

# WHEAT VARIETY

Released: January 28, 2003

## JAGGER REMAINS NUMBER ONE VARIETY

Jagger was the leading variety of wheat seeded in Kansas for the 2003 crop. Accounting for 45.2 percent of the State's wheat, Jagger increased 2.4 points from a year ago and was the most popular variety in seven of the nine districts. Jagger made the biggest gain in the South Central District. The KSU-maintained variety 2137 ranked second over all, with 13.3 percent of the acreage. It ranked first in one district and second in five. TAM 110 moved up to third position, and increased .8 points from last year. Karl and improved Karl moved down to fourth place with 3.2 percent of the acreage. The OSU-maintained variety 2174 moved down to fifth place with 3.1 percent of the State's acreage. TAM 107 held sixth place with 2.3 percent. Dominator moved up to seventh place, with 2.2 percent. Ike moved down to eighth place, with 2.1 percent. New to the top ten is

Trego, a hard white, ranking ninth with 1.8 percent. KSU-maintained variety 2163 remained in the top ten with .8 percent. Acres planted with multiple varieties blended together were not included in the rankings by variety. Blends accounted for 12.8 percent of the acres planted State-wide and were used more extensively in the north central and central parts of the State. Out of the total State acres planted with blends, 98.6 percent had Jagger in the blend and 77.0 percent had 2137 in the blend. All Hard White varieties accounted for 2.7 percent of the State's acreage. Trego was the leading Hard White variety, accounting for 67 percent of the State's white wheat. The majority of the white wheat was planted in the western third of the State. This Wheat Variety project is funded by the Kansas Wheat Commission.
