more and places of less than 10 acres that had annual sales of \$250 or more. Starting in 1975 the new definition of a farm is: Places with annual sales of agricultural products of \$1,000 or more.

County Rank, Total Value of Production and Leading Commodities, 2003 1/

Rank		County	Total Value	Leading Commodities
2002	2003		\$1,000	
1	1	Fresno	4,052,767	Grapes, Tomatoes, Cotton, Cattle and Calves, Poultry
2	2	Tulare	3,294,660	Milk, Navel and Valencia Oranges, Grapes, Cattle and Calves, Plums
3	3	Monterey	3,288,468	Head and Romaine Lettuce, Salad Greens, Strawberries, Broccoli, Wine Grapes
4	4	Kern	2,477,526	Grapes, Almonds and By-Products, All Citrus, All Carrots, All Milk
5	5	Merced	1,918,230	Market Milk, Chickens, Almonds, Cattle and Calves, Sweet Potatoes
7	6	San Joaquin	1,494,693	All Milk, All Grapes, Almond Meats, All Tomatoes, All Cherries
6	7	Stanislaus	1,454,928	Market Milk, Almonds, Chickens, Fruit/Vine/Nut Nursery, English Walnuts
8	8	San Diego	1,351,059	Cut Flowers and Foliage Plants, Nursery Woody Ornamentals and Bedding Plants, Avocados, Eggs, Strawberries
12	9	Kings	1,136,966	All Milk, All Cotton, Cattle and Calves, Alfalfa Hay, Pistachios
10	10	Ventura	1,117,567	Strawberries, Nursery Stock, Lemons, Celery, Avocados
9	11	Imperial	1,073,472	Cattle, Alfalfa, Lettuce, Carrots, Onions
11	12	Riverside	1,067,367	Nursery, Milk, Table Grapes, Eggs, Avocados
14	13	Santa Barbara	858,017	Strawberries, Broccoli, Lettuce, Wine Grapes, Avocados
13	14	Madera	760,246	Almonds, All Grapes, Market Milk, Replacement Heifers, Pistachios
15	15	San Bernardino	645,885	Milk, Cattle and Calves (Meat), Replacement Heifers, Eggs, Nursery Indoor Decoratives
17	16	San Luis Obispo	529,046	Wine Grapes, Broccoli, Strawberries, Cattle and Calves, Head Lettuce
16	17	Sonoma	514,697	Wine Grapes, Market Milk, Livestock and Poultry, Cattle and Calves, Ornamental and Misc. Nursery
18	18	Napa	392,929	Wine Grapes, Nursery Products, Cattle and Calves, Livestock Products, Range Pasture
25	19	Santa Cruz	366,944	Strawberries and Raspberries, Nursery Plants, Cut Flowers, Vegetable Crops, Head Lettuce
23	20	Colusa	361,573	Rice, Almond Meats, Processing Tomatoes, Cattle and Calves, Rice Seed
24	21	Butte	332,146	Rice, Almond, English Walnuts, Dried Plums, Nursery Stock
26	22	Los Angeles	322,590	Nursery Plants, Root Vegetables, Dry Onions, Peaches, Indoor Flower and Foliage Plants
20	23	Glenn	318,032	Paddy Rice, Almonds, Dairy Products, Cattle and Calves, Walnuts
19	24	Orange	311,615	Nursery Stock and Cut Flowers, Strawberries, Avocados, Bell and Misc. Peppers, Green Beans
21	25	Yolo	304,401	Processing Tomatoes, Rice, Wine Grapes, Alfalfa Hay, Seed Crops
22	26	Sutter	301,230	Rice and Rice Seed, Peaches, Dried Plums, Walnuts, Tomatoes
27	27	Sacramento	274,500	Wine Grapes, Market Milk, Nursery Products, Bartlett Pears, Poultry
28	28	Santa Clara	241,043	Nursery Crops, Mushrooms, All Peppers, Cut Flowers, Steers and Heifers
29	29	San Benito	238,767	Leaf, Baby and Head Lettuce, Nursery Stock, Wine Grapes, Bell Peppers, Vegetable and Row Crops
30	30	Solano	214,123	Nursery Stock, Cattle and Calves, Processing Tomatoes, Alfalfa, Feeder Lambs
31	31	San Mateo	178,039	Ornamental and Potted Nursery Plants, Mushrooms, Potted and Cut Flowers, Brussels Sprouts
32	32	Yuba	146,493	Rice, Clingstone Peaches, Dried Plums, Walnuts, Cattle and Calves
34	33	Tehama	125,139	English Walnuts, Almonds, Dried Plums, Cattle and Calves, Market Milk
36	34	Humboldt	119,988	Nursery Products, All Milk, Cattle and Calves, Irrigated and Range Pasture, Biomass
33	35	Mendocino	118,617	Wine Grapes, Bartlett Pears, Cattle and Calves, Milk, Irrigated and Range Pasture,
35	36	Siskiyou	114,804	Alfalfa Hay, Nursery Strawberry Plants, Cattle and Calves, Irrigated and Range Pasture, Irish Potatoes
37	37	Contra Costa	108,568	Nursery Bedding Plants, Cattle and Calves, Sweet Corn, Grapes, Vegetable Crops
38	38	Modoc	68,359	Cattle and Calves, Alfalfa and Wild Hay, Irish Potatoes, Vegetable Crops, Onions
39	39	Placer	66,419	Milling Rice, Nursery Products, Cattle and Calves, Livestock and Products, Irrigated and Range Pasture
40	40	Lake	57,921	Wine Grapes, Asian and Bartlett Pears, Nursery Products, Cattle and Calves, English Walnuts
41	41	Shasta	54,218	Cattle and Calves, Alfalfa and Other Hay, Nursery Strawberry Plants, Irrigated and Range Pasture, Nursery Products
42	42	Marin	48,675	Market Milk, Cattle and Calves, Range Pasture, Poultry, Livestock Products
43	43	Lassen	43,657	All Hay, Livestock, Nursery Strawberry Plants and Misc. Field Crops, Pasture, Mint
45	44	Alameda	37,342	Nursery Products and Woody Ornamentals, Wine Grapes, Cattle and Calves, Range Pasture, Alfalfa and Other Hay
44	45	Del Norte	34,777	Nursery Plants and Products, All Milk, Cattle and Calves, Livestock Products, Irrigated Pasture
48	46	Mono	27,339	Carrots, Alfalfa and Other Hay, Cattle and Calves, Irrigated Pasture, Sheep and Lambs
46	47	El Dorado	22,698	Wine Grapes, Apples, Christmas Trees and Cut Greens, Range Pasture, Cattle and Calves
47	48	Amador	22,686	Wine Grapes, Cattle and Calves, Irrigated and Range Pasture, Livestock, Sheep and Lambs
49	49	Tuolumne	21,705	Livestock, Cattle and Calves, Irrigated and Range Pasture, Firewood, Apiary Products
50	50	Mariposa	20,599	Cattle and Calves, Range Pasture, Livestock and Poultry Products, All Poultry, Forest Products
52	51	Plumas	17,748	Cattle and Calves, All Pasture, All Hay, Livestock, Fruit and Nut Crops
51	52	Calaveras	15,623	Cattle and Calves, Irrigated and Range Pasture, All Poultry, Livestock Products, Wine Grapes
53	53	Inyo	13,210	Cattle and Calves, Nursery Turf, Alfalfa and Other Hay, Irrigated and Range Pasture, Apiary Products
54	54	Nevada	8,041	Cattle and Calves, Pasture and Range, Wine Grapes, Nursery Stock, Fruit and Vegetable Crops
55	55	Sierra	5,678	Cattle and Calves, All Pasture, All Hay, Fruit and Nut Crops, Livestock
56	56	Trinity 2/	2,320	Cattle and Calves, Irrigated and Range Pasture, Wine Grapes, Misc. Crops, Grain and Grass Hay
57	57	San Francisco	1,891	Vegetable Crops, Cut Flowers
58	58	Alpine 2/	0	—

1/ Totals vary slightly from those published by counties due to classification differences between county and state reports.

2/ Reports for Alpine and Trinity counties were not available at publication so 2002 data were used for this report.

California Field Crops

California's 2003 field crop production was worth \$3.33 billion at the farm-gate level. The average value per harvested acre increased from \$635 in 2002 to \$710 in 2003. Production of the major field crops in California was 28.4 million tons, down 7 percent from the 30.3 million tons in 2002.

Notable Increases in Value:

Cotton, Upland	38%
Potatoes, Sweet	60%
Rice, All	37%
Wheat, Durum	48%

Significant Decreases in Value:

Barley	20%
Beans, Dry	17%
Cotton, American Pima	17%
Oats	28%
Potatoes, All	15%

Hay was the state's highest-valued field crop at \$842 million, followed by cotton with a value of \$761 million. Of the total hay value, alfalfa accounted for \$710 million and other hay was \$133 million. Nationally, the Golden State is the leading alfalfa-producing state and ranked second for all hay production. The value of all hay decreased 10 percent. This was due to a 5 percent drop in both production and unit price per ton—from \$95.50 in 2002 to \$91.00 in 2003. Hay is in strong demand to provide for the growing dairy industry.

All cotton production was 9 percent below last year, while the value increased by 17 percent. American Pima production fell 39 percent, but Upland production increased 2 percent. The unit price of Upland cotton jumped from 57.3 cents per pound to 77.3 cents, while American Pima increased from 86.0 cents to \$1.16 per pound. Planting began in late-March, but cool, wet weather during April delayed planting and growth. The unfavorable weather during planting prompted growers to plant Upland cotton instead of American Pima, which requires a longer growing season. A few fields had to be replanted due to poor germination. By mid-May, warm, sunny weather improved growth in cotton fields and cultivation and irrigation were underway in many fields as plants emerged. Emerged fields showed generally good stands, but growth remained slow and stunted in several fields due to previous cool weather.

By the end of June, poor growth was reported in a few areas where the crop was still 2-3 weeks behind normal due to the cool, wet spring. Warm weather in July and August enhanced growth and the plants flourished. Harvest began in late September, about two weeks later than normal, and progressed rapidly under ideal harvesting conditions. Harvest was virtually complete by the end of December.

Rice harvested acreage and production declined 4 and 10 percent, respectively, while the value jumped 37 percent. Conditions were less than ideal during planting as cool weather and rainfall caused delays. Rice yields were down from the previous three years, but the weather during the fall was favorable and harvest proceeded with no major problems.

The dry bean harvested acreage declined 16 percent and production was down 20 percent, which contributed to the 17 percent decline in the value. Harvest of the crop went well with good quality reported.

Corn for grain harvested acreage increased 13 percent, production was up 7 percent from the previous year, and the value was up 11 percent. Planting of the crop began in March and continued into April and May. Growth was normal during the growing season and harvest began the last week of July and continued through the fall.

Sugar Beet acreage was up 1 percent, while the production and value both dropped 7 percent from 2002.

Field Crop Acreage, Production and Value, 1994-2003

- 1/ Production is on a clean basis.
- 2/ Dashes represent data not published due to the estimate being discontinued, not estimated, or not available.
- 3/ Includes varieties not listed separately. Excludes beans grown for garden seed.
- 4/ Planted acreage is for all purposes.
- 5/ Cotton bales are 480 lbs. net-weight.
- 6/ Estimated marketings of alfalfa and other hay used as weights to calculate all hay price for 1994-2003.
- 7/ Sweet rice acreage included in 2003 as short grain, but not in previous years.
- 8/ Excludes wild rice. Sweet rice acreage included in 2003, but excluded in prior years.
- 9/ Initiated in 2000.
- 10/ Relates to year of intended harvest for fall planted beets in central California and to year of planting for overwintered beets in central and southern California.

California Floriculture

The growth of the floriculture industry in the United States leveled off in the last few years, but the wholesale value of operations with \$100,000+ sales in 2003 totaled a record \$4.76 billion. The industry enjoyed record wholesale values due to the strength of its leading producing states—California, Florida, Michigan, Texas and North Carolina. These five states account for over half of the national value in floriculture.

California maintained its position as the leading floriculture state in the nation, with a total wholesale value of \$985 million. This total represents 21 percent of the national value and a 2 percent decrease from the previous year. Aided by its favorable coastal climate, California now accounts for 72 percent of the national value for all fresh, cut flowers. At \$306 million in sales, this represents a 2 percent increase from the \$299 million of 2002. The rose is the most popular cut flower in the nation, and California accounts for roughly 73 percent of the value for all fresh, cut roses grown in the United States. While cut flower demand has continued to rise, domestic production has been declining with over two-thirds of the major cut flowers now imported. Most imports are coming from Colombia, Costa Rica, Ecuador, Mexico and the Netherlands.

California's total sales of potted flowering plants fell 7 percent from \$207 million in 2002 to \$193 million in 2003. California is still the leading state with 23 percent of the national value. Sales of foliage plants showed a 1 percent increase from \$97.5 million in 2002 to \$98.9 million in 2003.

The wholesale value of bedding and garden plants fell 5 percent from \$320 million in 2002 to \$305 million in 2003. The value of cut, cultivated greens was down 6 percent, falling from \$17.6 million in 2002 to \$16.6 million in 2003.

The number of floriculture producers in the state has been in decline in recent years. Of those producers with sales greater than \$10,000, California now has 937 growers compared to 986 in 2002.

1/ The total covered growing area of 132,701,000 square feet consisted of the following: 23,866,000 square feet of shade and temporary cover; 17,405,000 square feet of glass; 31,629,000 square feet of fiberglass and other rigid greenhouses; 59,801,000 square feet of film plastic (single/multi) greenhouses; and 9,808 acres of open ground.

2/ For potted plants, price represents a weighted average for plants sold in pots less than 5 inches and in pots 5 inches or more.

3/ Pot price is a weighted average of all pots to avoid disclosure of individual operations.

4/ Total includes Leatherleaf Ferns, which are not published to avoid disclosure of individual operations.

1/ The total covered growing area of 122,890,000 square feet consisted of the following: 23,260,000 square feet of shade and temporary cover; 14,996,000 square feet of glass; 27,421,000 square feet of fiberglass and other rigid greenhouses; 57,213,000 square feet of film plastic (single/multi) greenhouses; and 8,165 acres of open ground.

2/ For potted plants, price represents a weighted average for plants sold in pots less than 5 inches and in pots 5 inches or more.

3/ Pot price is a weighted average of all pots to avoid disclosure of individual operations.

4/ Total includes Leatherleaf Ferns, which are not published to avoid disclosure of individual operations.

California Fruit and Nut Crops

California accounts for 43 percent of the national fruit and nut production and 60 percent of the national value of fruit and nut crops. In 2003, the state produced 14.4 million tons of fruit and nuts, representing a 2 percent decline from 2002. The state's total production value in 2003 was \$7.92 billion, up fractionally from the previous year.

Grapes continue to be the top-valued fruit and nut crop with \$2.30 billion, despite a decline of 10 percent from 2002. Crops with record production in 2003 were strawberries and walnuts. California accounted for nearly all the national production of almonds, dates, figs, grapes for raisins, kiwi fruit, nectarines, olives, Clingstone peaches, pistachios, dried plums (prunes) and walnuts.

Significant Increases in Production:

Cherries	24%
Lemons	31%
Olives	15%
Oranges, Navels	31%
Strawberries	14%
Tangerines	27%
Walnuts	16%

Notable Decreases in Production:

Avocados	16%
Boysenberries	29%
Dates	35%
Figs	13%
Grapes, Raisin	23%
Pistachios	61%

In January, normal seasonal rainfall occurred in the northern part of the state, but precipitation was below normal in the southern areas. Temperatures were generally above normal for most of January and early February. Bee hives were placed in some stone fruit and almond orchards in anticipation of bloom. Blooms were reported in a number of early variety peach and nectarine orchards and buds began to swell in almond orchards, indicating that bloom was near. For the rest of February, cooler temperatures and rain over most of the state slowed crop development.

During the winter months, growers performed the needed orchard and vineyard activities such as pruning, spraying, fertilizing, brush shredding, and preparing for new tree plantings when conditions permitted. The cold weather in February helped ease growers' concerns over the lack of chilling hours required for most tree fruit. Almonds began blooming in early February and were in full bloom by later in the month.

April was a wet month as California experienced a series of storms that brought both rain and hail to many areas of the state. Thinning was active in the stone fruit during April and May. By the end of April, harvesting commenced on some of the early peach and cherry varieties. Warm weather and sunny skies prevailed throughout most of May and the picking and packing of stone fruit gained momentum.

A steady harvest of stone fruit varieties continued during the summer months and the warm weather accelerated fruit maturity. A high pressure system over the western United States in mid-July resulted in very warm condition across most of California and temperatures were well above normal. Some stone fruit orchards experienced heat and humidity related problems with higher than normal fruit-drop and some pit burn. Sunburn damage was evident in some walnut orchards. In late August, a weather system brought thunderstorms and widespread showers, with occasionally heavy rain reported across foothill and mountain locations.

The weather during the fall months was variable and rain showers disrupted harvest of some of the later fruit and nut crops.

The 2002-03 Navel orange crop bounced back from a very low set the previous year and a good crop was realized. The fruit size was smaller than the previous year, but the quality was good. The Navel production was up 31 percent from the previous year. The Valencia crop had a higher set than the previous year and production increased by 3 percent, even though the bearing acreage declined 8 percent. California's grapefruit crop had generally good quality with smooth texture. The bearing acres dropped 7 percent, the production was down 5 percent, but the value jumped 36 percent due to shortages in other producing states. The lemon season progressed normally with good quality reported and above average yields resulted in an increase of 31 percent in production. However, the large crop and slow demand resulted in an 8 percent drop in the total crop value. The tangerine crop experienced good color and quality. The production jumped 27 percent and the value increased 14 percent from the previous year.

1/ Equivalent packinghouse door returns.

2/ Estimates for "Grapefruit, Desert" and "Grapefruit, Other" were combined to "Grapefruit, All" starting in 1995-96. Season average values for all grapefruit are derived by weighting the season average value for each area by their carton weights. Prior to 1993-94, net weight per carton for Desert Valley was 32 pounds.

- 1/ Non-bearing shown only in years acreage surveys were conducted.
- 2/ Return at processing plant door or packinghouse door.
- 3/ Acres of raisin type grapes enrolled in the California Raisin Industry Diversion (RID) program were; 1994 -- zero; 1995 -- 25,000; 1996,1997, 1998, 1999 and 2000 -- zero; 2001 -- 41,000; 2002 -- 27,000; 2003 -- zero. These acres were deducted from bearing acres before calculating yield.
- 4/ Raisin-type production is the fresh equivalent of dried and not dried.
- 5/ Acreage by county, variety and year of planting for 2003 are available upon request.
- 6/ These crops are almond hulls, apricot-plum crosses (aprium, plumcot, pluots), black walnuts, chayotes, cherimoyas, chestnuts, feijoas, guavas, jojobas, jujubes, kumquats, limes, loquats, Macadamia nuts, persimmons, pomegranates, prickly pears, quince, citrus by-products, and orchard Bio mass.

- 1/ Dried and frozen fruit included in total processed to avoid disclosure of individual operations.
- 2/ Data for 1999 not published to avoid disclosure of individual operations.
- 3/ Processed fruit included in fresh market total to avoid disclosure of individual operations.
- 4/ Total processed includes canned, crushed, frozen and brined.
- 5/ Prices for processing and fresh totals were not published to avoid disclosure of individual operations. Small quantities processed included in fresh to avoid disclosure of individual operations.
- 6/ Includes substandard raisins diverted to other uses.
- 7/ Processed and fresh fruit not published to avoid disclosure of individual operations, but included in total utilized.
- 8/ Processed mostly canned, but includes other small quantities not published separately to avoid disclosure of individual operations.
- 9/ Quantity and value include dried, but price excludes dried.
- 10/ Not published separately to avoid disclosure of individual operations.
- 11/ Total processing value per ton excludes dried processing.

1/ Values are based on the edible portion of the crop only. Included in production are inedible quantities of no value: 1994 -- 14.7 million pounds, 1995 -- 14.8 million pounds, 1996 -- 20.4 million pounds, 1997 -- 15.0 million pounds, 1998 -- 21.0 million pounds, 1999 -- 33.3 million pounds, 2000 -- 15.9 million pounds, 2001 -- 16.8 million pounds, 2002 -- 8.30 million pounds, 2003 -- 20.8 million pounds.

2/ Data for 2003 acreage by county, variety and year of planting available upon request.

California Livestock and Dairy

The Golden State's dairy industry continued its phenomenal growth as new record highs were set for the number of milk cows and milk production. In 2003, California led the nation in total milk production with a record 35.4 billion pounds, representing a 1 percent increase from the previous year and 21 percent of the U.S. total. The average number of cows in 2003 was 1.69 million, up 2 percent from 2002. Total milk value was \$4.03 billion, up 5 percent.

The five leading counties in milk production and number of milk cows were Tulare, Merced, Stanislaus, San Bernardino and Kings. Collectively, these counties accounted for approximately two-thirds of the state's milk production and milk cows.

Nationally, California ranked first in nonfat dry milk production, first in butter production, and second in cheese production. California produced 46 percent of the nation's nonfat dry milk, 29 percent of the butter, and 21 percent of the cheese. Cheddar and mozzarella cheeses constituted approximately three-fourths of the cheese production in California.

Livestock cash receipts during 2003 totaled \$6.99 billion, up 12 percent from 2002. The rise in cash receipts was attributed to the large increases for all chickens, cattle and calves, chicken eggs, hogs and pigs, honey, milk and cream, sheep and lambs, and wool. The table below shows the 2002 and 2003 cash receipts and the percent change.

Total production of the three red meat species (cattle, sheep and hogs) was 2.11 billion pounds, up 18 percent from the 1.95 billion pounds of a year ago. Total marketings of the three red meat species also increased by 5 percent, from 2.47 to 2.59 billion pounds. Cattle and calf marketings were 2.43 billion pounds, representing a 4 percent increase. Sheep and lamb marketings of 83.8 million pounds were up 6 percent from 2002. Hog and pig marketings of 78.0 million pounds were up 25 percent from 2002.

Cattle and calves marketed from California feedlots totaled 721 thousand, which is a 7 percent increase over 2002. Turkey production decreased 5 percent to 419 million pounds in 2003. Egg production of 5.44 billion eggs was down 13 percent. Honey production was 32.2 million pounds, up 37 percent from 2002. Wool production was 3.50 million pounds, down 3 percent from the previous year.

1/ Steers and heifers over 500 pounds (including fed cattle) and slaughter cows.

2/ Steers and heifers (all qualities) over 500 pounds (including fed cattle).

3/ Beef cows and cull dairy cows sold for slaughter.

4/ Steers and heifers (all qualities) under 500 pounds

Grazing Fee Annual Average Rates, 1994-2003 1/

Year	Per Animal Unit 2/	Cow-Calf	Per Head
	<i>Dollars Per Month</i>		
1994	11.00	13.10	11.80
1995	10.50	12.80	11.10
1996	10.10	12.20	11.90
1997	10.60	13.00	12.00
1998	11.50	14.50	12.90
1999	12.10	15.00	12.50
2000	12.30	15.50	12.70
2001	13.00	16.00	13.50
2002	12.80	16.50	14.00
2003	13.50	17.50	14.30

1/ The average rates are estimates (rates over \$10.00 are rounded to the nearest dime) based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Agricultural Survey.

2/ Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aum=cow-calf *0.833).

California Vegetable and Melon Crops

California's diverse climate allows for year-round production of many vegetables, beginning in the desert during winter months and then heading into the Central Valley and coastal areas as the season progresses.

California continues to lead the nation in vegetable and melon production, accounting for 42 percent of the harvested acreage, 64 percent of production, and 59 percent of total value.

In real terms, the Golden State produced 24.6 million tons of vegetables and melons in 2003. The total value of vegetable and melon production was \$6.99 billion. These figures represent a 13 percent decline in production, but a 6 percent increase in value of production from 2002.

Asparagus, broccoli, processing carrots, cauliflower, sweet corn, fresh cucumbers, head and romaine lettuce, onions, and spinach, showed large increases in value. There were notable decreases in value for snap beans, cantaloupes, and processing tomatoes.

In 2003, California produced 94 percent of the processing tomatoes in the country, with most coming from rich farmland in the Sacramento and San Joaquin valleys. The Golden State also accounts for more than 90 percent of the nation's production of artichokes, broccoli, and celery. Additionally, California is home to more than 75 percent of the national production of cauliflower, fresh market carrots, garlic, and leaf and Romaine lettuce. Monterey County's fertile Salinas Valley is known worldwide for its abundant, high-quality vegetable crops, particularly artichokes, broccoli, cauliflower, celery, and lettuce.

The month of January delivered the expected rainfall to the northern part of the state, but precipitation was below normal in the southern areas. Temperatures were mostly above normal for most of January and early February, which prompted good development of winter vegetables. In February, cooler temperatures and rain over most of the state slowed crop development.

Temperatures were below normal the first week of March, but were mostly above normal the rest of the month and that encouraged plant growth and harvesting resumed. Harvesting of winter vegetables continued in the desert areas and then moved into the San Joaquin Valley. Field preparation and planting of various vegetables continued throughout the state as conditions permitted. Rainfall was

evident over most of the state for the first two weeks of March, but only scattered showers occurred the rest of the month. The rain and cool weather returned in April and May causing wet conditions that slowed fieldwork and delayed harvesting of many vegetables. Precipitation for the season reached normal levels by June 1.

The remainder of the vegetable growing season was uneventful and planting and harvesting proceeded on schedule. The summer months were generally mild with no temperature extremes.

Notable Changes in Vegetable Production from 2002 to 2003:

Carrots, Processing	+ 88%
Corn, Sweet	+ 19%
Garlic	+ 14%
Pumpkins	- 17%
Spinach	+ 20%
Tomatoes, Processing	- 16%

Note to the Reader

Vegetable and melon estimates include commercial production, but exclude garden production and vegetables grown for seed. Prices for processing crops and processed segments of dual utilization crops are based on equivalent returns at the processing plant door.

For fresh market sales, the price is on a packed and loaded basis, free-on-board (f.o.b.) shipping point. To avoid disclosure of individual plants, not all of California's data were published.

- 1/ The processed price is based on equivalent returns at the processing plant door. The fresh market price is on a packed and loaded basis, F.O.B. shipping point.
- 2/ Program discontinued in 2002.
- 3/ Onion production includes quantity harvested, but not marketed because of loss during storage (shrinkage): 1994 and 1995 -- 266,000 cwt., 1996 -- 292,000 cwt., 1997 -- 278,000 cwt., 1998 to 2003 -- 250,000 cwt. Storage loss amounts are excluded when computing total value.
- 4/ Includes fresh and processed.
- 5/ Program initiated in 2000.
- 6/ Program initiated in 1998. Included in summer storage onions.
- 7/ Miscellaneous vegetables and melons include: Green lima beans for processing, oriental vegetables, green peas, etc. The crops added in 2000 are excluded from the 2000 to present miscellaneous totals.

PUBLICATION AND SUBSCRIPTION REQUEST FORM

Complete the "publication request" if you would like to purchase one or more publications on a one-time basis only. We will mail you the latest release unless you indicate otherwise. When ordering diskettes, please be sure to check the appropriate file format.

Complete the "subscription request" if you would like to be placed on our regular mailing list for upcoming releases.

For all requests, check the publications you wish to receive, enter the amount in the space provided and total the cost of all fees. Please be sure to complete the "requested by" information.

Publications on this order form can be viewed free of charge at www.nass.usda.gov/ca. Please forward any inquiries to our e-mail address at nass-ca@nass.usda.gov.
